(GERC)**

AHMEDABAD

Multi-Year Tariff Order:

Annual Performance Review for FY 2010-11,
Aggregate Revenue Requirement for the MYT Period FY 2011-16
and Determination of Tariff for FY 2011-12

For

Dakshin Gujarat Vij Company Limited

Case No. 1101 of 2011

6th September, 2011

CONTENTS

1. Background and Brief History	1
1.1 Background	1
1.2 Dakshin Gujarat Vij Company Limited (DGVCL)	2
1.3 Commission's Orders for the First Control Period	2
1.4 Admission of Current Petition and Public Hearing Process	3
1.5 Approach of this Order	4
1.6 Contents of this Order	5
1.7 Business Plan.....	6
 2. Summary of ARR and Tariff Petition for FY 2011-12 to FY 2015-16	 8
2.1 Aggregate Revenue Requirement (ARR) for the control period.....	8
2.2 Estimated Revenue Gap for FY 2011-12.....	9
2.3 DGVCL's request to the Commission:	9
 3. Objections raised by various stakeholders, DGVCL's response and the Commission's comments.....	 11
 4. Truing up of FY 2009-10	 50
4.1 Energy sales	50
4.2 Distribution losses	51
4.3 Energy requirement.....	52
4.4 Power purchase cost.....	53
4.4.1 Gain / (loss) due to distribution losses	55
4.5 Fixed charges	56
4.5.1 Operation and Maintenance (O&M) expenses for FY 2009-10	56
4.5.2 Employee cost	57
4.5.3 Repairs & Maintenance (R&M) Expenses	58
4.5.4 Administration & General (A&G) expenses	59
4.5.5 Other Debits	60
4.5.6 Extraordinary items	60
4.5.7 Net prior period expenses / (income).....	61
4.5.8 Other expenses capitalised.....	61
4.5.9 Capital expenditure, Capitalisation and Funding of CAPEX	62
4.5.10 Depreciation	63
4.5.11 Interest and Finance charges.....	65
4.5.12 Interest on working capital	67
4.5.13 Provision for bad debts	69
4.5.14 Return on equity	71
4.5.15 Taxes.....	72
4.5.16 Non-tariff income	73
4.6 Revenue from sale of power	74
4.7 ARR approved in the truing up.....	75
4.8 Sharing of Gains / Losses for FY 2009-10.....	77
4.9 Revenue gap / surplus for FY 2009-10	78

5. Annual Performance Review for FY 2010-11.....	80
5.1 Energy sales.....	80
5.2 Distribution losses	81
5.3 Energy requirement and Energy balance	81
5.4 Power purchase cost.....	82
5.5 Fixed charges	84
5.5.1 Operation and Maintenance (O&M) expenses	84
5.5.2 Employee cost.....	84
5.5.3 Repairs & Maintenance (R&M) Expenses	85
5.5.4 Administration & General (A&G) expenses	86
5.5.5 Other Debits	87
5.5.6 Extraordinary items	87
5.5.7 Net prior period expenses / (income).....	87
5.5.8 Other expenses capitalised.....	87
5.5.9 Capital expenditure	88
5.5.10 Depreciation	91
5.5.11 Interest and Finance charges	93
5.5.12 Interest on working capital	94
5.5.13 Provision for bad debts	96
5.5.14 Return on equity	97
5.5.15 Taxes.....	98
5.5.16 Non-tariff income.....	99
5.6 Revenue from sale of power	99
5.7 ARR considered in the APR of FY 2010-11.....	100
 6. Aggregate Revenue Requirement (ARR) for the FY 2011-12 to FY	
2015-16, the control period and determination of tariff for FY 2011-12	102
6.1 Energy Sales	102
6.2 Consumer Category	102
6.2.1 Overall approach to sales projections.....	103
6.2.2 Category-wise projected energy sales for the control period FY 2011-12 to FY	
2015-16.....	103
6.2.3 Consumer profile and connected load	104
6.2.4 Category-wise projected energy sales.....	105
6.2.5 Projection of consumers and connected load.....	106
6.3 Detailed analysis of energy sales projected	107
6.3.1 Residential.....	107
6.3.2 Commercial	108
6.3.3 Industrial (LT)	109
6.3.4 Public water works	110
6.3.5 Agriculture (Irrigation pumpsets).....	111
6.3.6 Streetlights.....	114
6.3.7 Industrial (HT).....	115
6.3.8 Railway Traction.....	115
6.3.9 Total Energy Sales.....	116

Dakshin Gujarat Vij Company Limited
Truing up for FY 2009-10, APR for FY 2010-11,
ARR for FY 2011-12 to FY 2015-16 and Tariff for FY 2011-12

6.4 Distribution losses	117
6.5 Energy requirement.....	118
6.6 Energy balance.....	119
6.7 Revenue Requirement for the control period FY 2011-12 to FY 2015-16	120
6.8 Power Purchase cost	121
6.8.1 Bulk supply tariff	121
6.8.2 Power purchase sources.....	121
6.8.3 Power purchase cost.....	126
6.8.4 Transmission and other costs	137
6.8.5 GUVNL cost.....	137
6.8.6 SLDC Fees and charges	138
6.8.7 Trading.....	138
6.8.8 Total power purchase cost.....	138
6.8.9 Net power purchase cost	139
6.8.10 Bulk supply arrangement	139
6.8.11 Power purchase sources and merit order despatch.....	141
6.8.12 Purchase in merit order	142
6.8.13 Power purchase during the control period FY 2011-12 to FY 2015-16	143
6.8.14 Transmission and other costs	154
6.8.15 Trading.....	155
6.8.16 Fixed costs	156
6.8.17 Variable costs	156
6.8.18 Net power purchase cost	156
6.9 Fixed charges	157
6.9.1 Operation and Maintenance (O&M) expenses	157
6.9.2 Capital expenditure	159
6.9.3 Depreciation	162
6.9.4 Interest and Finance charges.....	163
6.9.5 Interest on working capital	165
6.9.6 Provision for bad and doubtful debts	166
6.9.7 Return on equity	166
6.9.8 Provision for Tax	167
6.9.9 Non-Tariff income.....	168
6.10 Annual Revenue Requirement (ARR) excluding power purchase cost	169
6.11 Revenue from existing tariff FY 2011-12	171
6.12 Other consumer related income.....	172
6.13 Agriculture subsidy	173
6.14 Total expected revenue for the control period FY 2011-12 to FY 2015-16.....	174
6.15 Determination of differential Bulk Supply Tariff	174
6.15.1 Aggregate amount available with the four DISCOMs for Power Purchase.....	175
6.15.2 Calculation of Gap.....	175
6.15.3 Allocation of Gap	176
6.15.4. Bulk Supply Tariff	177
6.16. ARR for the control period FY 2011-12 to 2015-16.....	178
6.17. Estimated Revenue Gap for FY 2011-12 for DGVCL.....	179

7. Compliance of Directives	180
7.1 Compliance of earlier Directives	180
7.2 Fresh Directives.....	192
8. Fuel and Power Purchase Price Adjustment.....	194
8.1 Fuel Price and Power Purchase Price Adjustment.....	194
8.2 Power Purchase Price Adjustment (FPPPA)	194
8.3 Base price of fuel of GSECL stations.....	199
9. Wheeling charges and cross subsidy surcharge	202
9.1 Allocation matrix	202
9.2 Wheeling charges.....	203
9.3 Cross subsidy charges	204
10. Tariff philosophy and Tariff proposals	207
10.1 Introduction	207
10.2 Proposal of DGVCL for tariff increase and changes in tariff structure	208
10.2.1 Tariff proposal.....	208
10.2.2 Proposed changes in the tariff structure (LT category)	208
10.2.3 HT category	210
10.3 Revenue Gap / Surplus	213
10.4 Impact of Electricity Duty	213
COMMISSION'S ORDER	214
ANNEXURE: TARIFF SCHEDULE FOR FY 2011-12.....	215

TABLES

Table 2.1: ARR proposed by DGVCL for the control period FY 2011-12 to FY 2015-16	8

Before the Gujarat Electricity Regulatory Commission at Ahmedabad

Case No. 1101 of 2011

Date of the Order: 06.09.2011

CORAM

Dr. P.K. Mishra, Chairman
Shri Pravinbhai Patel, Member
Dr. M.K. Iyer, Member

ORDER

1. Background and Brief History

1.1 Background

The Dakshin Gujarat Vij Company Limited (hereinafter referred to as 'DGVCL' or 'Petitioner') has filed its petition on 12th May, 2011 under Section 62 of the Electricity Act, 2003, read with Gujarat Electricity Regulatory Commission (Terms & Conditions of Tariff) Regulations, 2005, Gujarat Electricity Regulatory Commission (Multi-Year Tariff Framework) Regulations, 2007 and Gujarat Electricity Regulatory Commission (Multi-Year Tariff) Regulations, 2011 (hereinafter referred to as MYT Regulations, 2011), for truing up of FY 2009-10, Annual Performance Review (APR) for FY 2010-11, Aggregate Revenue Requirement (ARR) for the control period FY 2011-12 to FY 2015-16 and determination of Tariff for FY 2011-12.

The Commission, on preliminary analysis, admitted the petition on 17th May, 2011.

1.2 Dakshin Gujarat Vij Company Limited (DGVCL)

The Government of Gujarat unbundled and restructured the Gujarat Electricity Board with effect from 1st April, 2005. The Generation, Transmission and Distribution businesses of the erstwhile Gujarat Electricity Board were transferred to seven successor companies. The seven successor companies are listed below:

Generation	Gujarat State Electricity Corporation Limited (GSECL)
Transmission	Gujarat Energy Transmission Corporation Limited (GETCO)

Distribution Companies:

Sl. No	Name of Company
1	Dakshin Gujarat Vij Company Limited (DGVCL)
2	Madhya Gujarat Vij Company Limited (MGVCL)
3	Uttar Gujarat Vij Company Limited (UGVCL)
4	Paschim Gujarat Vij Company Limited (PGVCL)

Gujarat Urja Vikas Nigam Limited (GUVNL), a holding company, is responsible for purchase of electricity from various sources and supply to Distribution Companies and other activities including trading of electricity.

The Government of Gujarat vide notification dated 3rd October, 2006, notified the final opening balance sheets of the transferee companies as on 1st April, 2005. The value of assets and liabilities, which stand transferred from the erstwhile Gujarat Electricity Board to the transferee companies, including Dakshin Gujarat Vij Company Limited (DGVCL). Assets and liabilities (gross block, loans and equity), as on the date mentioned in the notification, have been considered by the Commission in line with the Financial Restructuring Plan (FRP), as approved by Government of Gujarat.

1.3 Commission's Orders for the First Control Period

The Dakshin Gujarat Vij Company Limited filed its petition under the Multi-Year Tariff framework for the FYs 2008-09, 2009-10 and 2010-11 on 31st July, 2008 in accordance with the Gujarat Electricity Regulatory Commission (Multi-Year Tariff) Regulations, 2007 notified by GERC. The Commission, in exercise of the powers

vested under Sections 61, 62 and 64 of the Electricity Act, 2003 and all other powers enabling it in this regard and after taking into consideration the submissions made by DGVCL, the objections by various stakeholders, response of DGVCL, issues raised during the public hearing and all other relevant material, issued the Multi-Year Tariff order on 17th January, 2009 for the control period comprising the FYs 2008-09, 2009-10 and 2010-11.

The Commission also issued the orders on the following:

Subject	Date of Issue
Annual Performance Review for FY 2008-09 and Determination of tariff for FY 2009-10	14 th December, 2009
Annual Performance Review for FY 2009-10 and Determination of tariff for FY 2010-11	31 st March, 2010

1.4 Admission of Current Petition and Public Hearing Process

The DGVCL submitted the current petition for 'truing up' of FY 2009-10, Annual Performance Review (APR) for FY 2010-11 and the determination of Aggregate Revenue Requirement (ARR) for the distribution business for the period FY 2011-12 to FY 2015-16, the control period and determination of tariff for FY 2011-12. The Commission undertook the technical validation of the petition and admitted the petition (Case No.1101 of 2011) on 17th May, 2011.

In accordance with Section 64 of the Electricity Act, 2003, the Commission directed DGVCL to publish its application in the abridged form to ensure public participation. The Public Notice, inviting objections / suggestions from its stakeholders on the ARR petition filed by it, was published in the following newspapers on 19th May, 2011.

1. DNA (Daily News and Analysis) (English)
2. Divya Bhaskar (Gujarati)

The petitioner also placed the public notice and the petition on the website (www.dgvcl.com) for inviting objections and suggestions on its petition.

The interested parties/stakeholders were asked to file their objections / suggestions on the petition on or before 18th June, 2011.

The DGVCL/Commission received the objections / suggestions from 15 consumers / consumer organisations. The Commission examined the objections / suggestions received and fixed the date for public hearing for DGVCL to be held on 11th and 12th July, 2011. Subsequently, communication was sent to these objectors to take part in the public hearing process for presenting their views in person before the Commission. The public hearing was conducted at Commission's Office in Ahmedabad on scheduled dates.

The names of the consumers / consumer organisations that filed their objections and the objectors who participated in the public hearing for presenting their objections are given in Annexure 1.1.

A short note on the main issues raised by the objectors in the written submissions and also in the public hearing in respect of the petition, along with the response of DGVCL and the Commission's views on the response are briefly given in Chapter 3.

1.5 Approach of this Order

The Multi-Year Tariff Regulations, 2007 provide for 'truing up' of previous year, Annual Performance Review (APR) for the current year and determination of tariff for the ensuing year. The Commission had approved the ARR for the three years of the first control period FY 2008-09 to FY 2010-11 by MYT order dated 17th January, 2009, the Annual Performance Review for FY 2008-09 by the tariff order dated 14th December, 2009 and Annual Performance Review for FY 2009-10 and the tariff order dated 31st March, 2010.

The DGVCL has now approached the Commission with the present petition for 'truing up' of the FY 2009-10, the Annual Performance Review for the FY 2010-11 and determination of ARR for the period FY 2011-12 to FY 2015-16, the control period and determination of tariff for the FY 2011-12.

The Commission has undertaken truing up of the FY 2009-10 and Performance Review for FY 2010-11, based on the submission of the petitioner. However, the Commission has undertaken the computation of gains and losses for the FY 2009-10, based on the audited annual accounts made available to it. The Commission has not undertaken the computation of gains and losses for the FY 2010-11 as the audited accounts are not available. The computation of gains and losses would be

undertaken for the FY 2010-11, based on the audited annual accounts of the petitioner during the FY 2011-12, while finalizing the tariff order for FY 2012-13.

While considering the revision of the ARR for the FY 2009-10, the Commission has been primarily guided by the following principles:

1. Controllable parameters have been considered at the level approved under the Tariff Order for FY 2009-10, unless the Commission considers there are valid reasons for revising of the same.
2. Uncontrollable parameters have been revised, based on the actual performance observed.

The truing up of the FY 2009-10 and annual performance review for FY 2010-11 have been considered, based on the MYT Regulations, 2007.

The determination of ARR for the period FY 2011-12 to FY 2015-16 and the tariff for FY 2011-12 have been considered as per GERC (MYT) Regulations, 2011, which were notified on 22nd March, 2011.

Regulation 1.4 (a) of these Regulations, 2011 reads as under:

“These Regulations shall be applicable for determination of tariff in all cases covered under these Regulations from 1st April 2011 and onwards”.

1.6 Contents of this Order

This order is divided into ten chapters, as under:

1. The **First Chapter** provides a background of the petitioner, the petition and details of the public hearing process and the approach adopted for this order.
2. The **Second Chapter** contains a summary of DGVCL's MYT petition.
3. The **Third Chapter** provides a brief account of the public hearing process, including the objections raised by various stakeholders, DGVCL's response and the Commission's views on the same.
4. The **Fourth Chapter** deals with the 'Truing up' for FY 2009-10.
5. The **Fifth Chapter** deals with Annual Performance Review (APR) for FY 2010-11

6. The **Sixth Chapter** deals with the Aggregate Revenue Requirement (ARR) for FY 2011-12 to 2015-16, the control period.
7. The **Seventh Chapter** deals with the compliance of directives and issue of fresh directives.
8. The **Eighth Chapter** deals with Power Purchase Cost Adjustment.
9. The **Ninth Chapter** deals with computation of Wheeling Charges
10. The **Tenth Chapter** deals with Tariff Philosophy and Tariff Proposals approved by the Commission.

1.7 Business Plan

The DGVCL has submitted the Business Plan for the control period of five (5) years from 1st April 2011 to 31st March 2016, in accordance with the directive of the Commission vide Letter No. GERC/MYT/Tariff-2010/1794 dated 12th November, 2010. It is observed that the assumptions used by the company in the Business Plan are in line with the provisions of the MYT Regulations, 2011, based on which the (MYT) order is being issued.

2. Summary of ARR and Tariff Petition for FY 2011-12 to FY 2015-16

2.1 Aggregate Revenue Requirement (ARR) for the control period FY 2011-12 to FY 2015-16

The Dakshin Gujarat Vij Company Limited (DGVCL) submitted the petition on 5th May, 2011 seeking approval for Aggregate Revenue Requirement and determination of Retail supply tariff for the control period FY 2011-12 to FY 2015-16.

The DGVCL has projected the revenue requirement for the control period as under:

Year	Rs. crore
2011-12	5282
2012-13	6010
2013-14	6619
2014-15	7044
2015-16	7848

The details of expenses under various components of ARR are given in the Table below:

Table 2.1: ARR proposed by DGVCL for the control period FY 2011-12 to FY 2015-16

(Rs. crores)

Sl. No.	Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
1	Cost of power purchase	4832	5513	6093	6490	7263
2	Operation and Maintenance expenses	197	208	220	233	246
2.1	Employee cost	167	177	187	197	209
2.2	Repairs and maintenance	27	29	30	32	34
2.3	Administration and general expenses	31	32	34	36	38
2.4	Other debts	4	5	5	5	6
2.5	Extraordinary items	1	1	1	1	1
2.6	Net prior period expenses / income	13	13	14	15	16
2.7	Other expenses capitalised	(46)	(48)	(51)	(54)	(57)
3	Depreciation	130	152	168	185	201
4	Interest and finance charges	66	64	55	44	32
5	Interest on working capital	57	65	72	77	86
6	Provision for bad debts	8	9	10	10	11
7	Sub-total (1 to 6)	5291	6011	6617	7038	7838
8	Return on equity	61	68	72	75	79
9	Provision for tax / tax paid	19	19	19	19	19
10	Total expenditure (7 to 9)	5371	6098	6708	7133	7937
11	Less: Non-tariff income	89	89	89	89	89
12	Aggregate Revenue Requirement	5282	6010	6619	7044	7848

2.2 Estimated Revenue Gap for FY 2011-12

Based on the ARR for FY 2011-12 given in Table 2.1 above, the estimated revenue gap for FY 2011-12 at existing tariff is shown in Table 2.2 below.

Table 2.2: Estimated revenue gap for FY 2011-12 at existing tariff

Sl. No.	Particulars	FY 2011-12
1.	Aggregate Revenue Requirement	5282
2.	Revenue gap from truing up of FY 2009-10	34
3.	Total Aggregate Revenue Requirement	5316
4.	Revenue with existing tariff	4245
5.	PPPA charges @61 paise/kWh	637
6.	Other income (consumer related)	63
7.	Agriculture subsidy	60
8.	Total revenue including subsidy (4 to 7)	5006
9.	Gap / (Surplus) 3-8	310

2.3 DGVCL's request to the Commission:

1. To condone the delay in filing this petition.
2. To admit this petition seeking Truing up of FY 2009-10, Annual Performance Review of FY 2010-11 and MYT petition for the second control period FY 2011-12 to 2015-16.
3. To approve the truing up for FY 2009-10 and allow sharing of gains/losses with the Consumers, as per sharing mechanism prescribed in the MYT Regulations, 2007.
4. To approve the Annual Performance Review for FY 2010-11 and allow sharing of gains/losses with the Consumers, as per sharing mechanism prescribed in the MYT Regulations, 2007.
5. To approve Aggregate Revenue Requirement of the second control period FY 2011-12 to 2015-16, as requested in this Petition on the basis of GERC (Multi- Year Tariff) Regulations, 2011.
6. To approve the methodology for recovery of Revenue Gap for FY 2011-12 as given in the Petition through proposed tariff hike of 25 paise/kWh for all categories of consumers, except agriculture and BPL (1-30 kWh).
7. To treat the un-recovered revenue gap as a regulatory asset, to be recovered in the future tariff.

8. To approve the actual capital expenditure for the FY 2009-10, revised capital expenditure plan for FY 2010-11 and projection of capital expenditure for the control period FY 2011-12 to 2015-16.
9. To approve the formula proposed for calculation of PPPA charges.
10. To consider approved parameters/ARR of GSECL, GETCO and SLDC, while finalising tariff of DGVCL.
11. To grant any other relief as the Commission may consider appropriate. The petitioner craves leave of the Commission to allow further submissions, addition and alteration to this Petition as may be necessary from time to time.
12. To pass any other order, as the Commission may deem fit and appropriate under the circumstances of the case and in the interest of justice.

3. Objections raised by various stakeholders, DGVCL's response and the Commission's comments

In response to the public notice inviting objections/suggestions of the stakeholders on the petition, a number of consumers/consumer organisations filed their submissions in writing. Some of these objectors also participated in the public hearing held on the 11th and 12th of July, 2011 jointly for DGVCL, MGVCL, UGVCL and PGVCL. The objections /suggestions, the responses and submissions of the petitioner on them and the views of the Commission are indicated below. Submissions and responses, pertaining to specific and detailed aspects of tariff, have been taken into account in the formulation of an equitable tariff, balancing the interests of various stakeholders, even if they may not find place in this chapter.

1. Petition belated

Objection: Some of the stakeholders have pointed out that the filing of the petition is delayed by more than seven months. It was not submitted on 30th November, 2010, as per Regulation 9.2 of Tariff Regulations, 2007. Hence, it may be rejected.

Response of the Petitioner: The petitioner has submitted that, for the 2nd control period FY 2011-12 to FY 2015-16, the MYT filing due date was 30 November, 2010. This was extended by the Commission up to 31st December, 2010. In the month of December, 2010, the Commission issued the discussion paper on MYT Regulations, 2011. Comments were invited from the stakeholders. The MYT Regulations, 2011 were consequently issued on 22 March, 2011 and were made effective from 1st April 2011. The petitioner filed the petition based on the MYT Regulations, 2011. Also, the consultation with the State Government for subsidy support took some time. The Commission is empowered to condone justifiable delays under Clause 85 of the Conduct of Business Regulations, 2004.

Commission's View: *In view of the circumstances mentioned by the petitioner the delay is condoned. However, the petitioner is directed to file such petition, in future, within the time prescribed by the relevant Regulations.*

2. GUVNL role and conflict of interest

Objection: Some of the stakeholders have raised issues about the role of GUVNL. The GUVNL cannot be a trader and a managing agent of the DISCOMs at the same time, without conflict of interest.

Response of the Petitioner: The petitioner has submitted that GUVNL derives its origin to the Transfer Scheme notification issued under the provisions of Section 28 of Gujarat Electricity Industry Reorganisation and Regulation Act, 2003 and Section 131 of the EA, 2003. The State Government issued the first transfer scheme through notification dt.24/10/2003 to form separate generation, transmission and distribution companies. Schedule G of the notification relates to bulk purchase of power from generating companies and supply /sale to DISCOMs (apart from other residual obligations, etc). GUVNL was incorporated under State Govt notification dated 10/12/2004 for the purpose of transferring the assets liabilities and proceedings, mentioned in Schedule G of the GEB (to GUVNL), including trading in electricity. Further, the State Government through notification dated 31/03/2005, finalised the transfer scheme w.e.f 01/04/2005.

Commission's View: *The objection and the detailed response are noted. GUVNL is a holding company and is also entrusted with bulk purchase of power and supply to DISCOMs. There is no conflict of interest. Any profit in trading is passed on to the DISCOMs.*

3. Filing should be by GUVNL, not by DISCOMs. The DISCOM's petitions should not be admitted.

Objection: Some stakeholders have stated that, as the DISCOMs are subsidiaries of GUVNL, they are not GOG companies. So, GUVNL, which is a GOG company, is entitled to file the petition.

Response of the Petitioner: The petitioner has submitted that all the DISCOMs are distribution licensees. So, they are required to file the MYT petitions under the MYT Regulations.

Commission's View: *Only the licensee is entitled to file the tariff petition.*

4. Tariff not to have retrospective application

Objection: Some stakeholders have pointed out that the petition is filed late. The petitioner should be penalised for the delay. The tariff should not be retrospective.

Response of the Petitioner: The petitioner has submitted that the due date for filing was extended from 30th November, 2010 to 31st December, 2010. Meanwhile, the Discussion Paper on MYT Regulations, 2010 was issued in December, 2010. The MYT Regulations, 2011 were issued on 22 March, 2011, w.e.f. 1st April, 2011. The petition has been filed based on these Regulations. Further, consultation with Government of Gujarat on issues like agricultural subsidy also took time. The Commission is empowered to take a decision in the matter.

Commission's View: *The objection and the response are noted and the Commission has taken an appropriate decision.*

5. Projections are unrealistic

Objection: Some of the stakeholders have represented that the projections are unrealistic and inconsistent.

Response of the Petitioner: The petitioner has submitted that projections are made according to Tariff Regulations and are based on past data and the observed growth. Also, the projections are made prudently. The assumptions made are shown in the petition.

Commission's View: *The objection and the response are noted. The Commission has examined the projections from the point of view reasonableness and prudence.*

6. T & D losses are high

Objection: Some stakeholders have represented that the T & D losses be restricted to 11.5% only (10% distribution and 1.5% transmission) and consumers should not be burdened for losses exceeding these limits.

Response of the Petitioner: The petitioner has submitted that a number of steps have been taken to reduce the technical and commercial losses.

Commission's View: *The petitioner should intensify efforts in this regard and is directed to reduce distribution losses as per the target set by the Commission.*

7. Reasonableness of losses needs assessment

Objection: Some of the stakeholders have stated that the burden of distribution losses cannot be transferred to the consumers with the enactment of the Electricity Regulatory Commission Act of 1998 Act and the EA, 2003. GERC should avail the services of experts to identify the quantum of losses that can be allowed for determination of the tariff.

Response of the Petitioner: The petitioner has submitted that several steps have been taken to bring the losses to a reasonable level.

Commission's View: *It is essential to reduce the losses to a reasonable level. The Commission has fixed the loss trajectory and the losses are allowed as per the targeted level.*

8. Power purchases increase due to high losses

Objection: Some of the stakeholders have pointed out that power purchase costs have increased due to high distribution losses.

Response of the Petitioner: The petitioner has submitted that the he has taken several steps and made improvement in practices to bring the losses to the permissible level. The high losses are due to factors like poor monsoon, and supplies to widely dispersed rural areas, etc.

Commission's View: *The objection and the response are noted. The utilities are directed to reduce the losses as per the trajectory given by the Commission.*

9. Dynamic Allocation of PPAs

Objection: Some of the stakeholders have stated that dynamic allocation of PPAs to DISCOMs is against the Tariff Policy and National Electricity Policy. If the allocations are changed to suit the utility conditions, the consumers should also be allowed to change contract demand every 2/4/6 months to ensure that they continue to be viable. The reallocation of PPAs is not legal and cannot be done without permission of GERC. It should be a one-time exercise.

Response of the Petitioner: The petitioner has submitted that PPA allocation is reviewed and revised, as and when new capacity addition comes up, or based on the requirement of the DISCOMs. The paying capacity of the DISCOMs differs on account of the different consumer mix and load. So, permanent allocation of PPA may distort the requirement of ARR and the tariffs. Hence, in the tariff petitions, the power purchase cost is allocated by GUVNL out of the total pooled power purchase cost and is not any PPA specific.

Commission's View: *The GUVNL purchases power from various sources, on behalf of all the DISCOMs. Since the DISCOMs have different and varied consumer mix and load profile, for the time being, the GUVNL adopted the approach of dynamic allocation of capacities with a view to facilitating uniformity of retail tariff across the areas of all DISCOMs.*

10. UI charges

Objection: Some of the stakeholders have raised the issue of UI charges and pointed out that UI charges are not considered in power purchase cost.

Response of the Petitioner: The petitioner has submitted that UI charges are basically aimed to maintain grid discipline. Power purchase projections are generally based on scheduled energy as per MOD. However, for 2010-11, the power purchase cost for the second half is worked out, based on per unit cost during the 1st half of schedule energy which consists of:

- Power Purchase cost in line with PPA calculated on scheduled energy,
- UI charges, and
- Revenue from trading.

Commission's View: *The objection and response from the utility are noted.*

11. Merit order despatch – Correlation with UI rates

Objection: Some of the stakeholders have pointed out that the dispatch instructions issued ahead, for Merit order Dispatch, need to be revised in real time with regard to the prevailing UI rates.

Response of the Petitioner: The petitioner has submitted that UI mechanism is intended to impose grid discipline so that demand and supply are matched with

regard to the frequency. The DISCOM needs to schedule its power from various generating sources according to its requirement keeping in view the merit order.

Commission's View: *The objection and the response are noted.*

12. Power Purchase Price Adjustment (PPPA)

Objection: Some of the stakeholders have requested that the levying of interim extra charges by way of PPPA in between the year should not be allowed.

Response of the Petitioner: The petitioner has submitted that the cost of the power purchase is approved by the appropriate regulatory authority, namely the GERC / CERC.

The incremental cost paid by the petitioner, compared to the base year's figures, is to be recovered through power purchase adjustment mechanism.

Commission's View: *The objection and the response are noted. The Petitioner is entitled to recover increase with reference to the base price approved by the Commission in the Tariff Order during the year from the consumers as per the FPPPA formula.*

13. Voltage Neutral FPPPA Charge

Objection: Some of the stakeholders have stated that the FPPPA formula has a loss compensation factor of 33%, irrespective of the voltage level at which the consumer takes supply. This is grossly unfair for HV consumers (for example consumers taking 220 KV supply pay about 16 times more since their losses level is only 2% at 220 KV). Also, as losses have generally declined, compensation needs revision.

Response of the Petitioner: The petitioner has submitted that the plea to change FPPPA on voltage level basis is difficult to implement. There is no detailed study to assess voltage level wise losses. The voltage level cost of supply, based on Annual accounts, is not backed by proper load flow studies and cannot form the basis for revision of FPPPA on voltage level.

Also, the tariffs, based on voltage level, will tend to create a feeling of discrimination among consumers in respect of sharing the fuel cost and this is violative of EA, 2003.

A uniform FPPPA charge goes some way to reduce the cross subsidy among the consumer categories.

Any change in the FPPPA charges will need detailed discussion.

Commission's View: *The objection and the response are noted. The issues, such as category-wise level of losses and cross subsidisation, need a detailed study and the utility is directed to take up the matter.*

14. Exorbitant penalty for excess demand

Objection: Some of the stakeholders have objected that CPPs are charged exorbitantly at 3 times for excess demand registered by them on the plea that costly power has to be purchased to take care of such infringement. But if FPPPA permits total pass through, such a plea is not sustainable.

Response of the Petitioner: The petitioner has submitted that the FPPPA is intended to take care of the increase in fuel price and power purchase costs. The existing formula does not take into account the impact on the actual power purchase cost, due to variation in the quantum of power actually supplied by generating stations and that approved by the Commission.

Commission's View: *The objection and the response are noted. Commission directs the petitioner to recover penal charges for exceeding contract demand in accordance with relevant Regulations / Tariff Order. In case of any grievances, the aggrieved party can approach the grievances redressal forum (CGRF) of the utility.*

15. Technical losses and FPPPA

Objection: Some stakeholders have pointed out that relative proportion of Technical and commercial losses remain indeterminate. The Commission needs to examine how much technical loss should be allowed in FPPPA formula.

Response of the Petitioner: The T&D losses are approved by the Commission for each DISCOM, based on which the FPPPA is determined.

Commission's View: *The objection and the response are noted. The Commission directs the petitioner to undertake a study to segregate technical and commercial losses and report to the Commission by December, 2011.*

16. Revision of FPPPA at 61 Ps/unit

Objection: Some stakeholders have pointed out that, in the ARR for the 2nd control period, strangely the petitioner has taken 61 ps/unit as confirmed FPPPA charges for revision of tariff. FPPPA is variable and cannot be linked to tariff in this manner.

Response of the Petitioner: The petitioner has submitted that actually, the average FPPPA for 2009-10 was 61 paisa. It is proposed to shift the base year for calculation of FPPPA to Financial Year 2009-10.

Commission View: *The FPPPA of 61 Ps/unit is not merged with tariff. As it is collected from consumers along with tariff, it is considered as a part of revenue.*

17. Tariff for Telecom infrastructure services

Objections

Some of the consumers in the telecom infrastructure enterprises have represented that:

- 1) Telecom services should be considered as a non-commercial or industrial category. The tariff applicable to commercial category should be reduced, or a new sub-category should be created for telecom towers within the commercial category. Some regulatory authorities have categorised these services under mixed load, meaning that lighting and appliances load cannot be separated,
- 2) They provide an essential public utility service on a 24/7 basis and do not deserve to be burdened with commercial tariff.

As the telecom tower installations are spread widely across the state, it is necessary to install AMR meters and issue consolidated billing for all installations belonging to a specific consumer. The Telecom infrastructure takes supply at 11KV at most of the places and provides a step-down transformer, though the required load is only 15 - 20 KW, and saves the burden of extending LT supply to the telecom provider.

Response of the Petitioner:

HT Supply: The petitioner has submitted that, in HT category supply, there is only one applicable tariff category, i.e. HTP-I, for such consumers and this tariff is applied.

Consumers supplied at higher voltages have a better quality of supply than consumer

categories like agricultural. They need to pay more so that cross-subsidy can be paid to needy classes of consumers.

LT Supply: Telecom service is a service industry. No manufacturing is involved. As per the present tariff structure, in case of utilisation of non-motive power load by non-residential consumers, the applicable tariffs are LFD-II and LFD-III.

The proposed tariffs for various categories are within a band of +/- 20% and are as per the average cost of supply.

Consolidated billing and AMR: The general conditions of tariff schedule lay down that each of the tariffs apply only within the compact area of the premises not intervened by any area / road belonging to any person or authority, other than the consumer. As the spread of the telecom towers is not in accordance with this condition, it is not possible to give a single consumer treatment to all such installations. Further, the various installations may fall under the jurisdiction of separate billing authorities and billing dates may differ. It is difficult to prepare a consolidated billing. However, the consumer is allowed a consolidated payment of all his connections at one location, i.e., the corporate office of the petitioner. Alternatively, the consumer can opt for advance payment as per provisions of Security Deposit Regulations. As regards AMR facility, it is provided to H.T. consumers and High value L.T. consumers only.

Commission's View: *The issue of application of motive power tariffs or a separate tariff for telecom installations has to be viewed in the larger context of a comprehensive review of the tariff structure.*

In the limited context of this tariff petition and Order, the Commission tried to fix the tariff equitably to all the categories as per the existing ground realities and provision of the Act.

18. HP based Tariff

Objection: Some of the stakeholders have suggested that the HP based tariff should be reduced from Rs 140/BHP/month to Rs 65/BHP/Month

Response of the Petitioner: The petitioner has submitted that the tariff to various categories of consumers is within the band of $\pm 20\%$ over the average cost of supply, in accordance with the Tariff Policy.

Commission's View: *The objection and the response have been noted. The tariff for agriculture is subsidised by the State Government.*

19. Simpler Tariffs needed

Objection: Some of the stakeholders have stated that, for formulating simpler tariffs, the existing laws bind the Commission to differentiate between consumers only according to:

- Consumer's load factor or power factor,
- Consumer's total consumption of energy during any specific period, and
- Time at which supply is required

Unjustifiably Complex tariffs will only lead to harassment of the consumers.

Response of the Petitioner: The petitioner has submitted that the Tariff Policy mentions the need to have a rationalisation of tariff to various consumer categories, such that tariffs are nearer to the cost of supply within a band of $\pm 20\%$ over the average cost of supply, Even in effecting this, there are limitations.

While Industrial and Commercial consumers get good quality of supply all through the day including the peak hours, the agricultural category gets only a limited hours of supply and that too during off peak periods. Besides this, socio-economic considerations, relating to certain categories of consumers, cannot be ignored

Commission's View: *The objection and response are noted. The consumers are broadly categorised based on end use and tariffs are determined accordingly.*

20. Applicability of HTP-III Tariffs

Objection: Some of the stakeholders have pointed out that the HTP III tariff is for supply of not less than 100 KVA for temporary periods. A consumer not taking supply on regular basis under a proper agreement should be deemed to be taking supply temporarily.

If a HT consumer is found to be using load not authorised, HTP III tariff is applied to the proportionate units and demand, even if the consumer belongs to HTPI or II categories. For example, a welding transformer is normally rated 20/25 KVA. It may not establish a demand even 5 KVA, but application of demand charges of HTP-III results in demand charges of Rs 92400, because the minimum billing demand is 100 KVA in HTP-III. The offending load is not treated as part of the agreement and utility goes beyond the agreement and invokes HTP-III. A clarification that the extraneous HTP-III rate is not applicable in such cases may be issued.

In case of consumers governed by contracted load tariff, even if contracted load does not exceed the contracted demand, the penalty is imposed. The operating guidelines are harsh and loaded against consumers.

Response of the Petitioner: The petitioner has submitted that the objection is not clear. Illustrative Annexure, stated to be enclosed, is not found. The provisions of “unauthorized use of energy” are applied only in cases where Section 126 of EA, 2003 is attracted.

Commission’s View: *The objector is advised to take up the issue with the petitioner and explain the grievance.*

21. Night concessional tariff

Objection: Some stakeholders have raised the issue of night concessional tariff. The night concessional tariff should not have any demand charge. Night-time demand is low. Infrastructure is not loaded much. The fixed cost relates to peak cost only. The licensee cannot gainsay that infrastructure cost is the same for night-time consumers and other normal users. M/s Feed Back Ventures have made a costing for the POC assignment. It needs to be referred in this regard. The multiplier between peak and off Peak cost amounts to 7 to 8.

Response of the Petitioner: The petitioner has submitted that the fixed charges are levied on consumers to recover the company’s fixed costs, which the company incurs, irrespective of consumption and time of consumption. The fixed charges cover components, like the cost of infrastructure, employee cost, R & M cost, A&G cost, etc. Any kind of discrimination among tariff categories would lead to passing on the

burden to the other tariff categories. It is not appropriate to have different fixed charges for consumers of the same category.

Commission's View: *It is true that night time consumers facilitate the reduction of peak demand, by shifting their demand to off peak period. They allow the base load equipment to be loaded optimally. But the fixed charges loaded at present in the tariff are only a fraction of the fixed costs*

22. LFD-II (b) not justified

Objection: Some stakeholders have resisted the move to divide LFD-II Category into (a) and (b). No reasons or justification has been provided by the petitioner for the proposal.

Response of the Petitioner: The petitioner has submitted that the purpose is for better DSM of commercial consumers. LFD II (b) is for big commercial consumers like super bazars, malls, hotels, etc. it is a demand-based tariff, aimed at promoting grid discipline.

Commission's View: *The objection and response are noted.*

23. LTP- I & III

Objection: Some stakeholders have pointed out that there is a move for a separate category for LTP-III and LTP-I consumers. An industrialist, who installs a temporary machinery to execute a single contract, will be put to difficulty. In case of violation of LTP-III tariff, a chance should be given to him to explain the reason and then only action taken.

Response of the Petitioner: The petitioner has submitted that LTP-I is a connected load based tariff and LTP –III is a demand based tariff. It is proposed that an LTP – I consumer can switch over to LTP – III tariff, if he desires.

Often, motive power consumers contract larger demand under LTP –I and later switch over to LTP –III. The infrastructure created according to LTP- I category remains unutilized and non-remunerative

In case of violation on three occasions during the period of six months by LTP – III

consumers, they have to switch over to HT supply.

Commission's View: *The objection and response of the utility are noted and appropriate decision is taken.*

24. Time of Use (TOU) charges

Objection: Some of the stakeholders have raised the point that the time of use charges on all HT consumers are unreasonable, especially extending it to below 500 KVA consumers. The power supply position is comfortable. Existing meters do not have a provision to meter the use with regard to time.

Response of the Petitioner: The petitioner has submitted that it is the intent of the petitioner to apply TOD rates on as many consumer categories as possible. Cost of power supply at peak hours is high. TOU takes care of this. There is another category of night supply with lesser energy charges. This is intended to ease the burden on the grid.

The night hours concession is given only if the night consumption is in excess of 1/3 of the total consumption in the month.

Commission's View: *The peak hour penalties and the night use concessions are the two faces of the same structure, the licensee should ensure that the meters are capable of registering the TOU. Appropriate decision taken on the applicability to all HT consumers.*

25. Need for one single Maximum Demand (MD) based tariffs

Objection: Some stakeholders have suggested that there should be only one single MD based tariff LTP-I for all LT industrial consumers. Below 150 HP, the tariff should encompass both lighting and motive load requirements. This will obviate the need for LTP-II meters, and reduce the scope for corruption. There could be a capping on the connected load, say, 3 to 4 kW for a 1 KWMD.

Response of the petitioner: The petitioner has submitted that the MD based tariff, with capping on connected load, may have overlapping effect on other tariff categories.

Commission's View: *The objection and the response are noted.*

26. Single LFD-II tariff for all commercial consumers

Objection: Some stakeholders have suggested that there should be only a single and uniform rate tariff LFD II for all commercial establishments. All LFD II meters should be 3 phase 4 wire and electronic.

Response of the Petitioner: The petitioner has submitted that LFD II is for single-phase supply (total load up to 6 KW). The petitioner has proposed to create two categories: LFD II (a) and LFD II (b); LFD II (a) for loads up to 15 kw and LFD II (b) for loads of 15 kw and above. For better DSM, demand charges are proposed for demand of 15 kw and above.

Commission's View: *The objection and response are noted.*

27. Railway traction tariff

Objection: The representative of railways has suggested that there is an imperative need for reasonable railway traction tariff.

Response of the Petitioner: The petitioner has submitted that the tariffs for traction have been stable for last eight years. Factors, like sharply increasing power purchase cost due to increase in coal and gas costs, cannot be passed on to the consumers in full to all consumers through FPPPA.

The depreciation and interest cost are also on increase due to increased asset base and high interest rates. The need of cross subsidisation of certain categories also necessitates a rise in tariff for some categories. The tariff for railway is within 20% of the average cost of supply, as per Tariff Policy..

Commission's View: *The objection and response are noted.*

28. Simultaneous Maximum Demand (MD) for Railways

Objection: The representative of railways has pleaded that railways is a moving load and register MD at all substations. Temporarily, demand may shoot up in particular sub-station, due to abnormal conditions like bunching of trains.

The tariff should be a single part tariff. If not, demand charges should be based on simultaneous M.D.

Response of the Petitioner: The petitioner has submitted that, for motive power consumers, two-part tariff is the universal norm. Distribution investments are triggered by local demands. Hence, the present system of levying the demand charges at individual traffic substation is the most appropriate basis for recovery of demand charges.

Commission's View: *Objection and response are noted.*

29. Quality of supply to Agriculture

Objections: Some of the stakeholders have submitted that the duration and quality of supply to Agriculture has worsened even while realisation per unit has been increasing.

Response of the Petitioner: The petitioner has submitted that a minimum of 8 hours of 3-phase supply is being given to agricultural sector. Depending on crop needs, more hours supply is also being given, even by purchasing power from various sources. In case of a shortfall in supply due to critical supply conditions, the same is compensated when conditions improve. The policy of Government of Gujarat is for uniform supply to agriculture across the DISCOMs. As agricultural connections are un-metered, the energy is assessed on the basis of 1700 units/HP/Annum

Commission's View: *The DISCOMs should ensure the stipulated hours of supply to the agricultural sector.*

30. Golden goals project

Objection: Some of the stakeholders have suggested that, to assess the achievements under the golden goals project, a copy of the scheme and the achievements thereunder may be furnished.

Response of the Petitioner: The petitioner has submitted that achievements under the different schemes have been shown in the petition. As informed at the hearing of ARR FY 2008-09, the goals for release of agricultural connections, planned under the golden goals, were later dropped. The targets for release are now based on the capital expenditure plan for the year.

Commission's View: *- The objection and the response are noted.*

31. Group Tariff for Agriculture

Objection: It is suggested by some of the stakeholders to introduce a special sub-category and / or grant relief to the farmers, who accept metered tariff in a group catered by a particular feeder, at concession of 10 Ps./unit consumption, for a period of minimum 3 years.

Response of the Petitioner: No Response

Commission's View: *The distribution company is directed to examine whether such tariff can be implemented.*

32. Concessional Tariff for Micro-irrigation

Objection: Some of the stakeholders have suggested that there is a need for a concessional tariff for individual farmers adopting Micro-Irrigation Systems.

Response of the Petitioner: The petitioner has submitted that applications for connections under such schemes have been accorded priority.

Commission's View: *The suggestion relates to a special tariff from a greater national perspective of optimising water use and is desirable. Such concessions can be extended, provided the government is willing to bear the cost of the subsidy.*

33. Tatkai Scheme

Objection: Some of the stakeholders have suggested that the Tatkai scheme be abolished.

Response of the Petitioner: It is submitted that the Objector's Petition No. 1087/2011 in this regard and on Dark Zone was disposed of by the Commission.

Commission's View: *The objection and the response are noted. The Commission has issued an order on 30.05.2011 in respect of the Petition No.1087/2011.*

34. Water for Brick manufacturers

Objection: Some of the stakeholders have objected to supplying of water to brick manufacturing units, under the head of agriculture category. Supply should only be for irrigation purpose.

Response of the Petitioner: The petitioner has submitted that the supply to Brick manufacturers by Agriculture consumers is an optional facility, and is not compulsory.

Commission's View: *The objection and the response are noted.*

35. Details of bad debts

Objection: Some of the stakeholders have petitioned that no efforts are made by the petitioner to recover the bad debts and the details of bad debts requiring write off may be furnished.

Response of the Petitioner: The petitioner has submitted that every year, a certain amount due from some consumers, which seems to be non-recoverable, is waived off and is charged in the profit and loss account of the company for the year under the head of other debts. A statement regarding defaulting consumers with arrears over Rs. 1 Lakh is furnished.

Commission view: *The petitioner needs to ensure that the outstanding dues are collected quickly and do not accumulate. It is necessary to see that all possible steps are taken to minimise bad debts, which need to be written off.*

36. Revenue gap affordable for FY 2011-12

Objection: Some of the stakeholders have pointed out that the gap of Rs.1322 crores of all Discoms for 2011-12 can be eliminated by better performance.

Response of the Petitioner: The petitioner has submitted that the gap is significant and cannot be absorbed. Even after the increase, some gap remains. Expenses under various heads and the revenues are estimated, as per the ruling regulation and with prudence. Gap is normally due to increase in power purchase cost, employee cost and interest on working capital.

Commission's View: *The objection and response are noted. The Commission has examined the proposal for tariff increase and taken an appropriate decision in determining the tariffs.*

37. Receivable amount

Objection: Some of the stakeholders have pointed out that electricity billing is done much later than it is supplied. All the expenses relating to the supply are incurred and accounted at the end of financial year, but some unbilled amount remains to be accounted. This amount is not covered in annual audit reports and is not reflected in the ARR. Such amount is far more than the ARR gap.

The amount of receivables is far more than the total gap. Provision for sundry debtors has been made in schedule of the Annual Audited Accounts, but the same is not shown in the ARRs.

Response of the Petitioner: The petitioner has submitted that he prepares the financial statements on historical basis, in accordance with the accounting standards and generally acceptable accounting principles. Revenue from sale of power is recognised on accrual basis of energy supplied to consumers. The revenue from sale of power, indicated in the petition, includes provision for unbilled revenue.

Commission's View: *The objection and the response are noted.*

38. Mismatch between Annual Accounts and ARR

Objection: Some of the stakeholders have pointed out that the comparison of the audited annual accounts of 2009-10 and ARR shows a mismatch in respect of revenue from sale of power.

Response of the Petitioner: The petitioner has submitted that the income figures, shown in the P&L Accounts for FY 2009-10, include total income, i.e., revenue from sale of power, subsidy, grants, other income, etc. Table 6 of the petition shows revenue from sale of power from different categories of consumers. This can be verified from Schedule 14 attached to Annual Accounts for 2009-10.

Commission's View: *The objection and the response are noted.*

39. Consumer Contribution and Depreciation

Objection: Some of the stakeholders have stated that the capital works of the petitioner are made up of the recovery of full line cost from consumers and grants

from the Government and other agencies, amounting to 50% of the cost of capital works. So, half the depreciation claimed must be shown as income.

Response of the Petitioner: The petitioner has submitted that in Table -13 of the petition, the total capitalisation to fixed assets and the consumers' contribution have been shown.

The charging of depreciation on total assets is as per the accounting standards. Every year, the petitioner writes back certain part of consumers' contribution and grants on a consistent basis. Therefore, the appropriate effect to consumer's contribution is given weightage. Depreciation is charged on gross value of assets.

Commission's View: *The accounting of consumer's contribution and the depreciation has been treated as per the Regulations of the Commission.*

40. Interest on Security Deposit (SD) and working capital

Objection: Some of the stakeholders have submitted that the interest payable on security deposit is accounted at 6%. S.D forms a part of working capital. But full 10.25% interest is accounted in the balance sheet for the entire working capital requirements.

Response of the Petitioner: Interest on security deposit is as per provisions of the Security Deposit Regulations. The working capital requirement and interest thereon are calculated as per the terms and conditions of Tariff Regulations.

Commission View: *The interest on working capital and interest on Security Deposit are allowed as per relevant GERC Regulations.*

41. Differential Bulk Supply Tariff (BST) not fair

Objection: Some of the stakeholders have averred that BST is acting in contravention to the provisions of Electricity Act, 2003. The GUVNL is charging more from some DISCOMs to subsidise other DISCOMs. The PGVCL is supplying power at lower rate than UGVCL, whose agricultural consumption is higher than that of PGVCL. This implies that PGVCL is a sick utility. The rates for MGCVL and DGCVL are higher than those of UGVCL and PGVCL.

Response of the Petitioner: The petitioner has submitted that the four DISCOMs are configured on a Zonal basis. About 70 to 80% of a DISCOM's costs are for power purchase. Power purchase cost plays a major role in the ARR of a DISCOM. The consumer profiles and consumption profiles differ from DISCOM to DISCOM; so also their revenue earning capabilities. It is necessary to build a mechanism in the projections to bring them onto a level playing field. This is sought to be achieved through the differential bulk supply tariff mechanism. This is considered necessary to keep the retail tariff of the four DISCOMs uniform. The performance of the DISCOMs is monitored by the GERC.

Commission's View: *Differential BST may be necessary to keep the retail tariffs uniform across the state for some more time till the consumer mix in all the DISCOMs are at a comparative level.*

42. Agricultural Subsidy not fully met by Government

Objection: Some of the stakeholders have represented that the Agriculture Subsidy is not met in full by the Government. Consumers, other than agricultural, bear the brunt.

Response of the Petitioner: The petitioner has submitted that the tariff for all categories of consumers is well within +/-20% over the average cost of supply and is in line with the Tariff Policy. Industrial and Commercial categories of consumers are provided a better quality of supply. They are supplied power even during peak hours. So they are charged at a higher rate than the agriculture consumers, who are supplied only 8 hours of power a day and are not supplied power during peak hours.

Socio economic conditions of certain classes of consumers prevent radical rationalisation of tariffs.

Commission's View: *The objection and the response are noted. The State Government is paying substantial subsidy to the distribution companies towards agriculture.*

43. Arrears of revenue

Objection: Some stakeholders have suggested that the Commission may review the arrears of the various DISCOMs to reduce the extent of disparity of BST in the DISCOMs.

Response of the Petitioner: The petitioner has submitted that the amount of the arrears is not an ARR item, as arrears are not revenue. Revenue is recognised once assessment is made and bill is raised. If payment is not made by consumer, the amount is in arrears and cannot be adopted to revenue. It is a balance sheet item.

The cost implication of arrears is considered in the ARR calculation, i.e., delayed payment charges collected from defaulting consumers are accounted for in Non-Tariff Income as Delayed Payment Charges. Interest on working capital, in respect of receivables and arrears, is also accounted. Hence, income and expenditure aspects of arrears have already been accounted for in the computation of the ARR. The petitioners are making all efforts to reduce the arrears.

Commission's View: *The objection and the response are noted.*

44. Performance should determine the allowability of Expenses:-

Objection: Some of the stakeholders have queried whether the accounts of the petitioner are sacrosanct. Factors, like performance of the company and also whether the consumers' interest was properly served in the expenditure incurred, have also to be considered in determining the propriety of the expenses qualifying for tariff determination. The accounts of the company are not ipso-facto binding on the Commission in this regard.

Similarly, the Commission needs to examine the question of applicability or admissibility of reasonable return as per the Regulations vis-à-vis the efficiency, economical use of the resources, good performance and the interest of the consumer .You earn only if you deliver, is the new paradigm..

Response of the Petitioner: The petitioner has submitted that audited annual accounts upto FY 2009-10 have already been submitted to the Commission.

Commission's View: *The Commission allows the expenses on prudence check. The performance is also taken into consideration, while determining the tariffs.*

45. Sneering attitude towards consumers

Objection: Some of the stakeholders have stated that the attitude of the utilities is to dismiss the objections of the stakeholders with contempt sneering and a patronising attitude.

Response of the Petitioner: No comments made

Commission View: *The commission hopes that the licensee will take sincere steps to alter the perception of the objectors towards the licensee.*

46. Poor Voltage Conditions

Objection: Some stakeholders have complained that, under prevalent conditions of low voltage, the motors have to be rated for a higher capacity to deliver the power required by the consumer. Agricultural consumers are penalised heavily for exceeding the load, based on the nameplate rating of the motor even though the motor delivers a far lesser quantity of water than what the nameplate shows. So, fixed charges should not be applied under low voltage conditions, or appropriate correction for low voltage should be applied.

At the tail end of feeders, there should be no inspection and penalisation on the capacity of the motor or some other such mechanism needs to be put in place to avoid hardship to consumer.

Response of the Petitioner: The petitioner has submitted that agricultural feeders have been separated from other rural feeders. Further, with increase in generation capacity, the voltage conditions have improved considerably. As the pump sets are of submersible type, nameplate reading cannot be seen. Hence, for verifying connected load, actual technical parameters are measured with an accucheck meter. If measured capacity is more than contracted value, action is taken under Section 126 of EA, 2003.

Commission's View: *The objection and response are noted. The licensee needs to avoid low voltage at the tail end feeders through proper reactive power management, etc., so that consumer may not face the situation mentioned.*

47. Penal charging on FPPPA amounts to over-compensation

Objection: Some stakeholders have contended that FPPPA is a pass through charge. It is not fair or legal to overcharge at double the same under Section 126 or 136 of EA, 2003.

Response of the Petitioner: The petitioner has submitted that FPPPA is an integral part of tariff and, therefore, while assessing bills under Sections 126 or 136 of EA, 2003, applicable FPPPA charges are applied.

Commission's View: *The Objection and the response are noted.*

48. Power Factor (PF) Penalty to be levied on recorded demand

Objection: Some of the stakeholders have suggested that the power factor penalty should be on recorded demand, and not on billing demand. Otherwise, it will impose undue burden on the CPP consumer.

Response of the Petitioner: The petitioner has submitted that power factor penalty/ rebate is levied on energy charges only.

Commission's View: *The objection and the response are noted.*

49. Electronic meters are suspect

Objection: Some of the stakeholders have complained that the electronic meters are suspect. The software can be doctored. The Commission may pick-up random samples and get them checked for conformance to specifications to ensure public trust in the metering process.

Response of the Petitioner: The petitioner has submitted that meters are supplied, as per specification / contract conditions, issued under the provisions of relevant Indian Standards. No oral specification is conveyed to any of the suppliers.

Commission's View: *The apprehension of the objector and the response of the petitioner are noted. If any specific instance of malfeasance comes to light, the meters could be got tested. Electronic meters are being used by all the utilities.*

50. Assessment of 'proportional units'

Objection: Some of the stakeholders have mentioned that the consumer is harassed by the expression "proportionate units" at para 10 (II) in Supply Amendment dated 25th September, 2006. This amount is driving SMEs to their doom. Pulse loads like a welding transformer are equated with production machinery which runs 24x7 and the proportionality expression is applied and lakhs of rupees are billed, which could be only a few hundreds normally.

Response of the Petitioner: The petitioner has submitted that under the connected load based tariff, "Consumers can connect as many loads as contracted". However, in case, where units consumed are duly metered, no additional units are worked out, either as per ABCD formula, or on proportionate basis.

Assessment on the basis of proportionate units is carried out only when the units consumed are duly metered and the connection is found to be utilised otherwise than for authorized purpose or at an unauthorized place.

Commission's View: *The objection and the response of the petition are noted.*

51. Security deposit is very high

Objection: Some of the stakeholders have stated that the load factor assessed for levying security deposit is unwarranted, since high load factor materialises only after operations are stabilised. Thus, it increases starting up costs steeply. A 400 volts consumer has to pay up charges extending up to 11 KV facilities and also of GETCO, based unconvincing interpretation of "works carried out on behalf of DISCOMS"

Response of the Petitioner: The petitioner has submitted that security deposit levy is as per the provisions of the S.D Regulations, notified by the Commission.

Commission's View: *The objection and the response are noted. The security deposit has to be collected as per the applicable Regulation.*

52. Industrial activity treated as commercial

Objection: some stakeholders have raised the issue that a number of industrial activities like lasers and diamond cutting, etc., and even ACs in process industries, are being termed as commercial and charged accordingly on the plea that there is no

motive power involved, though they use motive power. It is necessary that the term 'motive power' be substituted by the term 'industrial power' to avoid legal disputes.

Industrial consumers are forced to wire their premises for industrial and lighting circuits separately, leading to wastage of capital. There should be one rate for one premise. The rate could be a weighted average cost of lighting and motive power.

Response of the Petitioner: No comment made.

Commission's View: *This issue has been addressed by the Commission while rationalizing the tariff structure in this order.*

53. Unwarranted penal action

Objection: Some stakeholders have stated that Supply Code may incorporate a provision that, if any penal action is contemplated for use of premises for a category of use other than originally authorised, such an action should arise only if such use is for a purpose for which higher tariff is applicable.

Response of the Petitioner: No response

Commission's View: *The petitioner may submit his views on the issue raised by the objector separately.*

54. New applications and feasibility

Objection: Some stakeholders have stated that loads are not being released, on the plea of inadequate transformer capacity. The capacity of the transformer to cater to additional connections should be based on the demand registered on the transformer rather than the extent of connected load.

Response of the Petitioner: The petitioner has submitted that, under the connected load based tariff system, a consumer can connect as many loads as contracted and may put on the entire load at his choice. So connected load is taken into view to determine the feasibility of additional loading in the case of LT application. For HT, the actual maximum load recorded is taken into consideration. Diversity reduces as we go down the network.

Commission's View: *The petitioner should not deny any consumer for lack of capacity of distribution transformers. Transformer capacity has to be enhanced.*

55. GUVNL accounts need scrutiny

Objection: Some stakeholders have raised the issue that the burden of the administrative expenses or trading margin of GUVNL is passed on to the DISCOMs as administrative and management cost. They need regulatory scrutiny.

Response of the Petitioner: The petitioner has submitted that the servicing of the various liabilities allocated to GUVNL at the time of unbundling and administrative cost of managing power purchases and funds portfolio is charged to DISCOMs as margin in the power sale rate.

Commission's View: *The objection and responses are noted. The Commission scrutinizes the GUVNL costs.*

56. Bank Guarantee as security deposit

Objection: Some of the stakeholders have complained that utilities are refusing to accept bank guaranties as security deposit. They also delay the refund of the Security Deposits (SD). While consumers are dealt with a heavy hand for any default, the defaults of the utility go unpunished. Consumers are kept in the dark about the provisions regarding deposits. The estimates are hazy. Refunds are not made in cash, but adjusted in future bills and the issue drags on for more than six months. The interest on S.D should be checked for accuracy to avoid undue enhancement in tariff.

As per GERC notification 5 of 2010 and GERC Security Deposit Regulations notification No. 8 of 2005, security deposit is acceptable as B.G from consumers having contract demand of one MVA and above.

Response of the Petitioner: Annual review is made and if the security deposit is found in excess, it is adjusted in future bills.

In the case of Open Access or CPP consumers, any excess S.D is adjusted in future bills upto six months and if any further residual S.D is there, it is refunded. Existing security deposit is shown in the energy bill.

Commission's View: *Bank guarantee should be accepted for demand of one MVA and above.*

57. Deposit works and final bills

Objection: Some stakeholders have complained that there are inordinate delays in completion of deposit works and in settling the final bills, causing loss to the consumers. A deterrent penal interest needs to be imposed on licensees to curb such delays, or interest income notional or income on delayed deposits should be accounted in ARR.

Response of the petitioner: The petitioner has submitted that, generally, there is some delay in collecting the information on actual material used and labour deployed in finalisation of such bills. The matter was discussed in the 10th Electricity Supply Code Review Panel (ESCRP) and it was decided that such bills should be finalised within 120 days from the date of release of the connection.

Commission's View: *The licensee should see that accounts are settled promptly on completion of works and any amount due is refunded without delay. Any delay will have to be viewed seriously.*

58. Adhesion agreement illegal

Objection: Some of the stakeholders have stated that GERC order No.6 of 2010, on Open Access is being nullified by the utilities by getting an adhesion undertaking signed by the consumers. This bipartite undertaking lacks the Commission's approval/scrutiny and is a breach of law.

Response of the Petitioner: The petitioner has submitted that Commercial settlement of Open Access users, who are also consumers of the DISCOM, is made under the Intrastate ABT order No.3 of 2006. Any excess drawal is taken as supplied by the DISCOM and billed as per applicable tariff.

The Intra-State ABT Order No. 10 and Open Access Regulations, 2011 do not provide applicability of UI rates to Open Access consumers who are also Consumers of the DISCOM for excess/under drawal. There is no mechanism under the State ABT for any intra DISCOM. UI pool account to enable payment/receipt of UI charges to/from the consumers.

As regards the undertaking sought by DISCOMs from consumers availing power through short-term Open Access, it is necessary for the DISCOMs to take care of

situations wherein such consumers take supply from DISCOM during the day and then for night supply they go outside, where they can get cheaper power.

Commission's View: *The objection and the response are noted. The licensees and the Open Access consumers should be fair towards each other.*

59. Selective application of judgements

Objection: Some of the stakeholders have submitted that the judgements of APTEL are applied in a limited way, even when there is a general scope for application for benefit to the larger number of consumers who may not have chosen to go to the Tribunal.

Response of the Petitioner:- The petitioner has submitted that orders of any judicial Fora are either accepted or challenged, based on merit. If the accepted judgement is general in nature, it is implemented.

Commission's View: *The objection and response are noted.*

60. Category-wise, voltage-wise cost-to-serve

Objection: Some stakeholders have pointed out that Section 61 of EA, 2003 is not recognized. Category-wise and voltage level-wise cost- to- serve and the progress in respect of reducing cross subsidisation are not reported. It is not enough to consider pooled or average cost of supply. Irrespective of adoption of tariff, the Commission is requested to call for this information.

Response of the Petitioner: The petitioner has submitted that cost-to-serve report for 2009 -10 is under preparation and will be submitted very soon.

The National Tariff Policy mentions the need for rationalisation of category-wise tariffs, such that it does not cross +/- 20% over the average cost of supply. But even in this, there are practical and socio-economic difficulties. However, the proposed tariff for all categories is within the limit of NTP. The deficiencies in quality of supply justify category -wise differentials in tariffs.

Commission's View: *The petitioner should expedite the COS study. There needs to be a progressive shift in reduction in cross subsidy.*

61. Connectivity to open access customers

Objection: Some stakeholders have pointed out that the connectivity conditions from EPP / SPV / MPP and co-generation plants are hazy, leading to delays and inconvenience. Tariffs for such consumers should not be exorbitant, but based on cost of service.

Response of the Petitioner: Regulation of Intra-State Open Access Notification No. 3 of 2011 govern the connectivity to open access customers.

Commission's View: *The objection and response are noted.*

62. HTP-IV tariff is inconsistent and irrational

Objection: Some of the stakeholders have submitted that HTP IV tariff needs to be actively promoted. The percentage increase for HTP IV proposed is much higher than that proposed for all other categories. The permissible daytime drawals for maintenance should be raised to 25% of contract demand and 20% of consumption. Tariff should not be fixed on the basis of full fixed cost recovery for night time use in HTP IV & LTP IV tariffs. The penalty for default should be on the basis of the higher cost of power purchases during the relevant slot of the whole day for temporary tariffs.

Response of the Petitioner: the petitioner has submitted that since the energy charge for HTP-IV is low compared to others, some additional increase is proposed. The permissible daytime demand cannot be increased further. Fixed charges need to be recovered in full, as otherwise, it will amount to discrimination against other consumers within the same class.

Commission's View: *The objector's view is noted. The Commission has taken various relevant points into consideration and determined an equitable and balanced tariff.*

63. Tariff hike only for non-agricultural and other than BPL categories is not fair

Objection: Some of the stakeholders have pointed out that BPL and agricultural consumers are not considered for tariff hike. This is not proper unless the Government pays upfront subsidy. This is not fair to other consumers. The level of cross subsidisation is increasing.

Response of the Petitioner: The petitioner has submitted that agricultural subsidy is fixed at Rs.1100 crore by the State Government and is distributed among DISCOMs, in proportion to the unmetered category consumers.

Commission's View: *The objection and the response are noted. Apart from cost-to-serve there are many factors that need to be kept in view in Tariff determination, to the extent feasible. Cross-subsidy, to support certain class of people, is a common practice.*

64. Over-spending by DISCOMs

Objection: Some of the stakeholders have stated that the truing up shows over-spending by DISCOMs during 2009-10. Despite recovery of FPPPA, the gap of all the DISCOMs amounts to Rs. 309 crore and should not be allowed.

Response of the Petitioner: The petitioner has submitted that the revenue gap is arrived at, following the process of sharing mechanism, allowing recovery in FY 2011-12. Revenue shown in truing is inclusive of FPPPA charges.

The FPPPA formula does not cover power purchase from other sources.

Commission View: *The objection and the response are noted. The Commission has considered the increase in costs after prudence check of the expenses.*

65. Revision of FPPPA at 61 Ps/unit

Objection: Some stakeholders have pointed out that, in the ARR for the 2nd control period, strangely the petitioners have taken 61ps/unit as confirmed FPPPA charges for revision of tariff. FPPPA is variable and cannot be linked to tariff in this manner.

Response of the Petitioner: The petitioner has submitted that actually, the average FPPPA for 2009-10 was 61 paisa. It is proposed to shift the base year for calculation of FPPPA to Financial Year 2009-10.

Commission's View: *The FPPPA of 61 Ps/unit is what is being collected and is considered as a part of present revenue.*

66. Release of agricultural connections

Objection: Some stakeholders have stated that there is no data of the extent of un-metered agricultural connections. 2.80 lakh farmers are waiting since 1994 for connection. Illegal connections are provided by DISCOM staff under the pretext of farm houses. There should be a time bound programme over 5 years to release all pending connections.

Response of the Petitioner: The petitioner has submitted that it is difficult to get data of the proportion of unmetered connections, because there are connections that have meters but are charged under un-metered category. All new connections are metered, 4000 new connections are being released every year since 2007-08, and are all under metered tariff.

The Company has planned to release 4000-6000 agricultural connections per year in the ensuing control period.

Commission's View: *The utilities are directed to clear all pending applications at the earliest.*

67. Tariff hike across the board unfair to smaller consumers

Objection: A number of stakeholders have objected to the tariff increase. It is stated that increase in tariff by 25 Ps/unit in all categories, except agriculture and BPL, is irrational and is a heavy burden on consumers with consumption of less than 100 units/month and is against the NTP and beyond the paying capacity of consumers.

Response of the Petitioner: The petitioner has submitted that for the past several years, the tariff increases allowed are minimal. The intention in uniform hike of 25 Ps/unit is to reduce the cross-subsidy within the same category and maintain overall cross-subsidy level intact.

Commission's View: *The Commission has endeavoured to allow a reasonable and balanced tariff in this order keeping in view practical and operational aspects and constraints.*

68. Consumer forums

Objection: Some of the stakeholders have mentioned that the performance of Consumer Forums and the Ombudsman is biased towards the licensees. The petitioners have not taken action to appoint a Chairman.

Response of the Petitioner: The petitioner has submitted that the Consumer Grievance Redressal Forum gives due hearing to the grievances and they are redressed fairly. The Forum is being reconstituted by seeking applications through a public notice for the appointment of the chairperson.

Commission's View: *The utilities are directed to appoint members and chairman on priority, as per guidelines issued by Ministry of Power, Government of India.*

69. L&T meters

Objection: some of the stakeholders have complained that the appearance of code number in L&T meters for industrial consumers is treated under Section 135 of EA, 2003 and huge amounts are extorted from the consumers.

Response of the Petitioner: It is sub-judice; hence, no comment.

Commission's View: *The Commission has noted the objection and the response.*

70. Meter rent

Objection: Some of the stakeholders have complained that the meter charges are collected when the old meters are replaced with new ones. If the cost is recovered so, meter rent cannot be charged.

Response of the Petitioner: The petitioner has submitted that the meter rent is recoverable under the provisions of Licensees Power to Recover Expenditure incurred in Providing Supply and Other Miscellaneous Charges Regulations, 2005. No charges are recovered for replacement of old meters.

Commission's View: *The objection and the response are noted.*

71. Reduction of cross subsidy

Objection: Some of the stakeholders have raised the issue of cross-subsidy. It is stated that the tariff increase is not based on cost-to-serve and the need is to reduce

cross-subsidy. Other classes of consumers are forced to bear the burden of BPL/ agricultural consumers. The agricultural subsidy is capped at Rs.1100/- crores ever since Oct. 2000 and all increases are passed on to other consumers. Details of payment of the subsidy and how much is pending is not known.

Response of the Petitioner: The petitioner has submitted that Cost-to-Serve Report for the Financial Year 2009-10 is under preparation. The tariffs are within the limit of +/- 20% of average cost as per NTP.

Commission's View: *The Commission has noted the objection and the response.*

72. PF penalty to be based on reactive energy

Objection: Some of the stakeholders have suggested that PF penalty/reactive energy charges be computed, based on reactive energy, instead of PF.

Referring to case No. 862/2006 order dated 06/05/2006, page 39 it is observed that charges of reactive energy, levied by GETCO/ SLDC, as well as PGVCL, are based on PF penalty provisions, as per the Tariff Order, without referring to the referred provisions. It is suggested that, for consumers with CPP in parallel, bills and accounting should be done by GETCO/SLDC.

Response of the Petitioner: The petitioner has submitted that CPPs are also consumers of DISCOMs. They export power and also draw reactive energy from the grid. They are billed on average monthly P.F basis, as per HTP tariff. The reactive energy drawn during export is for their plant requirement and, therefore, is governed by the applicable tariff. As regard billing for reactive energy by SLDC, the objector may represent it to the committee formed under the ABT orders.

As regards the suggestion for billing based on reactive energy, instead of P.F, the Regulations stipulate a P.F of 0.9 or more. RKVAH billing will be more complex than this. RKVAH billing may induce consumers to over-compensate. The same rate of RKVAH unit for all RKVAH consumers may not be fair for consumers drawing marginal RKVAH units.

Commission's View: *The issue raised by the objector (s) and response from the utility are noted.*

73. Consumer contribution

Objection: Some stakeholders have stated that all expenses under Normal Development work is 100% recovered from the consumer. There should be no question of any capital amount being booked under this scheme.

Response of the Petitioner: The petitioner has submitted that Table 13, depicting the capital expenditure in the petition, clearly shows the extent of consumer contribution under CAPEX. Against CAPEX of Rs. 654 crore for FY 2009-10, the consumer contribution is Rs. 123 crore (18%).

Commission's View: *The objection and the response are noted.*

74. Sales have reduced, revenue has increased

Objections: Some of the consumers have pointed out that it can be seen from the figures for 2010-11, that the sales of almost all categories have reduced in terms of units, but the revenue has increased.

Response of the Petitioner: It is submitted by the petitioner that the increase in revenue is mainly due to FPPPA. The Commission has approved much less i.e., only 10 Ps/kWh by way of FPPPA, instead of the actual of Rs 67 Ps/kWh.

Commission's View: *The objection and response are noted.*

75. Distribution losses and employee costs are controllable

Objection: Some stakeholders have pointed that the revenue gap for FY 2009-10 has been created mainly due to increase in distribution losses and employee cost, which are described as uncontrollable. This is unacceptable.

Response of the Petitioner: The petitioner has submitted that distribution losses are considered as controllable costs only. So, deviation in power purchase cost, consequent to increase in distribution losses, is absorbed. It is net gap after treatment of gain/loss due to all factors.

Commission's view: *The distribution losses are controllable. Employee cost, in some cases, where payment of wage increases due to pay revision, etc., is*

considered uncontrollable.

76. Load factor and diversity factor need revision

Objection: Some of the stakeholders have suggested that the load factor and diversity Factor in supply code should be revised in the light of energy efficient equipment now available.

Response of the Petitioner: The petitioner has submitted that this issue can be reviewed in the supply code review panel.

Commission's View: *The load factor and diversity factor enable assessment of consumption realistically with regard to the type of industry. There is a need to reassess them. The licensee should come up with a proposal soon.*

77. More than one meter in single premises

Objection: Some stakeholders have suggested that if more than one meter is installed in single premises, the sum of the connected load should be taken as contracted load.

Response of the Petitioner: The petitioner has submitted that the connections are released with specific connected load. If this suggestion is implemented, the consequent variation in load in use by the consumer may affect the revenue of the licensee.

Commission's View: *This requires further examination. This will be considered and appropriate decision taken.*

78. Average cost of supply for HT consumers is not fair

Objection: Some of the stakeholders have pointed out that the methodology adopted in determination of average cost of supply is unfair to a consumer like railways, operating at a very low T & D loss level.

Response of the Petitioner: The petitioner has submitted that the average cost of supply during the year is computed by dividing the ARR of the licensee for recovery through the retail tariff by the total energy sales forecast for the year.

Commission's View: *The objection and response are noted.*

79. PF incentive

Objection: Some of the stakeholders have requested that power factor incentive rate should be restored to 1 %.

Response of the Petitioner: The petitioner has submitted that the rate of 0.5 % was fixed by Commission in Review Petitions 1,2,3 of 2007, filed by Western Railways.

Commission's View: *The objection and response are noted.*

80. Interest cost capital works for agricultural connection

Objection: Some stakeholders have suggested that the Commission should direct the state Government to bear the burden of increased interest cost on account of creating assets for the agricultural sector. This will facilitate reduction of tariffs to other sectors.

Response of the Petitioner: The petitioner has submitted that the Commission may take note of this.

Commission's View: *The Commission directs the petitioner to submit the details of source of funding for agricultural infrastructure.*

81. FCA formula nontransparent

Objection: Some stakeholders have mentioned that the fuel adjustment formula is not transparent and seems dysfunctional. There is a continuous increase in tariff. The abbreviation L.A in the formula is the weighted average of the approved level of T& D losses for the four DISCOMs for a particular quarter.

Response of the Petitioner: The petitioner has submitted that the FCA charges are recovered as per the formula approved by the Commission. The FPPPA is calculated every quarter and the same is posted on the company's website.

Commission's View: *The FPPPA formula has been approved after due process and after detailed deliberation. Any changes can be made after a similar exercise and review. This will be examined.*

82. Fuel cost and tariffs

Objection: Some stakeholders have complained that the tariffs are not reduced in line with the fall in the fuel cost from 134 dollars to 34 dollars. The company has unduly profited from this.

Response of the Petitioner: The petitioner has submitted that the power tariff regime in Gujarat has been fairly stable for several years as increases in costs were absorbed by the petitioners. It is not possible to absorb all the increases in costs. All the basic fuels have witnessed increases all over the world. So, tariff hike, by way of FPPPA, is inevitable.

Commission's View: *The objection and response are noted.*

83. Legal help for consumers

Objection: Some of the stakeholders have requested that there are numerous court cases for or against licensee, due to factors like extractive attitude of the concerned staff and ambiguity of rules or actions of licensee, devoid of legality. There is undue enhancement in cases like:

- (1) Reconnection charges levied without disconnection,
- (2) Payment to GETCO,
- (3) Development charges, and
- (4) Recovery of parallel operation charges etc.

The utilities fight court cases with public money, which cannot be matched by the poor consumers. Legal expenses of licensee need to be checked. GERC should see that consumer guidance legal cells should be formed for presenting consumer cases (as in the case of Karnataka ERC's Consumer Advocacy Cell)

Response of the Petitioner: The petitioner has submitted that reconnection charges are not recovered without disconnection. Parallel Operation Charges (POC) are charged at the rates determined recently by GERC. No 'Development Charges' are levied by petitioner. The issue of payment to GETCO' needs clarification from the objector.

Commission's View: *The suggestion of the objector regarding consumer advocacy cell is noted. It needs detailed consideration. The petitioner needs to be more responsive to consumer difficulties and less litigious.*

84. Meters on distribution transformers

Objection: Some stakeholders have suggested that meters needs to be installed on distribution transformers for energy accounting and to curb theft.

Response of the Petitioner: The petitioner has submitted that 39.94% of agricultural dominated feeders are metered. Also, 50.63% of the distribution transformers, on other feeders, are metered.

Commission's View: *It is not enough that the distribution transformers are metered. The readings need to be correlated with the consolidated record or consumption of the consumers on the transformer and arrive at losses as part of energy audit. A report should be submitted in this regard to the Commission.*

85. No need for tariff hike for DGVCL

Objection: Some stakeholders of DGVCL have submitted that, in the case of DGVCL in 2009-10, the gap was only Rs. 34 crore. In FY 2010-11, the gap was negative at Rs. 371 crore and in 2011-12, the gap has become Rs.310 crore. So, in one year, the total change in revenue gap is Rs.681 crore. This is because of BST and common tariff across the DISCOMs, which is not the objective of EA, 2003.

Response of the Petitioner: The petitioner has submitted that the gap for 2010-11 is a provisional figure. The audited figures are considered for true up purpose. The audited figures for 2009-10 are considered for true up and the arrived gap is purposed to be recovered while determining the tariff for 2011-12. Since the figures for 2010-11 are still un-audited, the gap will be considered, while truing up in the next year.

Commission's View: *The objection and response are noted. The surplus / deficit during FY 2010-11 will be considered, based on the true up for FY 2010-11 and the audited annual accounts and adjusted during FY 2012-13.*

86. DGVCL tariff burdensome to Surat Municipal Corporation

Objection: Some stakeholders of DGVCL have raised that the tariff proposal of

DGVCL imposes a heavy burden on Surat Municipal Corporation which has a basic public need to fulfill. The additional burden on Surat Municipal Corporation will be Rs 1.88 crore per annum.

Tariff may be reduced, or concessional tariff may be provided for water works, sewage, streetlights, etc

Response of the Petitioner: The petitioner has submitted that, even after proposing the increase of 25 Ps/unit, the DISCOMs are not able to recover the total gap. The last tariff hike was in 2008-09. There has been no significant increase in cost since then.

Commission's View: *The objection and the response are noted. All the factors have been taken into consideration while determining the tariffs.*

87. Installation of meters on agricultural services

Objection: Progress of installation of meters to agricultural connections is not satisfactory.

Response of the Petitioner: New agricultural services are with meters only. Consumers under HP tariffs are without meters. During the last five years, the agricultural metered consumption has increased from 335 MU in FY 2008-09 to 351 MU in FY 2010-11.

Commission's View: *The objection and the response are noted.*

88. Non-Implementation of Directives

Objection: Some of the stakeholders have pointed out that several directives are not yet complied with.

Response of the Petitioner: The petitioner has submitted that the status of compliance of the directives is given in the petition.

Commission's View: *This is discussed in the Chapter on "Compliance of Directives". The Commission would ensure that all directives are complied with.*

4. Truing up of FY 2009-10

The Petitioner, in its petition for truing up for FY 2009-10, has furnished the actual energy sales, expenditure and revenue for FY 2009-10, based on the audited annual accounts for FY 2009-10. It is submitted that the truing up for FY 2009-10 is based on the comparison of the actual performance of the FY 2009-10 with the approved revised estimate for FY 2009-10 in the Tariff order dated 31st March 2010 to arrive at the gains / losses.

The Commission has analysed the components of the actual energy sales, expenses, revenue and gains / losses under truing up for FY 2009-10.

The Commission has, however, compared the actuals of FY 2009-10 with the approved ARR for FY 2009-10 in the Order dated 14th December 2009.

4.1 Energy sales

Petitioner's submission

The petitioner has submitted the category-wise actual energy sales for FY 2009-10. The details are given in the Table below:

Table 4.1: Category-wise actual sales for FY 2009-10

Sl. No.	Particulars	Sales (MU)	
		FY 2009-10 (Approved)	FY 2009-10 (Actual)
A	LT Consumers		
1.	Residential	1539	1436
2.	Commercial	532	554
3.	Industrial LT	2464	2563
4.	Public Water Works	95	97
5.	Agriculture	567	570
6.	Public Lighting	30	30
	LT Total (A)	5228	5250
B	HT Consumers		
7.	Industrial HT	3481	3437
8.	Railway Traction	270	272
	HT Total (B)	3751	3709
	Grand Total (A + B)	8979	8959

Subsequently, DGVCL has submitted the break-up of consumption by metered and unmetered agricultural pump sets amounting to 570 MU.

Commission's Analysis

The Commission, in the Tariff order dated 14th December, 2009, had approved the energy sales of 8979 MU for FY 2009-10. In the Tariff order dated 31st March, 2010, the Commission had considered the revised sales also at 8979 MU for FY 2009-10. As against the above, the DGVCL has submitted the actual sales of 8959 MU. The actual energy sales are marginally lower by 20 MU.

The Commission approves the energy sales of 8959 MU as detailed in the Table below:

Table 4.2: Energy sales approved in truing up for FY 2009-10

Sl. No.	Particulars	Approved in the order dated 14 th December, 2009	APR for FY 2009-10	FY 2009-10 (Actual)	Approved for truing up
A	LT Consumers				
1.	Residential	1539	1539	1436	1436
2.	Commercial	532	532	554	554
3.	Industrial LT	2464	2464	2563	2563
4.	Public Water Works	95	95	97	97
5.	Agriculture	567	567	570	570
6.	Public Lighting	30	30	30	30
7.	Temporary supply	0	0	0	0
	LT Total (A)	5228	5228	5250	5250
B	HT Consumers				
8.	Industrial HT	3481	3481	3437	3437
9.	Railway Traction	270	270	272	272
	HT Total (B)	3751	3751	3709	3709
	Grand Total (A + B)	8979	8979	8959	8959

4.2 Distribution losses

Petitioner's submission

The petitioner has submitted that the actual distribution losses for FY 2009-10 are 15.20%, as against the approved level of 14.53% in the revised estimate for FY 2009-10. No reasons have been mentioned for the increase in the distribution losses. It is submitted by the petitioner that as per MYT Regulations, the distribution losses

need to be treated as controllable and any gain or loss has to be dealt with, accordingly, as per provisions of MYT Regulations.

Commission's Analysis

The DGVCL has contended that the actual distribution losses are 15.20% for FY 2009-10, as against 14.53% considered in APR for FY 2009-10 in the order dated 31st March 2010 and 13.45% approved in ARR order dated 14th December 2009.

The Commission approves the distribution losses of 13.45% for FY 2009-10 for truing up of FY 2009-10 as given in the Table below:

Table 4.3: Distribution losses approved for truing up for FY 2009-10

Particulars	Approved in ARR order for FY 2009-10	APR for FY 2009-10	FY 2009-10 (Actual)	Approved for truing up (%)
Distribution losses	13.45	14.53	15.20	13.45

4.3 Energy requirement

Petitioner's submission

Based on the energy sales for FY 2009-10 and the actual distribution losses for FY 2009-10, the petitioner has submitted the energy requirement for FY 2009-10, as given in the table below:

Table 4.4: Energy requirement and Energy balance as submitted by DGVCL for FY 2009-10

Sl. No.	Particulars	Unit	FY 2009-10 (Approved in APR)	FY 2009-10 (Actual)
1.	Energy sales	MU	8979	8959
2.	Distribution losses	MU	1526	1606
		%	14.53	15.20
3.	Energy requirement	MU	10505	10565
4.	Transmission losses	MU	466	548
		%	4.25	4.93
5.	Total energy to be input to transmission system	MU	10971	11113
6.	Pooled losses in PGCIL system	MU	162	153
7.	Total energy requirement	MU	11133	11266

Commission's Analysis

The DGVCL has computed the energy requirement based on the actual distribution losses of 15.20% and actual energy sales of 8959 MU and transmission loss of 4.93%.

The Commission had approved the distribution losses of 13.45% in the order dated 14th December 2009 and in the truing up for FY 2009-10 and the transmission loss of 4.79% in the truing up for FY 2009-10 as arrived by SLDC for FY 2009-10.

The Commission has computed the energy requirement with the distribution loss of 13.45% and transmission loss of 4.12% for FY 2009-10, as given in the Table below: The Table also highlights the **Commission's approval of the energy requirement of 11025 MU for truing up for FY 2009-10**

Table 4.5: Energy requirement approved by the Commission for truing up for FY 2009-10

Sl. No.	Particulars	Unit	Approved in ARR dated 14 th December 2009	Actuals submitted by DGVCL FY 2009-10	Actuals approved FY 2009-10
1.	Energy sales	MU	8848	8959	8959
2.	Distribution losses	MU	1375	1606	1392
		%	13.45	15.20	13.45
3.	Energy requirement	MU	10223	10565	10351
4.	Transmission losses	MU	454	548	521
		%	4.25	4.93	4.79
5.	Total energy to be input to transmission system	MU	10677	11113	10872
6.	Pooled losses in PGCIL system	MU	166	153	153
7.	Total energy requirement	MU	10843	11266	11025

4.4 Power purchase cost

Petitioner's submission

The petitioner has submitted that the company has been allotted share of generation capacities as per the scheme worked out by GUVNL.

During the year, based on the requirement of power, the generation capacities have been allocated to DGVCL. Based on the allocation, if there is surplus power, the distribution company sells the power to other distribution companies. On the other hand, if there is a deficit of power, the same is purchased from other distribution companies.

The DGVCL has submitted the actual power purchase cost during FY 2009-10, along with revised power purchase cost considered in APR for FY 2009-10, as shown below:

Table 4.6: Power purchase cost claimed by DGVCL for FY 2009-10

(Rs. crore)

Particulars	FY 2009-10 (Approved in APR)	FY 2009-10 (Actual)
Total power purchase cost	3996	4049

It is submitted by DGVCL that the variation in the approved cost in APR and the actual power purchase expenses is on account of various reasons. These include, change in cost of power, change in quantum of power purchased, consequent changes in the transmission charges payable and GUVNL cost allocation.

In addition to the above, there is an incidence of higher power purchase cost on account of the higher distribution losses, as compared to the losses approved by the Commission.

It is further submitted that variation in power purchase expenses is due to variation in the cost and quantum and is an uncontrollable factor. Accordingly, any gain or loss on this account is to be entirely passed on to the consumers. However, the increase or reduction in quantum of power purchase and power purchase expense due to variation in distribution loss is a controllable factor; which would result in gain or loss under MYT Regulations and is dealt with accordingly.

Commission's Analysis

The Commission has examined the actual quantum of power purchased and the power purchase cost during the year FY 2009-10, based on the actual energy sales and the distribution losses submitted by DGVCL. The sales and the quantum of power purchase and the power purchase cost are as per the audited annual accounts for the FY 2009-10. The power purchase cost, as per the audited annual accounts for FY 2009-10, is Rs. 4048.68 crore.

The Commission approves the power purchase cost of Rs. 4048.68 crore for FY 2009-10 as per the audited annual accounts.

Table 4.7: Power purchase cost approved by the Commission for truing up for FY 2009-10

Particulars	Approved in ARR order dated 14 th December 2009	Actuals as submitted by DGVCL	Approved for truing up
Total power purchase cost (Rs. crore)	3567.72	4049	4048.68

4.4.1 Gain / (loss) due to distribution losses

The Commission has approved lower distribution loss at 13.45% for FY 2009-10 against the loss of 15.20% claimed by DGVCL.

The total gains / (losses) on account of higher distribution loss are computed in the Table below:

Table 4.8: Gains/(losses) on account of distribution losses for FY 2009-10

Sl. No.	Particulars	Unit	Actuals submitted by DGVCL FY 2009-10	Actuals approved for FY 2009-10 for truing up
1.	Energy sales	MU	8959	8959
2.	Distribution losses	MU	1606	1392
		%	15.20	13.45
3.	Energy requirement	MU	10565	10351
4.	Transmission losses	MU	548	521
		%	4.93	4.79
5.	Total energy to be input to transmission system	MU	11113	10872
6.	Pooled losses in PGCIL system	MU	153	153
7.	Total energy requirement	MU	11266	11025
8.	Gain / (loss) due to distribution losses	MU	(87)	(214)
9.	Average cost of power purchase	Rs./kWh	3.59	3.594
10.	Gain / (loss) due to distribution losses	Rs. crore	(31)	(76.91)

As can be seen from the above, the total loss on account of higher distribution losses is to the tune of Rs. 76.91 crore. The loss is categorised as on account of controllable factors.

Based on the above, the gain / (loss) on account of power purchase expenses is shown below:

Table 4.9: Approved gain / (loss) – power purchase expenses for truing up for FY 2009-10

(Rs. crore)

Particulars	FY 2009-10 approved in ARR dated 14 th December 2009	FY 2009-10 (Actuals)	Gain / (loss) due to controllable factors	Gain / (loss) due to uncontrollable factors
Total power purchase cost	3567.72	4048.68	(76.91)	(404.05)

4.5 Fixed charges

4.5.1 Operation and Maintenance (O&M) expenses for FY 2009-10

The DGVCL has claimed Rs. 192.00 crore towards actual O&M expenses in the truing up for FY 2009-10, as against Rs. 134.00 crore considered in the APR for FY 2009-10. Details are given in the table below:

Table 4.10: O&M expenses claimed in the truing up for FY 2009-10

(Rs. crore)

Sl. No.	Particulars	FY 2009-10 APR	FY 2009-10 (Actual)	Deviation
1.	Employee cost	122.00	174.00	(52.00)
2.	Repairs & Maintenance expenses	31.00	16.00	15.00
3.	Administration & General charges	28.00	31.00	(3.00)
4.	Other debits	1.00	4.00	(3.00)
5.	Extraordinary items	2.00	0.00	(1.00)
6.	Net prior period expenses (Income)	-	5.00	(5.00)
7.	Other expenses capitalized	(48.00)	(39.00)	(10.00)
8.	Total O&M expenses	134.00	192.00	(58.00)

Petitioner's submission

The DGVCL has submitted that the O&M expenses consist of the following elements

- Employee expenses
- Repairs and Maintenance expenses
- Administration and General expenses

The petitioner has also submitted that the following items are included in the O&M expenses as per the directive issued by the Commission:

- Other debits
- Extraordinary items
- Net prior period expense / (income)
- Other expenses capitalised

The DGVCL has compared the O&M expenses actually incurred during FY 2009-10 with the expenses approved by the Commission in the Annual Performance Review (APR) for FY 2009-10 and arrived at a loss of Rs. 58.00 crore, as detailed in the Table below:

Table 4.11: O&M expenses and gains / losses claimed in the truing up for FY 2009-10
(Rs. crore)

Sl. No.	Particulars	FY 2009-10 (APR)	FY 2009-10 (Actual)	Gain (loss) due to controllable factor	Gain (loss) due to uncontrollable factor
1.	Employee cost	122.00	174.00	-	(52.00)
2.	Repairs & Maintenance expenses	31.00	16.00	15.00	-
3.	Administration & General charges	28.00	31.00	(3.00)	-
4.	Other debits	1.00	4.00	-	(3.00)
5.	Extraordinary items	2.00	0.00	-	1.00
6.	Net prior period expenses (Income)	-	5.00	-	(5.00)
7.	Other expenses capitalized	(48.00)	(39.00)	-	(10.00)
8.	Total O&M expenses	134.00	192.00	11.00	(69.00)

The component-wise O&M expenses are discussed in the following paragraphs.

4.5.2 Employee cost

The DGVCL has claimed Rs. 174.00 crore towards actual employee cost in the truing up for FY 2009-10. The employee cost approved for FY 2009-10 in the Tariff order of 14th December 2009, considered in APR for FY 2009-10 and claimed by DGVCL in the truing up are as given in the Table below:

Table 4.12: Employee cost claimed by DGVCL in the truing up for FY 2009-10
(Rs. crore)

Particulars	FY 2009-10		
	Tariff order dated 14 th December 2009	APR order	Claimed in truing up
Employee cost	121.54	121.54	174.00

Petitioner's submission

The DGVCL has submitted that the employee cost was incurred on the basis of the guidelines issued by the competent authorities like the State Government and that the entire expenditure estimated is a legitimate expenditure and any variation is purely beyond its control. It is further submitted that the 6% hike approved in the previous MYT order does not compensate for the increases due to salary related aspects including salary hikes, DA increase / mergers, etc. DGVCL has requested the Commission to consider the variation in employee cost as uncontrollable and accordingly give appropriate treatment for the same. DGVCL has estimated a loss of Rs. 52 crore on account of such uncontrollable factors.

Commission's Analysis

The DGVCL has compared the actual employee cost of Rs. 174.00 crore incurred during FY 2009-10 with Rs. 121.34 crore considered in the APR for FY 2009-10. The employee cost approved in the MYT order and ARR order for FY 2009-10 is the same as considered in the APR order for FY 2009-10. The actual employee cost, as per the audited annual accounts for FY 2009-10, is Rs. 173.90 crore. The increase is mainly on account of the impact of Sixth Pay Commission recommendations and due to increase in dearness allowance.

The Commission considers the employee cost as a controllable expense, which is in line with the MYT Regulations. However, in view of the fact that the additional expenses are on account of implementation of Sixth Pay Commission recommendations, the Commission allows it to be treated as an uncontrollable expense.

The Commission, accordingly, approves the employee cost at Rs. 173.90 crore in the truing up for FY 2009-10.

4.5.3 Repairs & Maintenance (R&M) Expenses

The DGVCL has claimed Rs. 16.00 crore towards R&M expenses in the truing up for FY 2009-10. The R&M expenses approved for FY 2009-10 in the Tariff order dated 14th December 2009, considered in APR for FY 2009-10 and claimed by DGVCL in the truing up for FY 2009-10 are as given in the Table below:

Table 4.13: R&M expenses claimed by DGVCL for the truing up for FY 2009-10

(Rs. crore)

Particulars	FY 2009-10		
	Tariff order dated 14 th December 2009	APR order	Claimed in truing up
R&M expenses	30.93	30.93	16.00

Petitioner's submission

The DGVCL has submitted that the assets of DGVCL are old and require regular maintenance to ensure uninterrupted operations. It has been further submitted that DGVCL has been trying its best to ensure uninterrupted operations of the system by undertaking R&M activities which are uncontrollable in nature.

The DGVCL has estimated a gain of Rs. 15 crore due to controllable factors.

Commission's Analysis

The actual R&M expenses incurred during FY 2009-10 are Rs. 16.40 crore, as per the audited annual accounts. The Commission has observed that though the DISCOM has stated that the assets are old and require regular maintenance, it could not utilize the amount approved by the Commission under the head. The R&M expense is a controllable item of expenditure under the MYT Regulations, 2007.

The Commission, accordingly approves the R&M expenses at Rs. 16.40 crore in the truing up for FY 2009-10.

4.5.4 Administration & General (A&G) expenses

The DGVCL has claimed Rs. 31.00 crore towards A&G expenses in the truing up for FY 2009-10. The A&G expenses approved for FY 2009-10 in the Tariff order dated 14th December, 2009, considered in the APR for FY 2009-10 and claimed by DGVCL in the truing up are as given in the Table below:

Table 4.14: A&G expenses claimed by DGVCL in the truing up for FY 2009-10

(Rs. crore)

Particulars	Tariff order	APR order	Claimed in truing up
A & G expenses	27.55	27.55	31.00

Petitioner's submission

The DGVCL has submitted that the A&G expenses are categorised as controllable expenses in the MYT Regulations and the actual A&G expenses, when compared with the approved value, resulted in a loss of Rs. 3.00 crore for FY 2009-10.

Commission's Analysis

The actual A&G expenses, as per the audited annual accounts for FY 2009-10, are Rs. 30.89 crore and are higher than what was approved in the Tariff order and considered in the APR for FY 2009-10 by Rs. 3.34 crore.

The Commission, accordingly, approves the A&G expenses at Rs. 30.89 crore in the truing up for FY 2009-10.

The parameters impacting A&G expenses are controllable in nature, as specified in the MYT Regulations, 2007. The Commission, accordingly, considers the loss under A&G expenses, on account of controllable factor.

4.5.5 Other Debits

Petitioners' submission

The DGVCL has claimed the actual other debits at Rs. 4.00 crore in the truing up, as against Rs. 1.04 crore approved in the Tariff order dated 14th December, 2009 for FY 2009-10.

Commission's Analysis

The actual other debits, as per audited annual accounts for FY 2009-10, are Rs. 4.22 crore.

The Commission approves the other debits at Rs. 4.22 crore in the truing up for FY 2009-10, as these are recognised as part of O&M expenses.

4.5.6 Extraordinary items

The DGVCL has not claimed any expense under extraordinary item in the truing up for FY 2009-10, as against Rs. 1.50 crore approved in the Tariff order and APR order for FY 2009-10.

Commission's Analysis

The actual extraordinary items are Rs.0.27 crore, as per the audited annual accounts for FY 2009-10.

However, the Commission approves the extraordinary items at Rs. 0.27 crore, as per the audited accounts. These expenses are also recognised under O&M expenses.

4.5.7 Net prior period expenses / (income)

The DGVCL has claimed Rs. 5 crore towards net prior period expenses in the truing up for FY 2009-10.

Commission's Analysis

The DGVCL did not estimate prior period expenses / income in the petitions for ARR, as well as APR, for FY 2009-10. These net prior period expenses / income are recognised through a directive in the Tariff order dated 31st March 2010. The actual net prior period expenses accounted for in the audited annual accounts are Rs. 4.79 crore.

The Commission, accordingly, approves the net prior period expenses of Rs. 4.79 crore in the truing up for FY 2009-10.

4.5.8 Other expenses capitalised

The DGVCL has claimed the actual expenses capitalised at Rs. 39 crore in the truing up for FY 2009-10, as against Rs. 48.18 crore approved in the Tariff order for the year FY 2009-10 and considered in the APR order for FY 2009-10.

Commission's Analysis

The Commission has observed that the other expenses capitalised represent the capitalisation of employee cost, A&G expenses and interest charges, etc., as seen from Schedule 26 of the Annual Accounts for FY 2009-10. The actual other expenses capitalised are Rs. 38.55 crore, as per the audited annual accounts for FY 2009-10. The other expenses capitalised include Rs. 0.73 crore towards capitalisation of interest charges. The interest charges capitalised are excluded from this since the interest charges are allowed on normative basis against the actual capitalisation of CAPEX.

The Commission, accordingly, approves the other expenses capitalised at Rs. 37.82 crore excluding the interest charges capitalised in the truing up for FY 2009-10.

The total O&M expenses approved in the truing up for FY 2009-10 and the gains / (losses) considered due to controllable and uncontrollable factors are detailed in the Table below:

Table 4.15: Approved O&M expenses and gains / loss in the truing up for FY 2009-10
(Rs. crore)

Sl. No.	Particulars	As per Tariff order FY 2009-10	Approved in truing up	Deviation	Gain / (loss) due to controllable factor	Gain / (loss) due to uncontrollable factor
1.	Employee cost	121.54	173.90	(52.36)	-	(52.36)
2.	Repairs & Maintenance expenses	30.93	16.40	14.53	14.53	-
3.	Administration & General charges	27.55	30.89	(3.34)	(3.34)	-
4.	Other debits	1.04	4.22	(3.18)	-	(3.18)
5.	Extraordinary items	1.50	0.27	1.23	-	1.23
6.	Net prior period expenses	-	4.79	(4.79)	-	(4.79)
7.	Other expenses capitalized	(48.18)	(37.82)	(10.36)	-	(10.36)
8.	Total O&M expenses	134.38	192.65	(58.27)	11.19	(69.46)

4.5.9 Capital expenditure, Capitalisation and Funding of CAPEX

The DGVCL has furnished the capital expenditure at Rs. 190 crore in the truing up for FY 2009-10, as against Rs. 298 crore considered in the APR for FY 2009-10 (APR). The details are as given in the Table below:

Table 4.16: Capital expenditure claimed by DGVCL for FY 2009-10
(Rs. crore)

Sl. No.	Particulars	APR order FY 2009-10	Claimed in truing up FY 2009-10
1.	Distribution schemes	78.00	114.00
2.	Rural Electrification schemes	103.00	63.00
3.	Others	2.00	-
4.	Non-plan schemes	54.00	3.00
5.	Other new schemes	61.00	10.00
6.		298.00	190.00

Petitioner's submission

The DGVCL has submitted that the actual capital expenditure incurred during FY 2009-10 was Rs. 190 crore, which is lower by Rs. 108 crore than what was approved for FY 2009-10.

Commission's Analysis

The capital expenditure considered in the APR for FY 2009-10 in the Tariff order dated 31st March 2010 was Rs. 322.86 crore. The actual capital expenditure incurred is given as Rs. 190 crore, which is lower by Rs. 132.86 crore than the CAPEX

considered in the APR for FY2009-10. The actual capital expenditure during FY 2009-10 was Rs. 189.91 crore and the actual capitalisation was Rs. 177.22 crore, as per the audited annual accounts for FY 2009-10.

The Commission has observed that there is wide variation in the capital expenditure projected and actual capitalisation. The licensee shall be more realistic in projecting the capital expenditure.

The Commission, accordingly, approves the capital expenditure at Rs. 189.91 crore and the capitalisation at Rs. 177.22 crore in the truing up for FY 2009-10.

The CAPEX, capitalisation and funding claimed by DGVCL and approved by the Commission are as given in the Table below:

Table 4.17: Approved Capitalisation and sources of funding in the truing up for FY 2009-10
(Rs. crore)

Particulars	Claimed in truing up for FY 2009-10	Approved in truing up for FY 2009-10
Capital expenditure	190.00	189.91
Capitalisation	177.00	177.22
Less:		
Consumer contribution	57.00	60.39
Grants	48.00	47.90
Balance capitalization	72.00	68.93
Debt @ 70%	50.00	48.25
Equity @ 30%	22.00	20.68

4.5.10 Depreciation

The DGVCL has claimed Rs. 95.00 crore towards depreciation in the truing up for FY 2009-10. The depreciation charges approved in the Tariff order for the year FY 2009-10, considered in the APR order for FY 2009-10 and claimed by DGVCL in the truing up for FY 2009-10 are as given in the Table below:

Table 4.18: Depreciation claimed by DGVCL in the truing up for FY 2009-10
(Rs. crore)

Particulars	FY 2009-10		
	Tariff order	APR order	Claimed in truing up
Depreciation	98.21	98.96	95.00

Petitioner's submission

The DGVCL has submitted that the amount of depreciation as per actuals is lower than the approved depreciation. DGVCL has applied the rate of depreciation as specified by CERC, assuming the asset mix to remain unchanged.

The DGVCL has considered that the depreciation rate as per the CERC Regulations, 2009 and computed the depreciation as detailed in the table below:

Table 4.19: Fixed assets & depreciation computed by DGVCL for FY 2009-10

(Rs. crore)				
Sl. No.	Particulars	FY 2009-10 (Approved)	FY 2009-10 (Actual)	Deviation
1.	Gross block in the beginning of the year	1717.00	1717.00	-
2.	Additions during the year (Net)	323.00	177.00	-
3.	Depreciation for the year	99.00	95.00	4.00
4.	Average rate of depreciation	5.27%	5.27%	-

The DGVCL has further submitted that actual depreciation for FY 2009-10, as against the value approved (APR), resulted in a net uncontrollable gain of Rs. 4 crore. Details are given in the table below:

Table 4.20: Gain / loss due to depreciation claimed in the truing up for FY 2009-10

(Rs. crore)				
Particulars	FY 2009-10 (Approved)	FY 2009-10 (Actual)	Gain / loss due to controllable factor	Gain / (loss) due to uncontrollable factor
Depreciation	99.00	95.00	-	4.00

Commission's Analysis

The opening balance of GFA, the net addition during the year FY 2009-10 and the closing balance of GFA are verified with the audited annual accounts for FY 2009-10. The depreciation rate of 5.27% adopted is in line with the depreciation rates specified in CERC Tariff Regulations, 2009.

The Commission, accordingly, approves the depreciation at Rs. 95 crore in the truing up for FY 2009-10.

The amount of depreciation is dependent on the quantum of capitalisation, rate of depreciation, etc. The Commission has, therefore, considered the parameters impacting depreciation as uncontrollable.

The Commission, accordingly, approves the gains / losses on account of depreciation in the truing up for FY 2009-10, as detailed in the Table below:

Table 4.21: Gain / loss due to deprecation approved in the truing up for FY 2009-10

(Rs. crore)

Particulars	As per Tariff order FY 2009-10	Approved in truing up for FY 2009-10	Deviation	Gain / loss due to Uncontrollable factor
Depreciation	98.21	95.00	3.21	3.21

4.5.11 Interest and Finance charges

The DGVCL has claimed Rs. 59 crore towards interest and finance charges in the truing up for FY 2009-10, as against Rs. 56.12 crore approved in the Tariff order and Rs. 62.62 crore considered in the APR for FY 2009-10, as detailed in the Table below:

Table 4.22: Interest and Finance charges claimed by DGVCL in the truing up for FY 2009-10

(Rs. crore)

Particulars	FY 2009-10		
	Tariff order	APR order	Claimed in truing up
Interest and Finance charges	56.12	62.62	59.00

Petitioners' submission

The DGVCL has submitted that it has considered opening balance of loan as approved in its APR order for FY 2009-10 and considered in the Tariff order dated 31st March 2010. The loan addition is computed at Rs. 72 crore towards loan for funding the CAPEX for FY 2009-10 and the balance for funding the past liabilities. DGVCL has considered the weighted average rate of interest of 9.51%, as against 9.81% approved in APR for FY 2009-10. In addition to the above, DGVCL has considered the guarantee charges payable on legacy loan from the erstwhile GEB and interest on security deposits. The details of interest and finance charges claimed by DGVCL are as given in the Table below:

Table 4.23: Interest and Finance charges claimed by DGVCL in the truing up for FY 2009-10

(Rs. crore)

Sl. No.	Particulars	FY 2009-10 (Approved)	FY 2009-10 (Actual)	Deviation
1.	Opening loans	285.00	285.00	
2.	New loan during the year	80.00	72.00	
3.	Repayment during the year	94.00	67.00	
4.	Closing loans	271.00	289.00	
5.	Average loans	278.00	287.00	
6.	Interest on loans	27.00	27.00	(0)
7.	Interest on security deposit	34.00	31.00	4.00
8.	Guarantee charges	1.00	1.00	0.00

Dakshin Gujarat Vij Company Limited
Truing up for FY 2009-10, APR for FY 2010-11,
ARR for FY 2011-12 to FY 2015-16 and Tariff for FY 2011-12

Sl. No.	Particulars	FY 2009-10 (Approved)	FY 2009-10 (Actual)	Deviation
9.	Total interest & finance charges	63.00	59.00	4.00
10.	Weighted average rate of interest	9.81%	9.51%	

The DGVCL has further submitted that interest and finance charges are categorised as uncontrollable as per the MYT Regulations and accordingly worked out deviation in the actual vis-à-vis the approved expenses under uncontrollable factors, as given in the Table below:

Table 4.24: Gains / (Loss) claimed due to interest & finance charges for FY 2009-10

(Rs. crore)

Particulars	FY 2009-10 (Approved)	FY 2009-10 (Actual)	Gain / loss due to controllable factor	Gain / loss due to Un uncontrollable factor
Interest and Finance charges	63.00	59.00	-	4.00

Commission's Analysis

The Commission analysed the loan for capital expenditure and approved the closing loan towards capital expenditure at Rs. 284.60 crore for FY 2008-09 in the APR for FY 2009-10 in the Tariff order dated 31st March 2010. This is taken as the opening balance of loan in the truing up for FY 2009-10. The capitalisation and funding of CAPEX have been approved for FY 2009-10, based on the audited accounts. The interest on security deposits is claimed at Rs. 31 crore, as against Rs. 30.50 crore as per audited accounts. The repayment of loan is claimed at Rs. 67 crore in the truing up for FY 2009-10. In the MYT order for FY 2009-10, the tenure of new loan is considered as 10 years for repayment, and the repayment considered 1/10th of the loan outstanding at the beginning of the year. The guarantee charges, as per audited accounts for FY 2009-10, are Rs. 1.00 crore. Taking all these factors into consideration, the interest and finance charges are computed @ 9.51%, as detailed in the Table below:

Table 4.25: Interest and Finance charges approved by the Commission in the truing up for FY 2009-10

(Rs. crore)

Sl. No.	Particulars	Claimed in truing up for FY 2009-10	Approved in truing up for FY 2009-10
1.	Opening loans	285.00	284.60
2.	New Loan during the year	72.00	48.25
3.	Repayment during the year	67.00	28.46
4.	Closing loan	289.00	304.39
5.	Average loan	287.00	294.50
6.	Interest on loan	27.00	28.00
7.	Interest on security deposit	31.00	30.50

Sl. No.	Particulars	Claimed in truing up for FY 2009-10	Approved in truing up for FY 2009-10
8.	Guarantee charges	1.00	1.00
9.	Total interest & finance charges	59.00	59.51
10.	Weighted average rate of interest	9.51%	9.51%

The Commission, accordingly, approves the interest and finance charges at Rs. 59.51 crore in the truing up for FY 2009-10.

In regard to the computation of gains / losses, Regulation 9.6.2 (a) considers the interest and finance charges as controllable expenses. The Commission has observed that the interest and finance charges are dependent on the amount of capital expenditure, capitalisation and the extent of borrowing considered during the financial year. The Commission, therefore, considers the deviation as on account of uncontrollable factors.

The Commission, accordingly, approves the gains / losses on account of interest and finance charges in the truing up for FY 2009-10, as detailed in the Table below:

Table 4.26: Gain / loss approved in the truing up for FY 2009-10

(Rs. crore)

Particulars	As per Tariff order FY 2009-10	Approved in truing up for FY 2009-10	Deviation	Gain / loss due to Uncontrollable factor
Interest and finance charges	56.12	59.51	(3.39)	(3.39)

4.5.12 Interest on working capital

The DGVCL has claimed Rs. 81.00 crore towards interest on working capital in the truing up for FY 2009-10, as against Rs. 36.10 crore approved in the Tariff order and Rs. 40.62 crore considered in the APR order for FY 2009-10. Details are given in the Table below:

Table 4.27: Interest on working capital claimed by DGVCL in the truing up for FY 2009-10

(Rs. crore)

Particulars	FY 2009-10		
	Tariff order	APR order	Claimed in truing up
Interest on working capital	36.10	40.62	81.00

Petitioner's submission

The petitioner has submitted that the interest on working capital has been calculated based on the normative principles outlined in the Terms and Conditions of Tariff Regulations at an interest rate of 10.25%, being the Short-term Prime Lending Rate of SBI as on 01/04/2004, as approved in the APR order for FY 2009-10.

The detailed computation of interest on working capital is as given in the Table below:

Table 4.28: Interest on working capital claimed by DGVCL in the truing up for FY 2009-10

(Rs. crore)

Sl. No.	Particulars	FY 2009-10 (Approved)	FY 2009-10 (Actual)	Deviation
1.	O&M expenses	15.00	16.00	
2.	Maintenance spares	18.00	17.00	
3.	Receivables	363.00	753.00	
4.	Total working capital	396.00	786.00	
5.	Rate of interest on working capital	10.25%	10.25%	
6.	Interest on working capital	41.00	81.00	(40.00)

The DGVCL has further submitted that the actual amount of interest on working capital, as against the amount approved in APR for FY 2009-10, has resulted in a net uncontrollable loss of Rs. 40 crore, as given in the Table below:

Table 4.29: Gains / (Loss) claimed due to interest on working capital for FY 2009-10

(Rs. crore)

Particulars	FY 2009-10 (Approved)	FY 2009-10 (Actual)	Gain / (loss) due to controllable factor	Gain / (loss) due to Uncontrollable factor
Interest on working capital	41.00	81.00	-	(40.00)

Commission's Analysis

The Commission examined the computation of interest on working capital submitted by DGVCL and observed that receivables equivalent to two months sales have been claimed by DGVCL in the truing up for FY 2009-10 against one month sales approved in the Tariff order for FY 2009-10. The Commission had considered receivables equivalent to one month's sales as proposed by the petitioner in the ARR petition, as well as in the APR petition for FY 2009-10. The working capital and interest on working capital are recomputed, taking into consideration the receivables equivalent to one month's sales and the O&M expenses approved in the truing up, which are as detailed in the Table below:

Table 4.30: Interest on working capital approved in the truing up for FY 2009-10

(Rs. crore)

Sl. No.	Particulars	Claimed in truing up for FY 2009-10	Approved in truing up for FY 2009-10
1.	O&M expenses for one month	16.00	16.05
2.	Maintenance spares 1% of GFA	17.00	17.17
3.	Receivables one month's sales	753.00	365.36
4.	Total working capital	786.00	398.58
5.	Rate of interest on working capital	10.25%	10.25%
6.	Interest on working capital	81.00	40.85

The Commission, accordingly, approves the interest on working capital at Rs. 40.85 crore in the truing up for FY 2009-10.

The deviation in the interest on working capital is considered as on account of uncontrollable factors, since the components contributing to working capital are mostly uncontrollable.

The Commission, accordingly, approves the gains / losses on account of interest on working capital in the truing up for FY 2009-10, as detailed in the Table below:

Table 4.31: Gain / loss approved in the truing up for FY 2009-10

(Rs. crore)

Particulars	As per Tariff order FY 2009-10	Approved in truing up for FY 2009-10	Deviation	Gain / loss due to Uncontrollable factor
Interest on working capital	36.10	40.85	(4.75)	(4.75)

4.5.13 Provision for bad debts

The DGVCL has claimed Rs. 63.00 crore towards actual bad debts in the truing up for FY 2009-10, as against Rs. 3.84 crore approved in the Tariff order for FY 2009-10. The details are as given in the Table below:

Table 4.32: Provision for bad debts claimed by DGVCL in the truing up for FY 2009-10

(Rs. crore)

Particulars	FY 2009-10		
	Tariff order	APR order	Claimed in truing up
Provision for bad debts	3.84	4.14	63.00

Petitioner's submission

The DGVCL has submitted that the actual value of bad debts, when compared with the approved value, resulted in a loss of Rs. 58 crore on account of controllable factors, which are as shown in the table below:

Table 4.33: Provision for bad debts for FY 2009-10

Particulars	FY 2009-10 (Approved)	FY 2009-10 (Actual)	(Rs. crore)	
			Gain / (loss) due to Un controllable factor	Gain / (loss) due to Un uncontrollable factor
Provision for bad debts	4.00	63.00	(58.00)	-

Commission's Analysis

The Commission examined the submission made by the petitioner. It is noted, on verification from the audited annual accounts, that an amount of Rs. 62.53 crore is included towards bad and doubtful debts provided for in Schedule 27 of the annual accounts. It is observed in the notes on accounts for FY 2009-10 that Government of Gujarat proposed to announce an Amnesty scheme for various categories of consumers to encourage them to settle their outstanding energy dues and the company reviewed the adequacy of provision of bad and doubtful debts and made additional provision of Rs. 62.53 crore towards bad and doubtful debts.

Regulation 66 of GERC (Terms and Conditions of Tariff) Regulations, 2005 specify that the bad debts actually written off, subject to the Commission's clearance, are to be considered. The amount of Rs. 62.53 crore claimed by DGVCL is only a provision and this cannot be considered as written off without adequate justification being provided by DGVCL.

The Commission, therefore, approves the bad debts at Rs. 3.84 crore as was approved in the Tariff order for FY 2009-10.

There is no deviation as the provision for bad debts approved in the truing up for FY 2009-10 is the same as approved in the Tariff order for FY 2009-10. There is no deviation and no gain / loss due to bad debts in the truing up for FY 2009-10.

4.5.14 Return on equity

The DGVCL has claimed Rs. 50.00 crore towards return on equity in the truing up for FY 2009-10, as against Rs. 53.40 crore approved in the Tariff order for FY 2009-10 and Rs. 52.91 crore considered in the APR which are as given in the Table below:

Table 4.34: Return on equity claimed by DGVCL in the truing up for FY 2009-10

(Rs. crore)

Particulars	FY 2009-10		
	Tariff order	APR order	Claimed in truing up
Return on equity	53.40	52.91	50.00

Petitioner's submission

The petitioner has submitted that DGVCL has computed the return on equity considering a rate of 14% on the average of opening and closing equity, taking into account the additions during the year FY 2009-10.

The details of computation of return on equity are as given in the Table below:

Table 4.35: Return on equity claimed by DGVCL in the truing up for FY 2009-10

(Rs. crore)

Sl. No.	Particulars	FY 2009-10 (Approved)	FY 2009-10 (Actual)	Deviation
1.	Opening equity	361.00	361.00	-
2.	Additional equity during the year	34.00	-	34.00
3.	Closing equity	395.00	361.00	34.00
4.	Average equity	378.00	361.00	17.00
5.	Rate of return on equity	14%	14%	
6.	Interest on working capital	53.00	50.00	2.00

Commission's analysis

The DGVCL has furnished the opening equity capital at Rs. 361 crore for FY 2009-10 and it has not claimed any equity addition during the FY 2009-10. The actual opening equity as on 01/04/2009 was Rs. 360.67 crore, being the closing balance of equity approved for FY 2008-09 (APR). The Commission has approved the normative equity addition at Rs. 20.68 crore in Table 4.17.

The Commission has computed the return on equity in the truing up for FY 2009-10, as detailed in the Table below:

Table 4.36: Return on equity approved for FY 2009-10

(Rs. crore)

Sl. No.	Particulars	Claimed in truing up for FY 2009-10	Approved in truing up for FY 2009-10
1.	Opening equity	361.00	360.67
2.	Additional equity during the year	-	20.68

Sl. No.	Particulars	Claimed in truing up for FY 2009-10	Approved in truing up for FY 2009-10
3.	Closing equity	361.00	381.35
4.	Average equity	361.00	371.01
5.	Rate of return on equity@ 14%	50.00	51.94

The Commission approves the return on equity at Rs. 51.94 crore in the truing up for FY 2009-10.

It is considered that the deviation is due to uncontrollable factors as the return on equity is being allowed on a normative basis and the quantum of equity addition in the year depends upon the capital expenditure and the capitalization achieved during the year.

The Commission, accordingly, approves the gains / losses on account of return on equity in the truing up for FY 2009-10, as detailed in the Table below:

Table 4.37: Approved gains / losses due to return on equity in the truing up for FY 2009-10
(Rs. crore)

Particulars	As per Tariff order FY 2009-10	Approved in truing up for FY 2009-10	Deviation	Gain / (loss) due to Un controllable factor
Return on equity	53.40	51.94	1.46	1.46

4.5.15 Taxes

The DGVCL has claimed Rs. 19.00 crore towards income tax in the truing up for FY 2009-10, as against Rs. 0.61 crore approved in the Tariff order for FY 2009-10, as well as in the APR order for FY 2009-10. Details are given in the Table below:

Table 4.38: Taxes claimed by DGVCL in the truing up for FY 2009-10
(Rs. crore)

Particulars	FY 2009-10		
	Tariff order	APR order	Claimed in truing up
Provision for tax / paid	0.61	0.61	19.00

Petitioner's submission

The petitioner has submitted that the actual tax worked out to be Rs. 19 crore, as against Rs. 1.00 crore approved in the APR order for FY 2009-10. DGVCL has further mentioned that tax is a statutory expense and this should be allowed without any deduction. DGVCL has claimed a loss of Rs. 19.00 crore on account of tax as given in the Table below:

Table 4.39: Gains / (Loss) claimed due to provision for taxes for FY 2009-10

Particulars	FY 2009-10 (Approved)	FY 2009-10 (Actual)	Gain / (loss) due to controllable factor	(Rs. crore)
				Gain / (loss) due to Un uncontrollable factor
Provision for tax / tax paid	1.00	19.00	-	(19.00)

Commission's Analysis

The Commission has verified and found that the provision for tax is Rs. 19.33 crore, as per the audited annual accounts.

The Commission, accordingly, approves the provision for tax at Rs. 19.33 crore in the truing up for FY 2009-10.

In regard to the computation of gains/losses, Regulation 9.6.1 (d) considers variation in taxes on income as uncontrollable.

The Commission, accordingly, approves the gains/losses on account of tax on income in the truing up for FY 2009-10, which are as detailed in the Table below:

Table 4.40: Approved gains / losses due to tax in the truing up for FY 2009-10

Particulars	As per Tariff order FY 2009-10	Approved in truing up for FY 2009-10	Deviation	(Rs. crore)
				Gain / (loss) due to Un controllable factor
Tax on income	0.61	19.33	(18.72)	(18.72)

4.5.16 Non-tariff income

The DGVCL has furnished the actual non-tariff income at Rs. 89.00 crore in the truing up for FY 2009-10, as against Rs. 43.02 crore approved in the Tariff order for FY 2009-10 and Rs. 89.83 crore considered in the APR for FY 2009-10, which are as detailed in the Table below:

Table 4.41: Non-tariff income claimed by DGVCL in the truing up for FY 2009-10

Particulars	FY 2009-10		
	Tariff order	APR order	Claimed in truing up
Non-tariff income	43.02	89.83	89.00

Petitioner's submission

The petitioner has submitted that the actual value of non-tariff income is Rs. 89.00 crore, as against Rs. 90.00 crore approved in the APR. This resulted in a net controllable gain of Rs. 1.00 crore, which is as detailed in the Table below:

Table 4.42: Gains / (Loss) claimed due to non-tariff income for FY 2009-10
(Rs. crore)

Particulars	FY 2009-10 (Approved)	FY 2009-10 (Actual)	Gain / (loss) due to uncontrollable factor	Gain / (loss) due to uncontrollable factor
Non-tariff income	90.00	89.00	1.00	-

Commission's Analysis

The Commission verified and found that the actual 'other income' is Rs. 88.62 crore, as per the audited annual accounts for FY 2009-10.

The Commission, accordingly, approves the non-tariff income at Rs. 88.62 crore in the truing up for FY 2009-10.

The deviation in non-tariff income is considered as uncontrollable. The Commission, accordingly, approves the gains / losses on account of non-tariff income in the truing up for FY 2009-10, which is as detailed in the Table below:

Table 4.43: Approved gains / losses due to non-tariff income in the truing up for FY 2009-10
(Rs. crore)

Particulars	As per Tariff order FY 2009-10	Approved in truing up for FY 2009-10	Deviation	Gain / (loss) due to Un controllable factor
Non-tariff income	43.02	88.62	45.60	45.60

4.6 Revenue from sale of power

The DGVCL has furnished the revenue at Rs. 4433 crore in the truing up for FY 2009-10, as against Rs. 3998 crore approved in the Tariff order for FY 2009-10 and Rs. 4262.05 crore considered in the APR for FY 2009-10, as detailed in the Table below:

Table 4.44: Revenue claimed in the truing up for FY 2009-10
(Rs. crore)

Sl. No.	Particulars	Tariff order	APR order	Claimed in truing up
1.	Revenue from sale of power	3837.00	4137.00	4321.00
2.	Other income (Consumer related)	71.46	73.00	63.00
3.	Total revenue excluding subsidy (1+2)	3909.36	4210.00	4384.00
4.	Agricultural subsidy	54.03	52.00	49.00

Dakshin Gujarat Vij Company Limited
Truing up for FY 2009-10, APR for FY 2010-11,
ARR for FY 2011-12 to FY 2015-16 and Tariff for FY 2011-12

5.	Other subsidy	35.18	-	-
6.	Total revenue including subsidy (3+4+5)	3998.57	4262.00	4433.00

The category-wise sales revenue for FY 2009-10 is given in the table below:

Table 4.45: Category-wise sales revenue for FY 2009-10

(Rs. crore)

Revenue from sale of power	Year ended March , 31st 2010
Domestic or Residential	554.57
Commercial	313.06
Industrial low & medium voltage	1269.09
Industrial high voltage	1879.36
Public lightining	12.72
Traction Railways	157.8
Irrigation agricultural	98.16
Public water works and sew pumps	36.42
Total revenue from sale	4321.18
Other income (consumer related)	63.17
Total revenue excluding subsidy	4384.35
Agricultural subsidy	48.98
Total revenue including subsidy	4433.33

Commission's Analysis

The Commission has verified the total revenue for FY 2009-10 from the audited annual accounts. The actual revenue is Rs. 4433.33 crore including other income and revenue subsidy.

The Commission, accordingly, approves the total revenue in the truing up for FY 2009-10, as detailed in the Table below:

Table 4.46: Revenue approved in the truing up for FY 2009-10

(Rs. crore)

Sl. No.	Particulars	Claimed in truing up for FY 2009-10	Approved in truing up for FY 2009-10
1.	Revenue from sale of power	4321.00	4321.18
2.	Other income (Consumer related)	63.00	63.17
3.	Total revenue excluding subsidy (1+2)	4384.00	4384.35
4.	Agricultural subsidy	49.00	48.98
	Total revenue including subsidy (3+4)	4433.00	4433.33

4.7 ARR approved in the truing up

The Commission reviewed the performance of DGVCL under Regulation 9.2 of MYT Regulations, 2007 with reference to the audited annual accounts for FY 2009-10. The

Dakshin Gujarat Vij Company Limited
Truing up for FY 2009-10, APR for FY 2010-11,
ARR for FY 2011-12 to FY 2015-16 and Tariff for FY 2011-12

Commission computed the gains / losses for FY 2009-10 based on the truing up for each of the components discussed in the above paragraphs.

The Aggregate Revenue Requirement (ARR) approved in the Tariff order dated 14th December, 2009, actual claimed in truing up and approved for truing up and gains / losses computed in accordance with MYT Regulations are as given in the Table below:

Table 4.47: ARR approved in truing up for FY 2009-10

(Rs. crore)

Sl. No.	Particulars	ARR order	APR order	Actual claimed	Approved in truing up	Deviation	Gain/(loss) due to Controllable factors	Gain/(loss) due to Uncontrollable factors

13	Provision for tax/ tax paid	0.61	0.61	19.00	19.33	(18.72)		(18.72)
14	Total expenditure	3950.38	4389.77	4607.00	4511.80	(561.42)	(65.72)	(495.70)
15	Less: Non-tariff income	43.02	89.83	89.00	88.62	45.60		45.60
16	Aggregate Revenue Requirement (14-15)	3907.36	4299.94	4518.00	4423.18	(515.82)	(65.72)	(450.10)

The comparison of actual performance of DGVCL in FY 2009-10 with the approved ARR in the Tariff order dated 14th December, 2009 resulted in a deviation of Rs.

515.82 crore (loss) comprising of controllable loss of Rs.65.72crore and uncontrollable loss of Rs. 450.10 crore during FY 2009-10.

4.8 Sharing of Gains / Losses for FY 2009-10

The Commission analysed the gains/losses on account of controllable and uncontrollable factors.

The relevant Regulations are extracted below:

Regulation 10.1 “The approved aggregate gain or loss to the Generating Company or Licensee on account of uncontrollable factors shall be passed through as an adjustment in the tariff of the Generating Company or licensee over such period as may be specified in the Order of the Commission passed under Regulation 9.7 (a).”

Regulation 11.1 “The approved aggregate gain to the Generating Company or Licensee on account of controllable factors shall be dealt with in the following manner:

- (a) One third of the amount of such gain shall be passed on as a rebate in tariffs over such period as may be specified in the Order of the Commission under Regulation 9.7;*
- (b) One third of amount of such gain shall be retained in a special reserve by the Generating Company or Licensee for the purpose of absorbing the impact of any future losses on account of controllable factors under clause (b) of Regulation 11.2; and*
- (c) The balance amount of gain may be utilized, at the discretion of the Generating Company or Licensee”.*

Regulation 11.2 “The approved aggregate loss to the Generating Company or Licensee on account of controllable factors shall be dealt with in the following manner:

- (a) One third of the amount of such loss maybe passed on as an additional charge in tariffs over such period as may be specified in the Order of the Commission under Regulation 9.7; and*

(b) The balance amount of loss shall be absorbed by the Generating Company or licensee.”

4.9 Revenue gap / surplus for FY 2009-10

The DGVCL has claimed a revenue gap of Rs. 34 crore in the truing up after treatment of gains / (loss) due to controllable / uncontrollable factors, comparing the performance with the APR for FY 2009-10, instead of Tariff order for FY 2009-10, as detailed in the Table below:

Table 4.48: Projected Revenue gap / (surplus) FY 2009-10

(Rs. crore)		
Sl. No	Particulars	Approved for FY 2009-10
1	Aggregate Revenue Requirement originally approved in APR for FY 2009-10	4300.00
2	Gain / (Loss) on account of Uncontrollable factor to be passed on to Consumer	(142.00)
3	Gain / (Loss) on account of Controllable factor to be passed on to Consumer (1/3rd of Total Gain / Loss)	(26.00)
4	Revised ARR for FY 2009-10 (1-2-3)	4467.00
5	Revenue from Sale of power	4321.00
6	Other Income (Consumer related)	63.00
7	Total Revenue excluding Subsidy (5+6)	4384.00
8	Agriculture Subsidy	49.00
9	Total Revenue including Subsidy (7+8)	4433.00
10	Rvenue Gap after treating gains/(losses) due to Controllable/Uncontrollable factors (4-9)	34.00

The Commission compared the actual performance of DGVCL with the values approved in the Tariff order dated 14th December, 2009.

The Commission arrived at the revised ARR and revenue gap based on the expenses and the gains / (loss) approved in the truing up for FY 2009-10. The revenue gap / surplus approved by the Commission is summarised in the Table below:

Table 4.49: Revenue gap / (surplus) approved in the truing up for FY 2009-10

(Rs. crore)		
Sl. No	Particulars	Approved for FY 2009-10
1	Aggregate Revenue Requirement originally approved for FY 2009-10 in ARR for FY 2009-10.	3907.36
2	Add: loss on account of Uncontrollable factor to be passed on to Consumer	450.10
3	Add: Loss on account of Controllable factor to be passed on to Consumer 1/3rd of Total Gain	21.91
4	Revised ARR for FY 2009-10 (1-2-3)	4379.37
5	Revenue from Sale of power	4321.18

Dakshin Gujarat Vij Company Limited
Truing up for FY 2009-10, APR for FY 2010-11,
ARR for FY 2011-12 to FY 2015-16 and Tariff for FY 2011-12

Sl. No	Particulars	Approved for FY 2009-10
6	Other Income (Consumer related)	63.17
7	Total Revenue excluding Subsidy	4384.35
8	Agriculture Subsidy	48.98
9	Total Revenue including Subsidy (7+8)	4433.33
10	Revenue surplus after treating gains/(losses) due to Controllable/Uncontrollable factors (9-4)	53.96

As discussed above, there is a surplus of Rs.53.96 crore for FY 2009-10, the Commission has not considered this surplus while determining the tariff for FY 2011-12, as the truing up for FY 2010-11 is required to be taken up next year. After completing the truing up for FY 2010-11 and looking to the net entitlement for the first MYT control period i.e. FY 2008-09 to FY 2010-11, the Commission would take appropriate decision on this at that time.

5. Annual Performance Review for FY 2010-11

The petitioner, in its petition for Annual Performance Review (APR) for FY 2010-11, has estimated the energy sales, expenditure and revenue for FY 2010-11, based on actual energy sales, expenditure and revenue for the first half (H1) of FY 2010-11 and provided the revised estimate of energy sales, expenditure and revenue for FY 2010-11, based on the actuals of H1 against each head.

The performance of FY 2010-11 (revised estimate) is compared with the ARR approved for FY 2010-11 in the Order dated 31st March, 2010.

The Commission has analysed the energy sales and components of expenditure and revenue under performance review for FY 2010-11 in this chapter.

5.1 Energy sales

Petitioner's submission

The DGVCL, in its petition, has estimated the energy sales for FY 2010-11, based on the actuals for the first half of FY 2010-11 and estimated sales for the rest of the year.

The DGVCL has submitted the category-wise energy sales approved in Tariff order dated 31st March, 2010 and the revised estimate for FY 2010-11, as given in the Table below:

Table 5.1: Category-wise sales for FY 2010-11

Sl. No.	Particulars	Sales (MU)	
		FY 2010-11 (Approved)	FY 2010-11 (Revised estimate)
A	LT Consumers		
1.	Residential	1754	1694
2.	Commercial	582	615
3.	Industrial LT	2639	2717
4.	Public Water Works	102	106
5.	Agriculture	683	562*
6.	Public Lighting	30	32
	LT Total (A)	5790	5726
B	HT Consumers		
7.	Industrial HT	3690	3609
8.	Railway Traction	281	283
	HT Total (B)	3971	3892
	Grand Total (A + B)	9761	9618

*The agriculture consumption, which was estimated as 715 MU in the petition, was revised to 562 MU, vide letter dated 10th June, 2011 of the petitioner. Consequently, the total sales (RE) given in the petition as 9771 MU, stand revised to 9618 MU, as given in Table 5.1.

There is a decrease in the sales by about 143 MU mainly in agricultural category. The total sales of 9618 MU, is considered by the Commission for the purpose of APR.

5.2 Distribution losses

Petitioner's submission

The DGVCL has projected the distribution losses at 13.45% for FY 2010-11, as against 12.45% approved in the ARR Order dated 31st March, 2010.

An increase of 1.00% is estimated by DGVCL in the revised estimate for FY 2010-11.

Distribution losses of 13.45% are considered for FY 2010-11 as shown below, for the purpose of APR.

Table 5.2: Distribution losses for FY 2010-11 revised estimate

Particulars	Approved in order dated 31/03/2010	Revised estimate considered for calculating energy requirement for FY 2010-11
Distribution loss (%)	12.45	13.45

5.3 Energy requirement and Energy balance

Petitioner's submission

Based on the revised energy sales and distribution losses, projected in paragraphs 5.1 and 5.2 above and the transmission loss as per GETCO order, DGVCL has computed the total energy requirement as given in the Table below:

Table 5.3: Energy requirement and Energy balance as submitted by DGVCL for FY 2010-11

Sl. No.	Particulars	Unit	FY 2010-11 (Approved)	FY 2010-11 (RE)
1.	Energy sales	MU	9761	9618
2.	Distribution losses	MU	1388	1495
		%	12.45	13.45
3.	Energy requirement	MU	11149	11113
4.	Transmission losses	MU	489	524
		%	4.20	4.50
5.	Total energy to be input to transmission system	MU	11638	11637

Sl. No.	Particulars	Unit	FY 2010-11 (Approved)	FY 2010-11 (RE)
6.	Pooled losses in PGCIL system	MU	151	151
7.	Total energy requirement	MU	11789	11788

Commission's Analysis

The DGVCL has computed the energy requirement with distribution loss of 13.45% considered under revised estimate for FY 2010-11 and transmission loss of 4.50%. The Commission has estimated the energy requirement based on the projected distribution losses. However, it is clarified that this shall not be considered as approval of higher distribution loss. The Commission will undertake the true up based on the MYT approved distribution losses. The transmission loss of 4.12% arrived by SLDC for FY 2010-11 is considered by the Commission. The energy requirement is, accordingly, computed as shown in the Table below:

Table 5.4: Energy requirement considered for FY 2010-11

Sl. No.	Particulars	Unit	FY 2010-11 (RE)	FY 2010-11 (RE considered by the Commission)
1.	Energy sales	MU	9618	9618
2.	Distribution losses	MU	1495	1495
		%	13.45	13.45
3.	Energy requirement	MU	11113	11113
4.	Transmission losses	MU	524	478
		%	4.50	4.12
5.	Total energy to be input to transmission system	MU	11637	11591
6.	Pooled losses in PGCIL system	MU	151	151
	Total energy requirement		11788	11742

The Commission considers the total energy requirement of 11742 in APR for FY 2010-11.

5.4 Power purchase cost

Petitioner's submission

It is submitted by DGVCL that the company has been currently allocated its share from the generating capacities, as per scheme worked out by GUVNL. Based on the allocation, if there is surplus of power, the distribution company sells the power to other distribution companies and if there is a deficit, the power is purchased from other distribution companies. It is further submitted by DGVCL that the power

purchase cost includes the cost of power, transmission charges payable to GETCO and PGCIL and DISCOM's share of GUVNL cost. The power purchase cost for H1 of FY 2010-11 is considered on actual basis and the power purchase cost for the H2 of the year is worked out, based on per unit cost during the H1 of FY 2010-11 of scheduled energy.

Based on the above, DGVCL has compared the approved cost and revised estimate of power purchase cost for FY 2010-11, as shown below:

Table 5.5: Power purchase cost for FY 2010-11

(Rs. crore)			
Particulars	FY 2010-11 (Approved)	FY 2010-11 (H1 Actual)	FY 2010-11 (Revised estimate)
Total power purchase cost	4140	1922	3928

Total energy requirement (RE) = 11788 MU
 Total power purchase cost (RE) = Rs.3928 crore
 Per unit power purchase cost = $3928/11788 \times 10 = 3.3322$
 Or say Rs.3.33 per kWh.

Commission's Analysis

The total energy requirement is revised by the Commission in Para 5.3 above by taking into consideration the transmission loss at 4.12%, against 4.5% considered by DGVCL. The revised energy requirement of 11742 MU is considered by the Commission for FY 2010-11. Based on the revised energy requirement power purchase cost is arrived Rs. 3912.67 crore. The revised power purchase cost based on revised energy requirement is given below:

Table 5.6: Revised power purchase cost based on revised energy requirement for FY 2010-11

Particulars	Power purchase cost considered by ARR for FY 2010-11
Total energy requirement (MU)	11742
Unit cost of power (Rs./kWh)	3.33
Total power purchase cost (Rs. crore)	3912.67

The Commission considers the power purchase cost of Rs. 3912.67 crore in APR for FY 2010-11.

5.5 Fixed charges

5.5.1 Operation and Maintenance (O&M) expenses

The DGVCL has claimed Rs. 182.00 crore in the review for FY 2010-11. The O&M expenses approved in the Tariff order for FY 2010-11 and claimed by DGVCL in the revised estimate are as detailed in the Table below:

Table 5.7: O&M expenses claimed in the truing up for FY 2009-10

(Rs. crore)					
Sl. No	Particulars	Tariff order FY 2010-11	FY 2010-11 (RE)	Gain/(Loss) due to Controllable Factor	Gain/(Loss) due to Uncontrollable Factor
1.	Employee Expenses	117.00	165.00	-	(48.00)
2.	Repair & Maintenance Cost	32.00	18.00	14.00	-
3.	Administration & General Charges	29.00	33.00	(4.00)	-
4.	Other Debits	1.00	4.00	-	(3.00)
5.	Extraordinary Items	2.00	0	-	1.00
6.	Net Prior Period Expenses/(Income)	-	-	-	-
7.	Other Expenses Capitalized	(51.00)	(39.00)	-	(13.00)
8.	Total O&M Expenses	130.00	182.00	10.00	(62.00)

The O&M expenses comprise Employee cost, R&M expenses and Administration and General Expenses. In addition, DGVCL has also included the other debits, extraordinary items, net prior period expenses / (income) and other expenses capitalised. The component wise O&M expenses are discussed in the following paragraphs.

5.5.2 Employee cost

The DGVCL has submitted that the employee expenditure estimated by the company is on the basis of actual employee cost incurred during FY 2009-10 and 10% escalation thereon. DGVCL has explained that additional provision of gratuity of Rs. 24.35 crore made during FY 2009-10 has not been considered while escalating the employee cost of FY 2009-10. The employee cost incurred is purely on the basis of the guidelines issued by competent authorities like the State Government. Therefore, the entire expenditure estimated is a legitimate expenditure and any variation is purely beyond its control. DGVCL has further mentioned that the hike approved in the

previous tariff order does not compensate the company on account of increases due to salary related aspects including pay hikes, DA increase / mergers, etc., and requested to approve the employee cost as estimated by the company. DGVCL has also computed the gains and losses for each component of expenses in the APR.

Commission's Analysis

The Commission has noted that the increase in employee cost is mainly due to the Sixth Pay Commission recommendations. The actual employee cost approved in the truing up for FY 2009-10 based on audited annual accounts is Rs. 173.90 crore. As per the submission of DGVCL, this includes Rs. 24.35 crore towards additional provision of gratuity. Excluding the additional provision the normalised employee cost for FY 2009-10 is Rs. 149.55 crore. In the MYT order for FY 2010-11, the Commission permitted 6% escalation over FY 2009-10 employee cost and the same provision has been retained in the Tariff order for FY 2010-11, the employee cost being a controllable expense. Considering 6% escalation over the normalised employee cost of Rs. 149.55 crore during FY 2009-10, the employee cost works out to Rs. 158.52 crore.

The Commission, accordingly, considers Rs. 158.52 crore towards employee cost in the review for FY 2010-11, as detailed in the Table below:

Table 5.8: Employee cost considered in the APR for FY 2010-11

(Rs. crore)

Particulars	FY 2010-11		
	Tariff order	Claimed in RE	Considered for APR
Employee cost	116.52	165.00	158.52

5.5.3 Repairs & Maintenance (R&M) Expenses

The DGVCL has claimed Rs. 18.00 crore towards R&M expenses in APR for FY 2010-11, as against Rs. 32.48 crore approved in the MYT Order, as well as Tariff Order for FY 2010-11.

Petitioner's submission

The petitioner has submitted that the revised estimate for R&M is calculated on the basis of actual R&M cost for FY 2009-10 with 10% escalation.

Commission's Analysis

The Commission has observed that the R&M expense estimated at Rs. 18.00 crore in the APR is lower than what was approved in the MYT order, as well as Tariff order for FY 2010-11.

The Commission, accordingly, considers Rs. 18.00 crore in the review for FY 2010-11, as projected by DGVCL, as detailed in the Table below:

Table 5.9: R&M expenses considered in the APR for FY 2010-11

(Rs. crore)

Particulars	FY 2010-11		
	Tariff order	Claimed in RE	Considered for APR
R&M expenses	32.48	18.00	18.00

5.5.4 Administration & General (A&G) expenses

The DGVCL has claimed Rs. 33.00 crore towards A & G expenses in the APR for FY 2010-11, as against Rs. 29.20 crore approved in the MYT order as well as Tariff order for FY 2010-11.

Petitioner's submission

The DGVCL has submitted that the revised estimate of A&G expenses is worked out on the basis of actual A&G expenses for FY 2009-10 with 8% escalation.

Commission's Analysis

The A&G expenses are controllable expenses and the Commission retains the projection for these expenses at Rs. 29.20 crore, as approved in the Tariff order for FY 2010-11, as detailed in the Table below:

Table 5.10: A&G expenses considered in the APR for FY 2010-11

(Rs. crore)

Particulars	FY 2009-10		
	Tariff order	Claimed in RE	Considered for APR
A & G expenses	29.20	33.00	29.20

5.5.5 Other Debits

Petitioners' submission

The DGVCL has claimed Rs. 4.00 crore towards other debits in the APR for FY 2010-11, as against Rs. 1.09 crore approved in the MYT Order as well as Tariff Order for FY 2010-11.

Commission's Analysis

The DGVCL has not substantiated as to why the other debits require a revision in the APR. The Commission finds no justification for revising the provision for other debits.

The Commission, accordingly, considers the provision for other debits at Rs. 1.09 crore in the APR, as approved in the Tariff Order for FY 2010-11.

5.5.6 Extraordinary items

The DGVCL has not claimed any extraordinary item in the revised estimate for FY 2010-11, as against Rs. 1.50 crore approved in the MYT Order, as well as Tariff order for FY 2010-11.

The Commission accepts the nil provision towards extraordinary item, as proposed by DGVCL in the APR for FY 2010-11.

5.5.7 Net prior period expenses / (income)

The DGVCL has not projected any expenses under this head in the APR for FY 2010-11.

5.5.8 Other expenses capitalised

The DGVCL has estimated Rs. 39.00 crore under the head 'other expenses capitalised' in the APR for FY 2010-11, as against Rs. 51.07 crore approved in the MYT Order as well as Tariff Order for FY 2010-11.

Commission's Analysis

The petitioner has not substantiated as to how it has revised the capitalisation of other expenses in the APR for FY 2010-11. The other expenses capitalised represent capitalisation of employee costs, A&G expenses, depreciation and other related costs. The capitalisation of these expenses are supposed to increase with increased

capital expenditure and capitalisation year on year. The Commission finds no justification in reducing the capitalisation of other expenses in the APR for FY 2010-11.

The Commission, accordingly, retains the 'other expenses capitalised' at Rs. 51.07 crore, as approved in the Tariff order for FY 2010-11.

The total O&M expenses considered in the APR for FY 2010-11 are summarised in the table below:

Table 5.11: O&M expenses considered in the APR for FY 2010-11

(Rs. crore)

Sl. No.	Particulars	FY 2010-11		
		Tariff order	Claimed in RE	Considered for APR
1.	Employee cost	116.52	165.00	158.52
2.	Repairs & Maintenance expenses	32.48	18.00	18.00
3.	Administration & General charges	29.20	33.00	29.20
4.	Other debits	1.09	4.00	1.09
5.	Extraordinary items	1.50	-	-
6.	Net prior period expenses	-	-	-
7.	Other expenses capitalized	(51.07)	(39.00)	(51.07)
8.	Total O&M expenses	129.72	181.00	155.74

5.5.9 Capital expenditure

The DGVCL has estimated the capital expenditure at Rs. 318 crore in the APR for FY 2010-11, as against Rs. 250.95 crore approved in the MYT Order for FY 2009-10 and Rs. 297.87 crore projected in the ARR petition for FY 2010-11, as detailed in the Table below:

Table 5.12: Capital expenditure projected in the RE for FY 2010-11

(Rs. crore)

	Capital Expenditure Total	298.00	63.00	318.00	(20.00)

Petitioner's submission

The DGVCL has submitted that it has revised the capital expenditure to Rs. 318 crore during FY 2010-11 and this is higher than that approved by the Commission. DGVCL has submitted that two new projects, Forest Village Electrification and Tatkal Schemes are scheduled to be completed by the end of FY 2010-11 and FY 2011-12.

The details of the schemes are as detailed below:

Tatkal Scheme- 2010

To clear the huge backlog of pending Agriculture Applications all over the State under normal scheme (Non dark Zone area), the Tatkal Scheme-2010 has been launched. This will help reduce the long time gap which applicants' today face for getting an electricity connection.

Under Tatkal Scheme-2010, applications are invited from registered pending applicants, who have registered their applications up to 30/09/2010 in Non dark zone only to switch over to Tatkal scheme-2010. Initially, the scheme was introduced for SPA only and later on, to switch over from TASP scheme. Previously cancelled applications, under closed Tatkal schemes, can also be got revived. However, the Tatkal Scheme -2010 has not been allowed for new applications.

The cost payable by the Applicant for agriculture connection under the proposed Tatkal Scheme will be towards 80% amount of Technical Sanction (excluding Service Charges) and 20% cost to be borne by DGVCL, Service Charges, Security Deposit, Agreement fee, Test report fee, etc.

Electrification of Forest Villages

There are 19 villages and 03 Petapara already electrified with solar cells but solar cells are not working properly. There are 3 villages and 2 Petapara yet to be electrified in Shoolpaneshwar Wildlife Sanctuary in Narmada District. The Government of Gujarat under “Swarnim Sidhhi” goal, has resolved to electrify all these 22 villages and 5 Petapara by conventional way of electrification by 31.03.2011.

Since the above villages and Petapara are situated in the Shoolpaneshwar Wildlife Sanctuary of the forest area, DGVCL had sought the approval from the Forest Department with a proposal of combination of underground cable & HT overhead lines. After receipt of the Approval dated 2nd February, 2011 from the Department, the work has been started. Approx. 150 Kms. of underground cable and 140 Kms. of overhead lines are to be laid for the electrification of these forest villages/Petaparas. The orders for laying overhead infrastructure and underground cables have been placed and work is in progress. The entire expenditure shall be booked under TASP scheme.

The DGVCL has estimated the funding of capital expenditure, as detailed in the Table below:

Table 5.13: Funding of capital expenditure projected in the APR for FY 2010-11

(Rs. crore)

Sl. No.	Particulars	FY 2010-11 (Approved)	FY 2010-11 (H1)	FY 2010-11 (RE)	Deviation
1.	Capitalisation	250.00	63.00	318.00	(68.00)
2.	Less:	61.00	21.00	60.00	1.00

Dakshin Gujarat Vij Company Limited
Truing up for FY 2009-10, APR for FY 2010-11,
ARR for FY 2011-12 to FY 2015-16 and Tariff for FY 2011-12

Sl. No.	Particulars	FY 2010-11 (Approved)	FY 2010-11 (H1)	FY 2010-11 (RE)	Deviation
	Consumer Contribution				
3.	Grants	134.00	18.00	148.00	(14.00)
4.	Balance CAPEX	55.00	24.00	110.00	(56.00)
5.	Debt @ 70%	38.00	20.00	77.00	(39.00)
6.	Equity @ 30%	16.00	4.00	33.00	(17.00)

Commission's Analysis

The Commission has examined the submission made by DGVCL in respect of the proposed increase in the CAPEX in the APR for FY 2010-11. The actual capital expenditure incurred during FY 2009-10 is Rs. 189.91 crore and the capitalisation is Rs. 177.22 crore. With reference to a query from the Commission DGVCL has indicated the provisional CAPEX for FY 2010-11 at Rs. 212.00 crore and capitalization at Rs. 156.00 crore vide DGVCL letter dated 10th June, 2011.

The Commission, accordingly, considers the CAPEX at Rs. 212.00 crore and capitalisation at Rs. 156.00 crore in the APR for FY 2010-11.

The CAPEX, capitalization and funding claimed by DGVCL and considered by the Commission are as given in the table below:

Table 5.14: Capitalisation and sources of funding considered in the APR for FY 2010-11
(Rs. crore)

Sl. No.	Particulars	Claimed in truing up for FY 2010-11	Considered for APR for FY 2010-11
1.	Capitalisation	318.00	156
2.	Less:		
	Consumer contribution	60.00	60.9
	Grants	148.00	95.1
3.	Balance CAPEX	110.00	0
4.	Debt @ 70%	77.00	0.00
5.	Equity @ 30%	33.00	0.00

5.5.10 Depreciation

The DGVCL has estimated the depreciation at Rs. 108.00 crore in the APR for FY 2010-11, as against Rs. 114.06 crore approved in the Tariff order for FY 2010-11, as detailed in the Table below:

Table 5.15: Fixed Assets and Depreciation projected in the APR for FY 2010-11

(Rs. crore)

Sl. No.	Particulars	FY 2010-11 (Approved)	FY 2010-11 (H1)	FY 2010-11 (RE)	Deviation
1.	Gross Block in Beginning of the year	2,039.00	1,894.00	1,894.00	
2.	Additions during the year	250.00	-	318.00	

Dakshin Gujarat Vij Company Limited
Truing up for FY 2009-10, APR for FY 2010-11,
ARR for FY 2011-12 to FY 2015-16 and Tariff for FY 2011-12

Sl. No	Particulars	FY 2010-11 (Approved)	FY 2010-11 (H1)	FY 2010-11 (RE)	Deviation
3.	Depreciation for the Year	114.00	50.00	108.00	6.00
4.	Average Rate of Depreciation	5.27%	5.27%	5.27%	

Petitioner's submission

The DGVCL has submitted that the depreciation has been revised in the APR based on the revised capital expenditure. DGVCL has further submitted that the revised estimate of depreciation for FY 2010-11, as against the value approved by the Commission, resulted in a net uncontrollable gain of Rs. 6 crore, as detailed in the Table below:

Table 5.16 : Gains / (Loss) due to deprecation claimed in the APR for FY 2010-11
(Rs. crore)

Particulars	FY 2010-11 (Approved)	FY 2010-11 (RE)	Gain/(Loss) due to Controllable Factor	Gain/(Loss) due to Uncontrollable Factor
Depreciation	114.00	108.00	-	6.00

Commission's Analysis

The Commission has observed that the petitioner has computed the depreciation for FY 2009-10 using CERC depreciation rates, asset classification wise. The opening balance of GFA as on 01/04/2010 is Rs. 1893.75 crore. The Commission has computed the depreciation based on the opening balance of GFA and addition considered for FY 2010-11, as detailed in the Table below:

Table 5.17: Depreciation considered in the APR for FY 2010-11
(Rs. crore)

Particulars	FY 2010-11			
	MYT order	Tariff order	Claimed in RE	Considered for APR
Gross block in the beginning of the year	2109.20	2039.39	1894.00	1893.75
Additions during the year	250.95	250.16	318.00	156
Average rate of depreciation	3.62%	5.27%	5.27%	5.27%
Depreciation for the year	77.61	114.06	108.00	103.91

The Commission, accordingly, considers the depreciation at Rs. 103.91 crore in the APR for FY 2010-11.

5.5.11 Interest and Finance charges

The DGVCL has estimated the interest and finance charges at Rs. 62.00 crore in the APR for FY 2010-11, as against Rs. 65.43 crore approved in the Tariff order for FY 2010-11, as detailed in the Table below:

Table 5.18: Interest and Finance charges claimed in the APR for FY 2010-11

(Rs. crore)

Sl. No.	Particulars	FY 2010-11 (Approved)	FY 2010-11 (H1)	FY 2010-11 (RE)	Deviation
1.	Opening Loans	271.00	289.00	289.00	(19.00)
2.	Loan Addition during the Year	38.00	20.00	77.00	
3.	Repayment during the year	27.00	-	29.00	
4.	Closing Loans	282.00	309.00	338.00	
5.	Average Loans	277.00	299.00	314.00	
6.	Interest on Loan	27.00	15.00	30.00	(3.00)
7.	Interest in Security Deposit	37.00	15.00	31.00	6.00
8.	Guarantee Charges	1.00	1.00	1.00	0
9.	Total Interest and Financial Charges	65.00	31.00	62.00	4.00
10.	Weighted Average Rate of Interest	9.85%	10.16%	9.63%	

Petitioners' submission

The DGVCL has submitted that it has considered closing balance of loans of FY 2009-10 as the basis for estimation of interest on loans and mentioned that the loan addition in FY 2010-11 is computed at Rs. 77.00 crore consisting of loans for funding the capital expenditure. The repayment has been considered as 10% of the opening balance of loan and the weighted average rate of interest worked out to 9.63%. The interest on security deposit and guarantee charges have been considered, based on the actual for FY 2009-10.

The DGVCL has further submitted that the revised estimate of interest and finance charges of FY 2010-11, as against the value approved by the Commission, resulted in a net gain of Rs. 4 crore on account of uncontrollable factor, as detailed in the Table below:

Table 5.19: Gain / (Loss) due to interest and financial charges claimed in the APR for FY 2010-11

(Rs. Crore)

Particulars	FY 2010-11 (Approved)	FY 2010-11 (RE)	Gain/(Loss) due to Controllable Factor	Gain/(Loss) due to Uncontrollable Factor
Interest and Finance Charges	65.00	62.00	-	4.00

Commission's Analysis

The Commission has observed that the opening balance of loans for FY 2010-11 is adopted by the DGVCL as per the closing balance of loans claimed in the truing up for FY 2009-10. However, the addition of loan is considered by DGVCL at Rs. 77 crore while the debt considered based on capitalisation approved in the table 5.14 is Rs. 38.42 crore for FY 2010-11. The Commission has taken this Rs. 38.42 crore as loan addition for FY 2010-11. Regarding interest on security deposit, the opening balance of security deposit for FY 2010-11 is Rs. 651.14 crore as per the audited accounts and the interest on this @ 6% works out to Rs. 39.07 crore. The Commission considers Rs. 39.07 crore towards interest on security deposit. The guarantee charges claimed are Rs. 1.00 crore. This is as approved in the truing up for FY 2009-10. Taking all these into consideration, the Commission has computed the interest and finance charges in the APR for FY 2010-11, as detailed in the Table below:

Table 5.20: Interest and Finance charges considered in the APR for FY 2010-11

(Rs. crore)

Sl. No.	Particulars	FY 2010-11	
		Claimed in RE	Considered for APR
1.	Opening loans	289.00	304.39
2.	Loan additions during the year	77.00	0
3.	Repayment during the year	29.00	30.44
4.	Closing loans	338.00	273.95
5.	Average loans	314.00	289.17
6.	Rate of interest	9.63%	9.63%
7.	Interest on loans	30.00	27.85
8.	Interest on security deposit	31.00	39.07
9.	Guarantee charges	1.00	1
10.	Total interest and finance charges	62.00	67.92

The Commission, accordingly, considers the interest and finance charges at Rs. 67.92 crore in the APR for FY 2010-11.

5.5.12 Interest on working capital

The DGVCL has estimated the interest on working capital at Rs. 78.00 crore in the APR for FY 2010-11, as against Rs. 38.95 crore approved in the Tariff order for FY 2010-11, as detailed in the Table below:

Table 5.21: Interest on Working Capital claimed in the APR for FY 2010-11

(Rs. crore)

Sl. No.	Particulars	FY 2010-11 (Approved)	FY 2010-11 (H1)	FY 2010-11 (RE)	Deviation
1.	O & M Expenses	15.00	6.00	15.00	
2.	Maintenance Spares	22.00	9.00	21.00	
3.	Receivables	343.00	362.00	724.00	
4.	Total Working Capital	380.00	378.00	760.00	
5.	Rate of Interest on Working Capital	10.25%	10.25%	10.25%	
6.	Interest on Working Capital	39.00	19.00	78.00	(39.00)

Petitioner's submission

The petitioner has submitted that the interest on working capital has been calculated on normative principles as per the Terms and Conditions of Tariff Regulations at an interest rate of 10.25%, the Short-term Prime Lending Rate of SBI, as on 01/04/2004.

The DGVCL has further submitted that the normative amount of interest on working capital for FY 2010-11, as against the amount approved in Tariff order for FY 2010-11, resulted in a net uncontrollable loss of Rs. 39.00 crore, as detailed in the Table below:

Table 5.22: Treatment of Interest on Working Capital

(Rs. crore)

Particulars	FY 2010-11 (Approved)	FY 2010-11 (RE)	Gain/(Loss) due to Controllable Factor	Gain/(Loss) due to Uncontrollable Factor
Interest on Working Capital	39.00	78.00	-	(39.00)

Commission's Analysis

The Commission has examined the computation of interest on working capital submitted by DGVCL and observed that receivables equivalent to two months' sales have been claimed by DGVCL in the ARR for FY 2010-11, as against one month sales approved in the Tariff order for FY 2010-11. The Commission had considered receivables equivalent to one month's sales as proposed by the petitioner in the ARR petition for FY 2010-11. The working capital and interest on working capital are recomputed taking into consideration the receivables equivalent to one month's sales, as detailed in the Table below:

Table 5.23: Interest on working capital considered in the APR for FY 2010-11

(Rs. crore)

Sl. No.	Particulars	Claimed in RE FY 2010-11	Considered for APR for FY 2010-11
1.	O&M expenses for one month	15.00	12.98
2.	Maintenance spares 1% of GFA	21.00	18.94
3.	Receivables one month's sales	724.00	385.58
4.	Total working capital	760.00	417.50
5.	Rate of interest on working capital	10.25%	10.25%
6.	Interest on working capital	78.00	42.79

The Commission, accordingly, considers the interest on working capital at Rs. 42.79 crore in the APR for FY 2010-11.

5.5.13 Provision for bad debts

The DGVCL has claimed Rs. 9.00 crore towards bad debts in the APR for FY 2010-11, as against Rs. 4.12 crore approved in the Tariff order for FY 2010-11 and claimed loss of Rs. 5.00 crore on account of controllable factor, as detailed in the Table below:

Table 5.24: Gain / loss claimed due of bad debts in the APR for FY 2010-11

(Rs. crore)

Particulars	FY 2010-11 (Approved)	FY 2010-11 (RE)	Gain/(Loss) due to Controllable Factor	Gain/(Loss) due to Uncontrollable Factor
Provision for bad debts	4.00	9.00	(5.00)	-

Petitioner's submission

The DGVCL has submitted that the provision for bad debts has been calculated at 0.2% of revenue from existing tariff considering substantial addition to the BPL consumer category.

Commission's Analysis

The Commission had approved the bad debts @ 0.10% of the revenue in the Tariff order of FY 2010-11. The DGVCL has estimated the revenue from sale of power at Rs. 4627 crore in the APR for FY 2010-11. The bad debts at 0.1% of the revenue work out to Rs. 4.63 crore.

The Commission, accordingly, considers the provision for bad debts at Rs. 4.63 crore, as detailed in the Table below:

Table 5.25: Provision for bad debts considered in the APR for FY 2010-11

(Rs. crore)

Particulars	FY 2010-11		
	ARR order	Claimed in RE	Considered for APR
Provision for bad debts	4.12	9.00	4.63

5.5.14 Return on equity

The DGVCL has estimated the return on equity at Rs. 53.00 crore in the APR for FY 2010-11, as against Rs. 56.47 crore approved in the Tariff order for FY 2010-11, as detailed in the Table below:

Table 5.26: Return on Equity claimed in the APR for FY 2010-11

(Rs. crore)

Sl. No.	Particulars	FY 2010-11 (Approved)	FY 2010-11 (H1)	FY 2010-11 (RE)	Deviation
1.	Opening Equity Capital	395.00	361.00	361.00	34.00
2.	Equity additions during the Year	16.00	4.00	33.00	(17.00)
3.	Closing Equity	412.00	365.00	394.00	18.00
4.	Average Equity	403.00	363.00	377.00	26.00
5.	Rate of Return on Equity	14%	14%	14%	
6.	Return on Equity	56.00	25.00	53.00	4.00

Petitioner's submission

The petitioner has submitted that return on equity has been computed @ 14% on the average equity based on the opening balance of equity and additions during the year. The comparison of the normative return on equity for FY 2010-11, as against the amount approved in the Tariff Order, resulted in a controllable gain of Rs. 4.00 crore, as detailed in the Table below:

Table 5.27: Treatment of return on equity

(Rs. crore)

Particulars	FY 2010-11 (Approved)	FY 2010-11 (RE)	Gain/(Loss) due to Controllable Factor	Gain/(Loss) due to Uncontrollable Factor
Return on Equity	56.00	53.00	4.00	-

Commission's Analysis

The Commission has computed the return on equity @ 14% on the average equity for FY 2010-11 taking into consideration the closing balance of equity of Rs. 381.35 crore for FY 2009-10 as the opening balance for FY 2010-11 and addition of equity of

Rs. 16.47 crore during the year, as approved in table 5.14 detailed in the Table below:

Table 5.28: Return on equity considered in the APR for 2010-11

(Rs. crore)

Sl. No.	Particulars	FY 2010-11	
		Claimed in RE	Considered in APR
1.	Opening Equity Capital	361.00	381.35
2.	Equity additions during the Year	33.00	0
3.	Closing Equity	394.00	381.35
4.	Average Equity	377.10	381.35
5.	Return on Equity @14%.	53.00	53.39

The Commission, accordingly, considers the return on equity at Rs. 53.39 crore in the APR for FY 2010-11.

5.5.15 Taxes

The DGVCL has estimated the income tax at Rs. 11.00 crore in the APR for FY 2010-11, as against Rs. 0.58 crore approved in the Tariff order for FY 2010-11 and computed the gains / losses, as detailed in the Table below:

Table 5.29: Provision for taxes claimed in the APR for FY 2010-11

(Rs. crore)

Particulars	FY 2010-11 (Approved)	FY 2010-11 (RE)	Gain/(Loss) due to Controllable Factor	Gain/(Loss) due to Uncontrollable Factor
Provision for Tax/Tax Paid	1.00	11.00	-	(10.00)

Petitioner's submission

The petitioner has submitted that it has estimated the tax at Rs. 11.00 crore at MAT rate of 19.93% and stated that income tax is a statutory expense and should be allowed without any deduction.

Commission's Analysis

The Commission considers the income tax at Rs.11 crore @ MAT rate of 19.93% as claimed by DGVCL in the APR for FY 2010-11 as detailed in the Table below:

Table 5.30: Provision for taxes considered in the APR for FY 2010-11

(Rs. crore)

Particulars	FY 2010-11		
	ARR order	Claimed in RE	Considered for APR
Income tax	0.58	11.00	11.00

The Commission, accordingly, considers the tax on income at Rs. 11.00 crore in the APR for FY 2010-11.

5.5.16 Non-tariff income

The DGVCL has estimated the non-tariff at Rs. 89.00 crore in the APR for FY 2010-11, as against Rs. 95.22 crore approved in the Tariff order for FY 2010-11 and claimed loss of Rs. 7 crore, as detailed in the Table below:

Table 5.31: Non-tariff income claimed in the APR for FY 2010-11

(Rs. crore)				
Particulars	FY 2010-11 (Approved)	FY 2010-11 (RE)	Gain/(Loss) due to Controllable Factor	Gain/(Loss) due to Uncontrollable Factor
Total Non Tariff Income	95.00	89.00	7.00	-

Commission's Analysis

The DGVCL has not submitted any explanation or justification for estimating the non-tariff income lower than what was approved in the Tariff Order for FY 2010-11.

The Commission is not inclined to accept the revision of non-tariff income and retains this at the level approved in the Tariff Order for FY 2010-11, as detailed in the Table below:

Table 5.32: Non-tariff income considered in the APR for FY 2010-11

(Rs. crore)			
Particulars	ARR order	Claimed in RE	Considered for APR
Non-tariff income	95.22	89.00	95.22

The Commission considers the non-tariff income at Rs. 95.22 crore in the APR for FY 2010-11.

5.6 Revenue from sale of power

The DGVCL has estimated the revenue at Rs. 4685.00 crore (excluding agriculture subsidy) in the APR for FY 2010-11, as against Rs. 4326.00 crore approved in the Tariff Order for FY 2010-11, as detailed in the Table below:

Table 5.33: Revenue claimed in the APR for FY 2010-11

Sl. No.	Particulars	(Rs. crore)		
		FY 2010-11 (Approved)	FY 2010-11 (H1)	FY 2010-11 (RE)
1.	Revenue with Existing Tariff	4194.00	2378.00	4564.00
2.	Other Income (Consumer related)	78.00	32.00	63.00
3.	Total Revenue excluding Subsidy(1+2)	4272.00	2409.00	4627.00
4.	Agriculture Subsidy	54.00	-	57.00
5.	Total Revenue including subsidy	4326.00	2409.00	4685.00

The DGVCL has submitted that it has revised its estimate of revenue to Rs. 4685 crore, as against Rs. 4326 crore approved in the Tariff order for FY 2010-11. DGVCL has recovered revenue of Rs. 2409 crore in the H1 of FY 2010-11 based on which the revenue is projected for H2 of FY 2010-11 considering the same at per unit realisation.

Commission's Analysis

The Commission has observed that the total revenue, including subsidy approved in the Tariff order for FY 2010-11, is Rs. 4251.41 crore but not Rs. 4326 crore as given in Table 61 of the petition. The revenue from existing tariff is shown as Rs. 4194.00 crore, instead of Rs. 4119.42 crore. The difference of Rs. 75 crore is due to the above error.

The Commission takes into consideration the revenue at Rs. 4685 crore, including subsidy, as estimated by DGVCL in the APR for FY 2010-11.

5.7 ARR considered in the APR of FY 2010-11

The Commission has reviewed the performance of DGVCL under Regulation 9.3 of MYT Regulations, 2007 with reference to the performance of the company during the first half year of FY 2010-11.

The Aggregate Revenue Requirement (ARR), approved in the Tariff order dated 31st March, 2010, claimed in the revised estimate for FY 2010-11 and considered by the Commission in the performance review for FY 2010-11 is given in the Table below:

Dakshin Gujarat Vij Company Limited
Truing up for FY 2009-10, APR for FY 2010-11,
ARR for FY 2011-12 to FY 2015-16 and Tariff for FY 2011-12

Table 5.34: ARR considered in the APR for FY 2010-11

(Rs. crore)

Sl. No.	Particulars	Tariff Order dated 31/03/2010	Claimed in RE FY 2010-11	Considered for APR for FY 2010-11	Deviation (3-5)

16	Net ARR (14-15)	4454.48	4341.00	4256.83	197.65

The comparison of revised estimate of DGVCL in FY 2010-11 with the approved APR in the Tariff order dated 31st March, 2010 resulted in a deviation of Rs. 197.65 crore.

The actual performance for FY 2010-11 will be reviewed with reference to the audited annual accounts for FY 2010-11 and sharing of gains / losses as per GERC Regulations will be considered at the time of truing up for FY 2010-11.

6. Aggregate Revenue Requirement (ARR) for the FY 2011-12 to FY 2015-16, the control period and determination of tariff for FY 2011-12

6.1 Energy Sales

Proper estimation of category-wise energy sales for the control period is essential to arrive at the quantum of power to be purchased and the likely revenue by sale of energy.

This section examines in detail the consumer category-wise energy sales projected by DGVCL in its MYT Petition for the control period FY 2011-12 to FY 2015-16 for approval of ARR.

6.2 Consumer Category

The DGVCL serves over 20 lakh consumers within its license area and the consumers are broadly categorised as under:

LT category

- Residential
- Commercial
- Industrial - LT
- Agricultural
- Public water works
- Public lighting/street lighting

HT category

- Industrial - HT
- Railway traction

The DISCOM serves the consumers at different voltages at which the consumers avail supply.

All the consumer connections, other than agriculture are metered. Even the agriculture consumers, who are connected since October, 2010 are metered. However, majority of agriculture consumer connections (which were connected prior

to October, 2010) are un-metered and their consumption is assessed based on the normative consumption approved by the Commission.

6.2.1 Overall approach to sales projections

The DGVCL has projected the energy sales for the control period, taking the actual sales for the year FY 2009-10 as its base. It is stated that methodology based on past trend has proved to be a reasonably accurate and well-accepted method for estimating the energy consumption, number of consumers and connected load. DGVCL has, therefore, estimated the energy sales, the number of consumers and connected load, based on compound annual growth rate (CAGR) during the past years. Wherever the average has seemed unreasonable or unsustainable, the growth factors have been adjusted by the DISCOM to arrive at more realistic projections.

Where the past data is fairly accurate and the patterns are well established, the methodology based on past data is a well established method for energy forecast. As such, the methodology adopted by the DGVCL is accepted by the Commission.

6.2.2 Category-wise projected energy sales for the control period FY 2011-12 to FY 2015-16

The DGVCL has furnished the category-wise sales over the last 5 years (FY 2005-06 to FY 2009-10) based on the actuals and projected the sales for the control period, FY 2011-12 to FY 2015-16 and also the underlying CAGR (5 year and 3 year) thereof. Category-wise sales over the last 5 years as furnished by the DGVCL are shown in the Table below:

Table 6.1: Historical data on category-wise energy sales

(MU)					
Particulars	FY 2005-06	FY 2006-07	FY 2007-08	FY 2008-09	FY 2009-10

6.2.4 Category-wise projected energy sales

Based on the growth rates of energy sales given in Table 6.2 above, DGVCL has projected category-wise energy sales for the control period FY 2011-12 to FY 2015-16, as given in the Table below. It is stated in the petition that the sales are projected for the control period with the figures of FY 2009-10. Later, it is clarified that the figures of FY 2010-11 (Revised Estimate), as furnished in the present petition, are taken as the base for projection of sales for the control period.

Table 6.7: Projected energy sales for the control period FY 2011-12 to FY 2015-16

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16

6.3 Detailed analysis of energy sales projected

The category-wise energy sales, given in Table 6.1, for the FY 2005-06 to FY 2009-10 are the actuals, the energy sales for the control period FY 2011-12 to FY 2015-16 are projected based on the 5 year / 3 year CAGR between the period FY 2005-06 and FY 2009-10 and year on year for the period between the years 2009 and 2010.

The DGVCL has projected the sales for the control period mostly based on past trends considering 5 year CAGR with the base numbers of FY 2010-11 (Revised Estimate) submitted to the Commission in the present petition under APR for FY 2010-11.

The percentage contribution of sales by each category on the total sales during the year FY 2010-11 are shown below:

Sl. No.	Category	Sales	Percentage
1	Residential	1694	17.6
2	Commercial	615	6.4
3	Industrial LT	2717	28.3
4	Public water works	106	1.1
5	Agriculture	562	5.9
6	Public lighting	32	0.3
7	Industrial HT	3609	37.5
8	Railway traction	283	2.9
	Total	9618	100.00

Since, the revised estimates submitted to the Commission in APR FY 2010-11 are the latest sales figures, it is considered appropriate to project the sales for the control period based on 2010-11 (Revised Estimate) figures.

6.3.1 Residential

The sales to this category constitute about 17.6% of total energy sales of the company. DGVCL has projected the energy sales to residential category for the control period, as given below:

Table 6.10: Energy sales projected for the residential category during the control period FY 2011-12 to FY 2015-16

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Residential Category (MU)	1881	2088	2317	2572	2855

Petitioner's submission

It is submitted by DGVCL that the company has witnessed a near two double digit growth in the units sold in the last 5 years to this category. The CAGR growth rate between FY 2005-06 and FY 2009-10 was 9.83%. The company expects growth of 11% every year for the control period FY 2011-16.

Commission's Analysis

The growth during the last 5 years was 9.83% and DGVCL expects a growth rate of 11% during the control period 2011-16. Since a number of households are still to be electrified, the growth of 11% is considered reasonable during the control period.

The Commission approves the energy sales to the residential category during the control period, as shown below:

Table 6.11: Energy sales approved for the residential category during the control period

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Residential category (MU)	1881	2088	2317	2572	2855

6.3.2 Commercial

The sales to this category constitute about 6.4% of total energy sales of the company.

The DGVCL has projected the energy sales to this category during the control period 2011-16, as shown below:

Table 6.12 : Energy sales projected for the Commercial category during the control period FY 2011-12 to FY 2015-16

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Commercial category (MU)	683	758	841	934	1036

Petitioner's submission

The DGVCL has submitted that the sales growth rate between FY 2005-06 and FY 2009-10 was 11.69%. The company expects growth rate of 11% for the control period.

Commission's Analysis

The CAGR over the 5-year period 2005-06 to 2009-10 was 11.69% and the growth over the 3-year period for FY 2009-10 over FY 2007-08 was 10.96%. The growth of 11% assumed by the DGVCL is considered reasonable as the Commercial Category is likely to maintain the same growth with the growth of the economy.

The Commission, therefore, approves the energy sales for the control period, as given in the Table below:

Table 6.13: Energy sales approved for Commercial category for the control period FY 2011-12 to FY 2015-16

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Commercial category (MU)	683	758	841	934	1036

6.3.3 Industrial (LT)

The consumption of this category accounts for about 28.3% of the total sales of the company. DGVCL has projected the sales of this category during the control period, as given below:

Table 6.14: Energy sales projected for Industrial (LT) category for the control period FY 2011-12 to FY 2015-16

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Industrial (LT) category (MU)	2880	3024	3175	3334	3500

Petitioner's submission

The DGVCL has submitted that sales growth between FY 2005-06 and FY 2009-10 was 6.72% and the company expects a growth rate of 6% for the FY 2011-12 and 5% for the rest of the years of control period.

Commission's Analysis

The CAGR of this category was 6.72% over a 5-year period FY 2005-06 to FY 2009-10 and 5.27% over a 3-year period FY 2007-08 to 2009-10 and the DISCOM expects the growth of 6% for FY 2011-12 and 5% for the rest of the control period. The 5 year CAGR of 6.72% may not sustain. Hence, 6% growth for FY 2011-12 and 5% growth for the remaining years of the control period as considered by DGVCL are approved.

The Commission approves the energy sales to the Industrial (LT) category during the control period FY 2011-12 to FY 2015-16, as projected by DGVCL and given in the Table below:

Table 6.15: Energy sales approved for Industrial (LT) category for the control period FY 2011-12 to FY 2015-16

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Industrial (LT) category (MU)	2880	3024	3175	3334	3500

6.3.4 Public water works

The sales to this category accounts for about 1% of total energy sales of the company. DGVCL has projected the sales of this category during the control period, as given in the Table below:

Table 6.16: Energy sales projected for Public water works) category for the control period FY 2011-12 to FY 2015-16

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Public water works category (MU)	115	126	137	149	163

Petitioner's submission

The DGVCL has submitted that the sales growth rate between FY 2005-06 and FY 2009-10 was 9.29% and the company expects a growth rate of 9% during the control period.

Commission's Analysis

The 5 year CAGR (2006-2010) of the category was 9.29% and 3 year CAGR (2008-2010) was 7.46% and the YoY growth for FY 2010 over FY 2009 is 9.0%. The petitioner has proposed a growth of 9% during the control period. The growth of 9% for this category during the control period appears feasible and may sustain during the control period, and hence approved.

The Commission approves the sales to public water works during the control period, as given in the Table below:

Table 6.17: Energy sales approved for Public water works category for the control period FY 2011-12 to FY 2015-16

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Public water works category (MU)	115	126	137	149	163

6.3.5 Agriculture (Irrigation pumpsets)

The consumption by agriculture (irrigation pumpsets) accounts for about 6% of total energy sales of the company. The consumption by irrigation pumpsets connected during the recent years only is metered and those related to earlier years are not metered. DGVCL has projected the energy sales during the control period, as given in the Table below:

Table 6.18: Energy sales projected for Agriculture (Irrigation Pumpsets) for the control period FY 2011-12 to FY 2015-16

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Agriculture category (MU)	774	834	893	903	903

Petitioner's submission

The DGVCL has submitted that for calculation of sales for un-metered consumers and metered consumers, sales at around 700 kWh/HP/annum are considered for metered consumer connections and 1700 kWh/HP/annum for un-metered consumer connections. For projection of sales for additional connections, 1200/kWh/HP/annum is taken. It is further submitted that the company has stopped issuing un-metered connections (A1 slab). Hence, no growth rate growth rate has been assumed for the A1 slab.

The number of connections, unit sales, load estimated and the projected sales to the category during the control period are given in the Table below:

Table 6.19: Projected number of new connections, connected load and consumption by Agriculture (Irrigation Pumpsets) for the control period FY 2011-12 to FY 2015-16

Particulars	No. of connections	Average HP of DISCOM	HP Increase	MW Increase	Per HP Consumption	Additional sale (MU)
FY 2010-11	6500	6.17	40132	30	1200	48
FY 2011-12	8000	6.17	49394	37	1200	59
FY 2012-13	8000	6.17	49394	37	1200	59
FY 2013-14	8000	6.17	49394	37	1200	59
FY 2014-15	1407	6.17	8687	6	1200	10
FY 2015-16	-	6.17	-	-	1200	-

Commission's Analysis

As mentioned earlier, there is a mix of un-metered and metered consumers in this category. The consumption of un-metered category is arrived at on normative basis of 1700 kWh/HP/annum, as fixed by the Commission. For metered consumption, the DGVCL is taking the consumption of about 700 kWh/HP/annum. It is submitted by the DGVCL that sales for additional connections (metered) would be projected at 1200/kWh/HP/annum. This is not acceptable to the Commission as all additional connections are metered.

While furnishing additional information called for by the Commission, DGVCL has stated that the consumption of metered category does not reflect the true consumption due to several factors including unauthorised use of energy.

In the additional information, the petitioner has also furnished the number of agricultural consumer connections, connected load in HP and the consumption for FY 2009-10 and FY 2010-11 (actuals), as given below:

FY 2009-10	Metered	Un-metered
Number of consumers	42777	45848
Connected load (HP)	261431	249221
Consumption (MU)	146	424
FY 2010-11		
Number of consumers	46503	45707
Connected load (HP)	282647	248759
Consumption (MU)	139	423

Based on the information available, the Commission has assessed the consumption of un-metered and metered connections for the control period as below:

- The total numbers of metered and un-metered consumer connections, as on 31st March, 2011, are 46503 and 45707 respectively and the connected load is 282647 HP and 248664 HP for metered and un-metered category respectively.
- Since DGVCL has stated that it is not releasing any un-metered connections during the control period, the number of connections projected to be released during each year of the control period are added to the number of metered consumers as on 31st March, 2011. The un-metered connections will remain constant as no new un-metered connection will be released during the control period.
- The consumption for the un-metered is adopted at 1700 kWh/HP/annum, as per the norm fixed by the Commission.
- The weighted average consumption of metered consumers during FY 2009-10 and FY 2010-11 is considered for assessing the consumption during the control period for the existing and new metered consumer connections being added during the control period. The weighted average consumption works out to 524 kWh/HP/annum for DGVCL.

Based on the above, the energy consumption for Agriculture consumers is computed during the control period as shown in the Table below:

Table 6.20 Approved consumption by Agricultural consumers during the control period FY 2011-12 to FY 2015-16

Metered/ Unmetered	Number of consumers	Connected Load (HP)	Energy Consumption (MU)
FY 2010-11			
Unmetered	45707	248759	423

The Commission approves the energy sales for the Agricultural consumers for the control period, as given in the Table below:

Table 6.21 Approved consumption by Agriculture consumers

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Agriculture category Sales (MU)	597	623	649	653	653

6.3.6 Streetlights

The consumption of streetlights accounts for about 0.3% of total sales of the company. DGVCL has projected the energy sales of this category for the control period, as given in the Table below:

Table 6.22 Projected energy sales for Streetlights

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Streetlights (MU)	34	36	38	40	43

Petitioner's submission

The DGVCL has submitted that the sales growth rate of this category was 6.87% during the 5-year period FY 2005-06 to FY 2009-10. The company expects a growth rate of 6% for the control period.

Commission's Analysis

The 5-year CAGR and 3-year CAGR growth rates were 6.87% and 5.41% respectively. DGVCL has projected a growth rate of 6%. In view of the potential for growth, the growth of 6% assumed by the company is approved.

The Commission approves the sales to Streetlights for the control period, as given in the Table below:

Table 6.23: Energy sales approved for Streetlights

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Streetlights (MU)	34	36	38	40	43

6.3.7 Industrial (HT)

The sales to this category accounts for about 37.5% of the total sales of the company. DGVCL has projected the sales to this category during the control period as below:

Table 6.24: Projected energy sales for Industrial (HT)

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Industrial (HT) (MU)	3789	3979	4178	4387	4606

Petitioner's submission

The DGVCL has submitted that the sales growth rate between FY 2005-06 and FY 2009-10 was 4.26% and it expects 5% growth in the control period.

Commission's Analysis

The growth rates of this category were 4.26%, 5.57% and 4.8% over 5 year, 3 year and YoY 2011/2010 between the period FY 2005-06 and FY 2009-10. The DGVCL has adopted a growth rate of 5%. The growth projected by DGVCL is considered to be realistic, compared to past growth. Hence, the growth assumed is approved.

The Commission approves the energy sales to Industry (HT) during the control period, as given in the Table below:

Table 6.25: Approved energy sales for Industrial (HT)

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Industrial (HT) (MU)	3789	3979	4178	4387	4606

6.3.8 Railway Traction

The Railway traction load accounts for about 3% of the total sales of the company. DGVCL has projected the sales to this category during the control period, as shown below:

Table 6.26: Approved energy sales for Railway traction

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Railway Traction (MU)	294	306	318	331	344

Petitioner's submission

It is submitted by DGVCL that the sales growth rate of this category was 4.97% over a 5-year period between FY 2005-06 and FY 2009-10. It is stated that the company expects the growth at 4% during the control period.

Commission's Analysis

The growth rates of 5 year, 3 year CAGR and YoY periods were 4.97%, 3.89% and 4.6% respectively. It is a single consumer and the load is stable over the years. The projection at a growth rate of 4% assumed by DGVCL is considered reasonable for the control period.

The Commission approves the sales to railway traction load, as given in the Table below:

Table 6.27: Energy sales approved for the Railway traction

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Railway Traction (MU)	294	306	318	331	344

6.3.9 Total Energy Sales

Total energy sales, as projected by DGVCL and as approved by the Commission for the control period, are given in the Tables below:

Table 6.28: Energy sales projected by the DGVCL for the control period FY 2011-12 to FY 2015-16

(MU)

6.4 Distribution losses

The DGVCL has projected the distribution losses for the control period, as given below:

Table 6.30: Projected distribution losses for the control period

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Distribution Losses (%)	13.20	12.95	12.70	12.45	12.20

Petitioner's submission

The DGVCL has submitted that it has achieved significant reduction in distribution losses during recent years. The efforts will continue and will be enhanced.

It is further submitted that the loss reduction is a slow process and becomes increasingly difficult as the loss levels come down. In view of this, it is assumed that the distribution loss projected during FY 2011-12 to FY 2015-16 will reduce at lower than earlier projected percentage.

Commission's Analysis

The Commission, in its Tariff Order dated 31st March, 2010 for FY 2010-11, considered the distribution loss of 12.45% same as in the MYT Order for FY 2010-11.

But DGVCL has projected higher loss level of 13.45%, as furnished in APR for FY 2010-11.

The petitioner has however, projected a loss level of 13.20% for FY 2011-12 with loss reduction trajectory, as given in Table 6.30 above. The Commission considers the loss level of 13.20% for FY 2011-12 as on the higher side as compared to the loss level of 12.45% approved in the tariff order for FY 2010-11, particularly, when the load is predominantly industrial. The DISCOM shall make efforts to attain a loss level of 12.35% for FY 2011-12, against 12.45% approved in Tariff Order dated 31st March, 2010 for the FY 2010-11.

The Commission approves the distribution loss trajectory for the control period, as given in the Table below:

Table 6.31: Distribution losses approved for the control period FY 2011-12 to FY 2015-16

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Distribution losses of DGVCL (%)	12.35	12.00	11.75	11.50	11.50

6.5 Energy requirement

The total energy requirement of a distribution company to meet its total demand of its consumers would be the sum of estimated energy sales and the system losses (Distribution losses), as approved by the Commission.

The estimated energy sales, the distribution losses and estimated energy requirement for the control period FY 2011-12 to FY 2015-16 as projected by DGVCL are given in the table below:

Table 6.32: Total projected energy requirement during the control period

Sl. No.	Particulars	Units	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
1.	Estimated energy sales (MU)	MU	10450	11149	11897	12650	13451
2.	Distribution losses	MU	1589	1659	1731	1799	1869
		%	13.20	12.95	12.70	12.45	12.20
3.	Energy input required at the distribution periphery	MU	12039	12808	13628	14449	15320

Commission's Analysis

Based on the energy sales and the distribution losses approved by the Commission in paragraphs 6.2.9 and 6.3, and tables 6.28 and 6.31 the energy requirement is arrived at, as given in the Table below:

Table 6.33: Total approved energy requirement during the control period

Sl. No.	Particulars	Units	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
1.	Estimated energy sales (MU)	MU	10273	10940	11653	12400	13200
2.	Distribution losses	MU	1447	1492	1552	1611	1715
		%	12.35	12.00	11.75	11.50	11.50
3.	Energy input required at the distribution periphery	MU	11720	12432	13205	14011	14915

6.6 Energy balance

The summary of energy balance projected by DGVCL is as given below:

Table 6.34: Summary of energy balance projected by DGVCL

Sl. No.	Particulars	Units	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
1.	Estimated energy sales	MU	10450	11149	11897	12650	13451
2.	Distribution losses	MU	1589	1659	1731	1799	1869
		%	13.20	12.95	12.70	12.45	12.20
3.	Energy input required at the distribution periphery	MU	12039	12808	13628	14449	15320
4.	Transmission losses	MU	561	589	620	649	688
		%	4.45	4.40	4.35	4.30	4.30
5.	Total energy to be input to transmission system	MU	12600	13397	14248	15098	16008
6.	Pooled losses in PGCI system	MU	147	275	281	325	372
7.	Total energy requirement	MU	12747	13672	14529	15423	16380

Commission's Analysis

The DGVCL has considered the transmission loss of 4.45% to 4.30% for the control period. The Commission has approved transmission loss of 4.12% for GETCO and the total energy requirement is computed with transmission loss of 4.12% for the

entire control period. The Commission approves the pool losses, which are determined by the RLDC as projected by DGVCL, subject to review in the truing up. Based on the approved energy sales, distribution losses and transmission losses, the approved energy balance is as given in the Table below:

Table 6.35: Approved energy balance for the control period

Sl. No.	Particulars	Units	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
1.	Energy sales	MU	10273	10940	11653	12400	13200
2.	Distribution losses	MU	1447	1492	1552	1611	1715
		%	12.35	12.00	11.75	11.50	11.50

8.	Total energy requirement	MU	12371	13241	14053	14938	15928

6.7 Revenue Requirement for the control period FY 2011-12 to FY 2015-16

The components for calculation of revenue requirement (total expenses) for the control period FY 2011-12 to FY 2015-16 are as follows:

- Power purchase cost
- Operation and maintenance expenses
- Depreciation
- Interest on loans and finance charges
- Interest on working capital
- Provision for bad debts
- Return on equity
- Provision for tax

The projected expenses by DGVCL under each head and the analysis and decisions of the Commission are discussed below:

6.8 Power Purchase cost

6.8.1 Bulk supply tariff

Petitioner's submission

The DGVCL has submitted that when the erstwhile Gujarat Electricity Board (GEB) was unbundled into seven entities, it was decided by the State Government that Gujarat Urja Vikas Nigam Limited (GUVNL) shall purchase the entire power requirement from GSECL, central generating stations, traders, MPPs, IPPs and any other source to meet the demand of DISCOMs and shall perform the activity of bulk supplier of power to all the four Distribution companies at bulk supply tariff. In accordance with the arrangement related to power procurement, the distribution licensees have entered into bulk supply arrangement / agreement with GUVNL to meet the supply obligation.

It is also submitted by DGVCL that the State Government, as envisaged, shall ensure uniform retail supply tariff in the four DISCOMs (of the unbundled GEB), so that the consumers in the similar category in the State could have a similar tariff.

It is further submitted that since 70% - 80% of the total cost incurred by DISCOMs is for power purchase, the same plays a major role in determining the ARR, as well as gap / (surplus) for the DISCOMS, for a particular year. Since the consumer profile and consumption pattern are different in the four distribution companies, the revenue earning capabilities of each of the DISCOMs differs - resulting in different Annual Revenue Requirement. Therefore, it is necessary to build a mechanism in the projection to bring them to a level-playing field. This is proposed to be achieved by differential bulk supply tariff (BST) to each of the DISCOMs to ensure uniform retail consumer tariffs in the four DISCOMs.

6.8.2 Power purchase sources

Petitioner's submission

The various sources of power purchase by GUVNL consist of: State generating plants (GSECL), central sector – NTPC and NPC, renewable sources of power – hydro, solar and wind, IPPs, other sources, etc. The power purchase sources have

been differentiated into existing and additional capacity envisaged during the control period.

(i) Existing capacity with GUVNL

The existing capacity contracted by GUVNL, consists of: GSECL plants, IPPs, central sector plants and renewable sources, RLNG gas based plants where the plants are commissioned before 31st March, 2010. The names of the existing power plants, their operational parameters, capacity allocated to GUVNL, their fixed cost as per capacity contracted, along with the variable cost of generation per unit are given below:

Table 6.36: Existing capacity contracted by GUVNL, as furnished by DGVCL

The existing contracted capacity tied up by DGVCL as on 31st March, 2010 is 10964 MW.

(ii) Capacity additions for FY 2011-12 to FY 2015-16

The capacity addition available for the State, which includes capacity additions of GSECL, central stations, IPPs and others and competitive bidding capacity, is given in the Table below with details of capacity allocated to Gujarat and unit-wise tentative commissioning schedule. PPAs are already entered into for various stations and are expected to get commissioned during the control period FY 2011-12 to FY 2015-16. GUVNL will purchase power from these stations.

6.8.3 Power purchase cost

Petitioner's submission

The DGVCL has submitted that, in order to minimise the power purchase cost, GUVNL has worked out a comprehensive merit order despatch (MOD) as shown below:

- The dispatch from individual generating stations is worked out, based on the merit order for the variable cost of each generating unit.
- The NPC power plants, renewable, captive power plants and hydro plants have been considered as must run power plants. Hence, they have been excluded from merit order calculations.
- The RLNG spot gas based power plants' PLF is considered at 30% for FY 2011-12 and 5% from FY 2012-13 onwards due to the high variable cost. The power purchase availability from these plants has been capped in order to minimise the impact of the high variable cost of generation from these plants.
- During merit order despatch, at least 50% availability of each plant has been considered to take care of the peak loads and peak season.
- The balance power based on the 80% availability, or the actual availability, whichever is less, is considered to meet any additional demand which is not met after inclusion of must run power plant and 50% capacity of the other plants.
- Fixed and variable costs for GSECL have been taken as approved by the Commission for the control period of FY 2011-12 to 2015-16 in its Order dated 11th April, 2011 and the same has been taken for future years, as well. Transmission Tariff for GETCO has been taken as approved by the Commission for the control period FY 2012-16 in MYT Order dated 31st March, 2011.
- For IPP and central sector, fixed cost and variable costs are taken as per actuals for FY 2009-10. The availability has been projected, based on the operation of a plant in a particular year and the past trend of energy availability from the plants.

Based on the above factors, the plant-wise dispatchable energy and cost of purchase by GUVNL from various plants of GSECL, central generating stations, IPPs and other sources, the generation fixed cost due to the capacity contracted, and variable cost of generation per unit are given in the Table below. The dispatchable energy (MU), based on the allocated capacity and merit order stacking, consists both for supplying power to DISCOMs, as well as for trading purpose.

6.8.4 Transmission and other costs

Petitioner's submission

It is submitted by DGVCL that the total power purchase cost for the company for the control period FY 2011-12 to FY 2015-16 consists of: transmission charges, GUVNL charges and SLDC fees and charges and GUVNL costs.

Transmission charges

Transmission charges to GETCO are calculated as per the approved charges for GETCO in the MYT Order for the control period FY 2011-12 to FY 2015-16. PGCIL charges are worked out, based on actual of FY 2009-10, with escalation of 5% every year.

Based on the transmission charges for PGCIL and GETCO, the transmission costs included in the calculation of bulk supply tariff of all DISCOMs is given below:

Table 6.44: Transmission charges projected by DGVCL for the control period FY 2011-12 to FY 2015-16

Particulars	FY 2009-10 (Approved)	FY 2009-10 (Actual)	FY 2010-11	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Escalation for PGCIL charges (%)	0	0	5	5	5	5	5	5
PGCIL charges (Rs.crore)	-	254	267	280	294	309	324	340
GETCO charges (Rs./MW/day)	-	-	2829	2775	2954	3245	3029	2727
GETCO charges (Rs./crore/MW/ annum)	-	-	0.10	0.10	0.11	0.12	0.11	0.10
SLDC fees (Rs./MW/half year)	-	-	375	321	371	407	363	313
SLDC charges (Rs/MW/month)	-	-	519	397	365	348	295	251

6.8.5 GUVNL cost

The DGVCL has submitted that GUVNL is entrusted with the function of supplying power to DISCOMs and the overall coordination between the subsidiary companies. It also undertakes the function of raising and managing overall loan portfolio of GUVNL and its subsidiaries.

GUVNL is charging Rs.0.04 for every transaction of the unit.

6.8.6 SLDC Fees and charges

It is submitted by DGVCL that SLDC fees and charges have been taken as approved by the Commission in the SLDC MYT Order dated 31st March, 2011.

6.8.7 Trading

The DGVCL has stated that GUVNL has projected trading of surplus power based on its capacity to sell. GUVNL has considered 6000 MU for FY 2011-12, 7000 MU for FY 2012-13 each year increasing the trading units by 1000 MU, thus reaching a level of 10,000 MU for the FY 2015-16. Trading cost is calculated, based on variable and fixed costs of the respective power plants.

The trading MU, envisaged from FY 2011-12 to FY 2015-16, are given below:

Table 6.45: Trading of energy envisaged during the control period FY 2011-12 to FY 2015-16 as projected by DGVCL

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Trading units (MU)	6000	7000	8000	9000	10000

6.8.8 Total power purchase cost

The DGVCL has furnished the total power purchase cost, consisting of the cost of power purchase from various generating stations, transmission charges of PGCIL and GETCO, SLDC charges, GUVNL costs and trading units.

The total fixed costs, due to the capacity contracted, are passed on to the DISCOMs. For trading, the cost is allocated on the basis of the number of units dispatched, as shown in the Table below:

Table 6.46: Fixed cost for DISCOMs and trading of energy from FY 2011-12 to FY 2015-16 as projected by DGVCL

Year	Fixed Cost	GETCO cost	PGCIL charges	SLDC charges	Total Fixed cost	(Rs. crore)	
						DISCOM Fixed cost	Trading Fixed cost
FY 2011-12	6652	1185	280	8	8125	8125	798
FY 2012-13	9229	1594	294	9	11126	11126	1203
FY 2013-14	10268	1887	309	9	12473	12473	1451
FY 2014-15	11646	1923	324	9	13902	13902	1713
FY 2015-16	15815	2192	340	9	18356	18356	2358

The total variable cost (energy cost) due to generating energy to supply power to DISCOMs, as well as for trading purpose, include additional 4 paise/unit payable to

GUVNL for the supply of such power. The basic purpose is to have an average variable cost to DISCOMs, as well as trading of power. The total variable cost is given in the Table below:

Table 6.47: Variable cost for DISCOMs and trading of energy for FY 2011-12 to FY 2015-16 as projected by DGVCL

Year	Variable cost (Rs. crore)	GUVNL cost (Rs. crore)	Total variable cost (Rs. crore)	Total MU dispatched	Variable cost (Rs./unit)	DISCOM		Trading	
						MU	Variable cost (Rs. crore)	MU	Variable cost (Rs. crore)
FY 2011-12	12195	268	12463	67077	1.86	61077	11348	6000	1115
FY 2012-13	12781	287	13068	71759	1.82	64759	11793	7000	1275
FY 2013-14	14466	307	14773	76743	1.92	68743	13233	8000	1540
FY 2014-15	15228	328	15556	82050	1.90	73050	13850	9000	1706
FY 2015-16	15111	351	15463	87838	1.76	77838	13702	10000	1760

6.8.9 Net power purchase cost

It is submitted by DGVCL that trading revenue for GUVNL is calculated, based on per unit total cost of power plus Rs.1.00 per unit, which will also include the profit margin and GUVNL's trading margin.

Hence, the revenue earned from sale of power to trade is subtracted from the total power purchase cost for DISCOMs to obtain the net power purchase cost. The net power purchase cost is shown below:

Table 6.48: GUVNL net power purchase cost for the control period FY 2011-12 to FY 2015-16 as projected by DGVCL

Year	DISCOM fixed cost	DISCOM variable cost	Total power purchase cost	Trading fixed cost	Trading variable cost	Profit & trading margin	(Rs. crore)	
							Total trading revenue	Net cost
FY 2011-12	8125	11348	19473	798	1115	600	2513	18075
FY 2012-13	11126	11793	22919	1203	1275	700	3177	21016
FY 2013-14	12473	13233	25705	1451	1540	800	3791	23454
FY 2014-15	13092	13850	27752	1713	1706	900	4319	25139
FY 2015-16	18356	13702	32059	2358	1760	1000	5119	28700

6.8.10 Bulk supply arrangement

GUVNL is a holding company of the restructured successor companies and is also entrusted with the purchase and sale (trading) function of electricity. GUVNL purchases power from various sources and supplies this to the four distribution companies and also in bulk to the distribution licensees in Gujarat. The GUVNL has

entered into contracts to purchase the entire power requirement from GSECL, central generating companies, IPPs, traders and others to meet the demand of the DISCOMs. Thus, it performs the activity of bulk supplier of power to all the four distribution companies at Bulk Supply Tariff. In accordance with this arrangement, the distribution licensees have entered into bulk supply arrangement with GUVNL to meet their supply obligations.

When the erstwhile Gujarat Electricity Board (GEB) was restructured on a functional basis, the four distribution companies were incorporated on the basis of Zonal configuration existing in the Electricity Board.

Each of the zones, now the distribution companies, have different consumer profile and consumption profile and hence the revenue earning capabilities of each DISCOM differs as well as the Annual Revenue Requirement.

The State Government envisaged a uniform structure of retail supply tariffs in the four DISCOMs so that consumers in similar categories in the State could have similar tariff as in the erstwhile GEB and there may not be any discrimination among the consumers on account of the restructuring.

Since the revenue earning capabilities and the ARR of the four DISCOMs are different, it is necessary to build a mechanism to enable them to have uniform retail tariffs.

Since the power purchase cost contributes 70 to 80% of the total cost incurred by DISCOMs, this factor plays a major role in achieving the level playing field among the DISCOMs for maintaining uniform tariffs in the DISCOMs. In this context the Tariff Policy has provided as under:

Para 8.4.2 of Tariff Policy states –

The National Electricity Policy states that existing PPAs with the generating companies would need to be suitably assigned to the successor distribution companies. The State Governments may make such assignments taking care of different load profiles of the distribution companies so that retail tariffs are uniform in the State for different categories of consumers. Thereafter the retail tariffs would reflect the relative efficiency of distribution companies in procuring

power at competitive costs, controlling theft and reducing other distribution losses.

The Government had earlier assigned the PPAs to different DISCOMs based on the load profile of each DISCOM, but the assignment of PPAs has become a dynamic situation in view of additional capacity that is being added every year, the generation cost of such additional capacity being different. In this situation, uniform tariff by the assignment of PPAs has become difficult.

Even though the distribution companies are improving their performance by reducing the distribution losses etc., the consumer profile and consumption profile is a historical legacy. It would take considerable time for the distribution companies to develop industries and commercial activities for a more favourable consumer mix. Until such time the uniform tariffs have to be maintained in all DISCOMs. In order to maintain uniform tariffs in all DISCOMs the equitable allocation of PPA is suggested in the Tariff Policy. As stated earlier the allocation has its own limitation. The other alternative of Bulk Supply arrangement is considered more appropriate. Hence the differential Bulk Supply Tariff proposed by the DISCOM / GUVNL, which provides for uniform tariff is approved by the Commission.

6.8.11 Power purchase sources and merit order despatch

Power purchase sources

As mentioned in paragraph 6.8.1, GUVNL has entered into contract for the existing capacity with GSECL, central generating companies, IPPs, renewable energy sources and RLNG gas based plants which were commissioned before 31st March, 2010. The details of the existing plants, etc., are given in Table 6.36.

GUVNL has also entered into contract for new capacity that is likely to be commissioned during the control period.

The details of the new plants likely to be commissioned during the control period are given in Table 6.37.

The quantum contracted from the new capacity source-wise is included in the table 6.49 below. The total capacity contracted from each of the sources is summarised in the Table below:

**Table 6.49: Existing capacity contracted source-wise by GUVNL for the control period
FY 2011-12 to FY 2015-16**

Sl. No.	Particulars	Rated capacity allocated to GUVNL (MW) as on 31 st March 2011	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
1	GSECL	4822	4822	5822	6002	6182	6982
2	IPPs	1612	2313	2663	3163	3663	3663
3	Central Generating stations	2900	3741	4188	4870	6160	7136
4	Renewable sources	1072	1469	2041	2041	2041	2041
5	Competitive bidding	1500	2700	3200	3200	3200	5810
6	CPP	8	8	8	8	8	8
	Total	11914	15053	17922	19284	21254	25640

The details of capacity contracted by GUVNL from the existing plants and the additional plant envisaged during the control period along with the operational, fixed and variable cost are given in Tables 6.36 and 6.37.

6.8.12 Purchase in merit order

As discussed earlier in paragraph 6.3.2, GUVNL, in order to optimise the power purchase costs, has worked out a comprehensive merit order dispatch (MOD), as shown below:

- The despatch from individual generating station is worked out, based on merit order of variable cost of each generating unit.
- NPC power plants, renewable sources, captive power plants and hydro power plants have been considered as must run power plants. Hence, they have been excluded from merit order calculations.
- R-LNG spot gas based power plants PLF is considered at 30% for FY 2011-12 and @ 5% for the FY 2012-13 onwards due to high variable costs. The power purchase from these plants has been capped by GUVNL in order to minimise the impact of higher variable cost of generation from these plant.

- During merit order dispatch, at least 50% availability of each plant has been considered to take care of the peak loads and peak seasons.
- Fixed cost and variable cost for GSECL plants have been taken as approved by the Commission for the control period in the Order dated 31st March, 2011.
- For IPPs and central sector stations, fixed cost and variable costs are taken as per actuals of FY 2009-10.

The quantum of power and the cost as provided by DGVCL/GUVNL are considered on due examination as given in Tables 6.50 to 6.54, and approved by the Commission.

6.8.13 Power purchase during the control period FY 2011-12 to FY 2015-16

The power purchase for the control period FY 2011-12 to FY 2015-16 is based on the energy requirement of DGVCL / four DISCOMs approved by the Commission. As stated in the preceding paragraphs, the fixed and variable costs of GSECL stations are as approved by the Commission in the Tariff Order dated 31st March, 2011. For purchases from central generating stations, IPPs and others, the fixed and variable costs are taken based on actuals for FY 2009-10. The power purchase costs for each year of the control period are given in Tables 6.50 to 6.54. These include the energy available from each station, as estimated by the Commission, and energy dispatchable, based on merit order as given in the above Tables.

The source-wise power purchase cost by GUVNL for the control period FY 2011-12 to FY 2015-16 as approved by the Commission are summarised and given in the Tables below:

Table 6.50: Power purchase cost approved for FY 2011-12

6.8.14 Transmission and other costs

Transmission costs

The transmission costs include the cost to be paid to PGCIL for regional transmission and cost of GETCO for intra-state transmission.

The transmission charges of PGCIL are approved by CERC and to be paid by GUVNL on the basis of calculations in the Regional Energy Account of Western Region by WRLDC. Hence, the Commission accepts the projection of DGVCL / GUVNL for PGCIL charges. The transmission charges of GETCO are approved by the Commission in the MYT Order of GETCO. The transmission charges payable to PGCIL and GETCO are as given in the Table below:

Transmission charges description

Table 6.55: Transmission charges approved by the Commission for the control period FY 2011-12 to FY 2015-16

Sl. No.	Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
1	Transmission charges of PGCIL (Rs. crore)	280	294	309	324	340
2	Transmission charges of GETCO (Rs./MW/day)	2775.06	2953.99	3244.85	3029.08	2727.17
3	Annual transmission costs of GETCO (Rs. crore)	1185	1594	1887	1923	2192
4	Total transmission charges (Rs. crore)	1465	1888	2196	2247	2532

The CERC has since revised the transmission charges for PGCIL transmission system. The impact of this revision shall be reported to the Commission every quarter.

GUVNL Costs

The DGVCL has submitted in paragraph 6.7.5 above that GUVNL is charging Rs.0.04 for every transaction of one unit of energy for providing the services of procuring the power from various sources and supplying to DISCOMs, the overall coordination between the subsidiary companies and also undertaking the function of raising and managing the overall loan portfolio of GUVNL and its subsidiaries.

The Commission considers the charges at Rs.0.04/unit to handle power procurement and supply, etc., reasonable and approves the GUVNL costs, as given below, based on the energy handled during the control period.

Table 6.56: GUVNL costs approved by the Commission for the control period FY 2011-12 to FY 2015-16

Sl. No.	Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
1	Energy handled (MU)	67077	71760	76745	82053	87787
2	GUVNL cost (Rs. crore)	268	287	307	328	351

SLDC fees and charges

The DGVCL / GUVNL has submitted that the SLDC fees and charges have been taken as approved by the Commission in the SLDC MYT Order dated 31st March, 2011.

The Commission approves the SLDC charges, as given in the Table below:

Table 6.57: SLDC charges approved by the Commission

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
SLDC charges (Rs. crore)	8	9	9	9	9

6.8.15 Trading

As discussed earlier in paragraph 6.8.7, GUVNL has projected trading of surplus power based on its capacity to sell. GUVNL has estimated 6000 MU for FY 2011-12, 7000 MU for FY 2012-13, and increasing the energy sales by 1000 MU every year and thus reaching a level of 10,000 MU for the FY 2015-16.

Trading cost is based on variable and fixed costs of the respective power plants.

The Commission has arrived at the quantum of the energy traded by deducting the total energy requirement of all DISCOMs from total dispatchable energy available as approved.

The Commission considers the estimated revenue by trading at a margin of Rs.1.0 per unit as projected by GUVNL, to arrive at the net power purchase cost to all the DISCOMs as shown in the Table 6.60.

6.8.16 Fixed costs

The total power purchase cost, consisting of the cost of power procured from various sources, transmission costs of PGCIL and GETCO, SLDC charges and trading costs approved by the Commission is aggregated to arrive at the total power purchase cost for all DISCOMs / trading unit. The fixed costs, due to the capacity contracted by GUVNL, are passed on to DISCOMs. For trading on the basis of energy dispatched, the cost allocated to trading given in the Table below:

Table 6.58: Fixed cost for DISCOMs and Trading energy from FY 2011-12 to FY 2015-16

Year	Fixed Cost (Rs. crore)	GETCO cost (Rs. crore)	PGCIL charges (Rs.crore)	SLDC charges (Rs.crore)	Total Fixed cost (Rs. crore)	DISCOM Fixed cost (Rs. crore)	Trading Fixed cost (Rs. crore)
FY 2011-12	6690	1185	280	8	8163	8163	947.79
FY 2012-13	9239	1594	294	9	11136	11136	1444.20
FY 2013-14	10274	1887	309	9	12479	12479	1759.58
FY 2014-15	11654	1923	324	9	13910	13910	2080.99
FY 2015-16	15820	2192	340	9	18361	18361	2853.23

6.8.17 Variable costs

The total variable cost consists of the energy costs supplied to DISCOMs, as well as for trading. The total variable cost and variable cost per unit are given in the Table below:

Table 6.59: Variable cost for DISCOMs and trading units for the control period for FY 2011-12 to FY 2015-16

Year	Variable cost (Rs. crore)	GUVNL cost (Rs. crore)	Total variable cost (Rs. crore)	Total MU despatched	Variable cost (Rs./ unit)	DISCOM		Trading	
						MU	Variable cost (Rs. crore)	MU	Variable cost (Rs. crore)
FY 2011-12	12191	268	12459	67077	1.857	60099	11162.89	6978	1296.11

6.8.18 Net power purchase cost

The revenue from trading of energy by GUVNL is calculated, based on the fixed and variable cost of generation plus Rs.1.00 per unit, which will also include the profit margin and GUVNL trading margin.

The revenue earned from sale of power to traders and others is subtracted from the total power purchase cost to arrive at net power purchase cost to DISCOMs. The net

power purchase cost to DISCOMs, as approved by the Commission, is given in the Table below:

Table 6.60: Net power purchase cost for the control period FY 2011-12 to FY 2015-16

Year	DISCOM fixed cost (Rs. crore)	DISCOM variable cost (Rs. crore)	Total power purchase cost (Rs. crore)	Trading fixed cost (crore)	Trading variable cost (Rs. crore)	Margin of GUVNL due to trading etc. (Rs. crore)	Total trading revenue (Rs. crore)	Net* cost (Rs. crore)
FY 2011-12	8163	11162.89	19325.89	947.79	1296.11	697.80	2942	17680.30

*Total power purchase cost – (trading fixed cost + profit and trading margin)

6.9 Fixed charges

6.9.1 Operation and Maintenance (O&M) expenses

The DGVCL has claimed Rs. 1104.00 crore towards O&M expenses for the control period FY 2011-12 to FY 2015-16, as given in the Table below:

Table 6.61: Proposed O&M expenses projected for FY 2011-12 to 2015-16

(Rs. crore)

Sl. No.	Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
1.	Employee cost	167.00	177.00	187.00	197.00	209.00
2.	Repairs & Maintenance	27.00	29.00	30.00	32.00	34.00
3.	Administration & General charges	31.00	32.00	34.00	36.00	38.00
4.	Other Debits	4.00	5.00	5.00	5.00	6.00

7.	Other expenses capitalized	(46.00)	(48.00)	(51.00)	(54.00)	(57.00)
8.	Total O&M expenses	197.00	208.00	220.00	233.00	246.00

Petitioner's submission

The DGVCL has submitted that the O&M expenses consist of: Employee cost, A&G expenses, R&M expenses, other debits, extraordinary items and net prior period expenses. DGVCL has mentioned that the norms, as specified in the GERC MYT Regulations, 2011, have been considered in the petition, as detailed below.

The O&M expenses have been derived on the basis of average of the actual O&M expenses for the three (3) years ending March 31, 2010.

The average of such O&M expenses are considered as O&M expenses for FY 2008-09 and are escalated at the escalation factor of 4% per annum to arrive at O&M expenses for FY 2011-12.

The O&M expenses for subsequent years of MYT have been determined by escalating the base expenses determined for FY 2011-12, at the escalation factor of 5.72% per annum.

The average O&M expenses for FY 2008-09 are as given in the Table below:

Table 6.62: Average O&M expenses for FY 2008-09

					(Rs. crore)
Sl. No.	Particulars	FY 2007-08 (Actuals)	FY 2008-09 (Actuals)	FY 2009-10 (Actuals)	FY 2008-09 (Average)
1.	Employee cost	124.61	147.21	173.90	148.58
2.	Repairs & Maintenance	35.67	20.33	16.40	24.13
3.	Administration & General charges	24.49	26.42	30.89	27.26
4.	Other Debits	3.27	4.33	4.23	3.94
5.	Extraordinary items	1.24	0.25	0.27	0.59
6.	Net prior period expenses / (income)	26.05	2.74	4.79	11.19
7.	Other expenses capitalized	(42.88)	(40.85)	(38.55)	(40.76)
8.	Total O&M expenses	172.46	160.43	191.94	174.94

Commission's Analysis

The Employee expenses, R&M expenses and A&G expenses are commonly considered as O&M expenses. DGVCL has also included the following in the O&M expenses as per the directive issued by the Commission:

- Other debits
- Extraordinary item
- Net prior period expenses and
- Other expenses capitalised

The O&M expenses are arrived at by DGVCL, in accordance with Regulation 98.6 of GERC (MYT) Regulations, 2011. The actual O&M expenses for FYs 2007-08, 2008-09 and 2009-10, furnished by DGVCL, are verified with the audited annual accounts for the respective years and found to be correct. The O&M expenses proper, viz., the Employee cost, R&M expenses and A&G expenses, are accepted, as projected by DGVCL, since they are in accordance with the (MYT) Regulations, 2011. In the case of other items of expenses, viz., 'other debits' and extraordinary items, they can, at

best, be recognised at the level of actuals for the year for which audited annual accounts are provided. The net prior period expenses / income depend on the excess / short provision made in the Books of Accounts in the past. This cannot be accepted for projection. It is pertinent to mention here that DGVCL has not projected any prior period income under non-tariff for the control period.

As regards capitalisation of other expenses the projection is considered as this relates to capitalisation of employee cost, A&G expenses, etc.

The O&M expenses considered for the control period FY 2011-12 to FY 2012-13 are summarised in the Table below:

Table 6.63: Approved O&M expenses for FY 2011-12 to 2015-16

(Rs. crore)

Sl. No.	Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
1.	Employee cost	167.12	176.68	186.79	197.48	208.77
2.	Repairs & Maintenance	27.14	28.70	30.34	32.08	33.91
3.	Administration & General charges	30.68	32.43	34.28	36.25	38.32
4.	Other Debits	4.23	4.23	4.23	4.23	4.23
5.	Extraordinary items	0.27	0.27	0.27	0.27	0.27
6.	Net prior period expenses / (income)	0.00	0.00	0.00	0.00	0.00
7.	Other expenses capitalised	(46.00)	(48.00)	(51.00)	(54.00)	(57.00)
8.	Total O&M expenses	183.44	194.31	204.91	216.31	228.50

The Commission, accordingly, approves the O&M expenses, as detailed in the Table above, for the control period FY 2011-12 to FY 2015-16.

6.9.2 Capital expenditure

The DGVCL has projected the capital expenditure at Rs. 1764.94 crore for the control period FY 2011-12 to FY 2015-16, as given the Table below:

Table 6.64: Capital expenditure projected for FY 2010-11 to FY 2015-16

Petitioner's submission

The DGVCL has submitted that the capital expenditure required for providing earth-terminals as per Petition No. 909/2006 is not considered in the CAPEX projected for the control period and requested the Commission to consider the capital expenditure of the same as per actuals, as and when incurred.

The DGVCL has further submitted that the funding of the projected capital expenditure is envisaged through various sources categorised under four headings, viz., consumer contribution, grants, equity and debt, and the grants have been considered, based on the figures available with the company, while the remaining expenditure is proposed to be funded through debt and equity in the ratio of 70:30. The details of funding the CAPEX are as detailed in the Table below:

Table 6.65: Projected Funding of capital expenditure proposed for the control period FY 2011-12 to FY 2015-16

(Rs. crore)						
Sl. No.	Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
1.	Capital expenditure	528.00	302.00	307.00	311.00	316.00
2.	Less: Consumer contribution	71.00	75.00	80.00	84.00	89.00
3.	Grants	196.00	140.00	140.00	140.00	130.00
4.	Balance CAPEX	261.00	87.00	87.00	87.00	97.00
5.	Debt @ 70%	183.00	61.00	61.00	61.00	68.00
6.	Equity @ 30%	78.00	26.00	26.00	26.00	29.00

Commission's Analysis

The Commission examined the CAPEX projected by DGVCL for the control period. The actual capital expenditure incurred during FY 2009-10 is Rs. 189.91 crore and the capitalisation is Rs. 177.22 crore. DGVCL has proposed to capitalise the entire projected capital expenditure in the same year in which the expenditure is proposed to be incurred. DGVCL has not explained the individual schemes envisaged for the control period. On a scrutiny of the broad schemes outlined in the above Table, it is observed that DGVCL has included one scheme, by name R-APDRP (Part B) of Rs. 159.00 crore, apart from the other normative schemes proposed for FY 2011-12. As mentioned earlier, DGVCL has not explained any thing about this scheme. It is also observed from the capital expenditure schemes for FY 2009-10 and FY 2010-11 that no expenditure has been incurred in FY 2009-10 or proposed to be incurred in the APR for FY 2010-11. The scheme is also not explained in the business plan. The Commission, therefore, excludes this provision of Rs. 159 crore from the proposed capitalisation for FY 2011-12, which is subject to review at the time of mid term review. Thus, the capitalisation of the schemes covered in the provision of Rs.159 crore is not considered for loading on ARR now and shall be loaded on actual capitalisation in truing up. The funding of the capital expenditure, as computed after excluding the capitalisation of Rs. 159.00 crore towards R-APDRP (Part B), are as given in the Table below:

Table 6.66: Approved Funding of capital expenditure for the control period FY 2011-12 to FY 2015-16

(Rs. crore)					
Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Capital expenditure	527.70	302.26	307.26	311.36	316.36
Capitalisation	369.00	302.26	307.26	311.36	316.36
Less: Consumer contribution	71.00	75.00	80.00	84.00	89.00
Grants	196.00	140.00	140.00	140.00	130.00

Dakshin Gujarat Vij Company Limited
Truing up for FY 2009-10, APR for FY 2010-11,
ARR for FY 2011-12 to FY 2015-16 and Tariff for FY 2011-12

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Balance capitalisation	102.00	87.26	87.26	87.36	97.36
Debt @ 70%	71.40	61.08	61.08	61.08	68.18
Equity @ 30%	30.60	26.18	26.18	26.18	29.21

The Commission has arrived at the opening and closing balance of GFA taking into consideration, the capitalisation approved in the above Table, which are as detailed in the Table below:

Table 6.67: Gross fixed assets approved for the control period FY 2011-12 to FY 2015-16

(Rs. crore)

Particulars	Opening balance	Additions during the year	Closing balance
FY 2011-12	2049.75	369.00	2418.75
FY 2012-13	2418.75	302.26	2721.01
FY 2013-14	2721.01	307.26	3028.27
FY 2014-15	3028.27	311.36	3339.63
FY 2015-16	3339.63	316.36	3655.99

The gross fixed assets, as mentioned in the above Table, are taken into consideration for computation of depreciation charges.

6.9.3 Depreciation

The DGVCL has projected the depreciation at Rs. 836.00 crore for the control period FY 2011-12 to FY 2015-16, as detailed in the Table below:

Table 6.68: Depreciation projected for the control period

(Rs. crore)

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Gross block in beginning of the year	2212.00	2740.00	3042.00	3349.00	3661.00
Additions during the year (Net)	528.00	302.00	307.00	311.00	316.00
Depreciation for the year	130.00	152.00	168.00	185.00	201.00
Average rate of depreciation	5.27%	5.27%	5.27%	5.27%	5.27%

Petitioner's submission

The DGVCL has submitted that it has considered the closing gross block of fixed assets of FY 2010-11 as opening balance for FY 2011-12. The addition of assets during the control period is considered as per the projected capital expenditure and the proposed capitalisation. The average rate of depreciation is adopted at 5.27%.

Commission's Analysis

The Commission noted that the petitioner has computed the depreciation for the control period FY 2011-12 to 2015-16, adopting the average rate of depreciation at 5.27%. The Commission has approved the capitalization and gross fixed assets in

paragraph 6.5.2 and table 6.67 above. The Commission has computed the depreciation based on the opening balance of GFA and addition of assets approved in the Table above, which are as given the Table below:

Table 6.69: Approved Depreciation for the control period FY 2011-12 to FY 2015-16
(Rs. crore)

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Gross block in beginning of the year	2049.75	2418.75	2721.01	3028.27	3339.63
Additions during the year	369	302.26	307.26	311.36	316.36
Average rate of depreciation	5.27%	5.27%	5.27%	5.27%	5.27%
Depreciation for the year	117.74	135.43	151.49	167.79	184.33

The Commission, accordingly, approves the depreciation for the control period, as detailed in the above table.

6.9.4 Interest and Finance charges

The DGVCL has projected the interest and finance charges at Rs. 261.00 crore, including interest on security deposit from consumers and guarantee charges for the control period FY 2011-12 to FY 2015-16, as detailed in the Table below:

Table 6.70: Interest and Finance charges projected for the control period
(Rs. crore)

Sl. No	Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
1.	Opening loan	338.00	390.00	299.00	191.00	68.00
2.	Loan additions during the year	183.00	61.00	61.00	61.00	68.00
3.	Repayment during the year	130.00	152.00	168.00	185.00	201.00
4.	Closing loan	390.00	299.00	191.00	68.00	(66.00)
5.	Average loan	364.00	344.00	245.00	130.00	1.00
6.	Interest on loan	35.00	33.00	23.00	12.00	0.00
7.	Interest on security deposit	31.00	31.00	31.00	31.00	31.00
8.	Guarantee charges	1.00	1.00	1.00	1.00	1.00
9.	Total interest and finance charges	66.00	64.00	55.00	44.00	32.00

Petitioner's submission

The DGVCL has submitted that the opening loan for FY 2011-12 is taken as per the closing balance of loan for FY 2010-11 and the normative loan addition for the control period is computed as per the CAPEX funding plan and the repayment is considered equal to the depreciation calculated for the year. The interest on the opening loans has been computed considering the weighted average rate of interest for the previous year and @10.50% on the new loans proposed to be drawn during the year.

The DGVCL has further submitted that the company has been allocated some Government of Gujarat guarantees and the company has to pay the guarantee charges, which are considered at the same level as estimated in the RE for FY 2010-11. The interest on security deposit is also considered at the same level as in the RE for FY 2010-11.

Commission's Analysis

The opening balance of loans for FY 2011-12 is as per the closing balance of loans for FY 2010-11. The repayment of loans considered by DGVCL is in accordance with Regulation 39 of GERC (MYT) Regulations, 2011 for the control period. DGVCL has assumed the loan addition based on the entire capitalisation of CAPEX during the year of investment. The Commission has approved the capitalisation in the paragraph above and the loan additions are computed accordingly in the Table. The Commission has observed that, as per the projection made by DGVCL, the average interest works out to 9.5%. DGVCL has not projected the increase in the interest on account of security deposit during the control period. Considering all the above, the Commission has computed the interest and finance charges for the control period, which are as given in the Table below:

Table 6.71: Approved Interest and Finance charges for the control period FY 2011-12 to FY 2015-16

(Rs. crore)						
Sl. No.	Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
1.	Opening loan	273.95	227.61	153.25	62.84	0.00
2.	Loan additions during the year	71.40	61.08	61.08	61.15	68.15
3.	Repayment during the year	117.74	135.43	151.49	123.99	68.15
4.	Closing loan	227.61	153.25	62.84	0.00	0.01
5.	Average loan	250.78	190.43	108.05	31.42	0.01
6.	Average rate of interest	9.50%	9.50%	9.50%	9.50%	9.50%
7.	Interest on loan	23.82	18.09	10.26	2.99	0.00
8.	Interest on security deposit	31	31	31	31	31
9.	Guarantee charges	1	1	1	1	1
10.	Total interest and finance charges	55.82	50.09	42.26	34.99	32.00

The Commission, accordingly, approves the interest and finance charges, as detailed in the above Table.

6.9.5 Interest on working capital

The DGVCL has projected the interest on working capital at Rs. 357.00 crore for the control period FY 2011-12 to FY 2015-16, as detailed in the Table below:

Table 6.72: Projected Interest on working capital for the control period

(Rs. crore)

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
O&M expenses	17.00	19.00	21.00	23.00	26.00
Maintenance spares	28.00	32.00	37.00	43.00	48.00
Receivables	440.00	501.00	552.00	587.00	654.00
Total working capital	484.00	552.00	610.00	653.00	728.00
Rate of interest on working capital	11.75%	11.75%	11.75%	11.75%	11.75%
Interest on Working Capital	57.00	65.00	72.00	77.00	86.00

Petitioner's submission

The DGVCL has submitted that the interest on working capital has been calculated on normative parameters, in accordance with the GERC (MYT) Regulations, 2011. The rate of interest considered is 11.75%, being the State Bank Advance Rate (SBAR) as on 1st April 2010, under Regulation 41 (3) (b) of the GERC (MYT) Regulations, 2011.

Commission's Analysis

The Commission has examined the computation of interest on working capital submitted by DGVCL. The O&M expenses for one month and maintenance spares at 1% GFA are considered by the company as per its projection. The Commission has analysed and approved the O&M expenses and GFA in tables 6.63 and 6.67. Based on the approved O&M expenses and GFA, the Commission has computed the working capital and interest on working capital, which are as detailed in the table below

Table 6.73: Interest on working capital approved for the control period

(Rs. crore)

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
O&M expenses for 1 month	15.29	16.19	17.08	18.02	19.04
1 % of GFA for maintenance spares	19.49	20.51	21.38	22.25	23.12
Receivables for 1 month sales revenue at the prevailing tariffs	410.00	435.37	462.43	491.26	522.11
Less: Amount held as security deposit from consumers	651.14	651.14	651.14	651.14	651.14
Total Working Capital Requirement	-206.36	-179.07	-150.26	-119.60	-86.86
Interest Rate	11.75%	11.75%	11.75%	11.75%	11.75%
Interest on Working Capital	-	-	-	-	-

The Commission, accordingly, approves the interest on working capital, as nil as detailed in the above Table for the control period for FY 2010-11 to FY 2015-16.

6.9.6 Provision for bad and doubtful debts

The DGVCL has estimated the bad debts at Rs. 48.00 crore for the control period FY 2011-15 to FY 2015-16, which are as given in the Table below:

Table 6.74: Bad and doubtful debts projected for FY 2011-12 to 2015-16

(Rs. crore)

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Provision for bad debts	8.00	9.00	10.00	10.00	11.00

Petitioner's submission

The DGVCL has submitted that the company has considered the bad and doubtful debts at 0.20% of the revenue from sale of power and that it is a legitimate expenditure associated with the business risk and is a consumer related expense.

Commission's Analysis

Regulation 98.8 of the GERC (MYT) Regulations, 2011 specifies that the Commission may allow bad debts written off as a pass through in the ARR. The latest audited accounts available in respect of DGVCL are for FY 2009-10. The Commission has approved the bad debts written off at Rs.3.84 crore in the truing up for FY 2009-10.

The Commission, accordingly, approves provision for bad debts at Rs.3.84 crore for each year of the control period FY 2011-12 to FY 2015-16 as given in the Table below:

Table 6.75: Approved bad and doubtful debts for FY 2011-12 to 2015-16

(Rs. crore)

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Provision for bad debts	3.84	3.84	3.84	3.84	3.84

6.9.7 Return on equity

The DGVCL has projected the return on equity at Rs. 355.00 crore for the control period FY 2011-12 to FY 2015-16, as detailed in the Table below:

Table 6.76: Return on equity projected for the control period FY 2011-12 to FY 2015-16

(Rs. crore)					
Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Opening equity	394.00	472.00	498.00	524.00	551.00
Equity addition	78.00	26.00	26.00	26.00	29.00
Closing equity	472.00	498.00	524.00	551.00	580.00
Average equity	433.00	485.00	511.00	538.00	565.00
Rate of return on equity	14%	14%	14%	14%	14%
Return on equity	61.00	68.00	72.00	75.00	79.00

Petitioner's submission

The DGVCL has submitted that the return on equity has been computed @ 14% on average equity, based on the opening balance of equity and normative additions during the year, which has been arrived at by considering 30% of the capital expenditure net of consumer contribution and grants.

Commission's Analysis

The Commission has computed the return on equity @ 14% on the average equity of the opening and closing balance and addition of equity during each year of the control period, as approved in the Table below:

Table 6.77: Approved Return on equity for the control period FY 2011-12 to FY 2015-16

(Rs. crore)					
Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Opening equity	381.35	411.95	438.128	464.306	490.514
Equity addition	30.60	26.18	26.18	26.21	29.21
Closing equity	411.95	438.128	464.306	490.514	519.722
Average equity	396.65	425.04	451.22	477.41	505.12
Rate of return on equity	14.00%	14.00%	14.00%	14.00%	14.00%
Return on equity	55.53	59.51	63.17	66.84	70.72

The Commission, accordingly, approves the return on equity, as detailed in the above Table for the control period FY 2011-12 to FY 2015-16.

6.9.8 Provision for Tax

The DGVCL has projected the income tax at Rs. 95.00 crore for the control period FY 2011-12 to FY 2015-16, as detailed in the Table below :

Table 6.78: Taxes projected for the control period FY 2011-12 to FY 2015-16

(Rs. crore)

Dakshin Gujarat Vij Company Limited
Truing up for FY 2009-10, APR for FY 2010-11,
ARR for FY 2011-12 to FY 2015-16 and Tariff for FY 2011-12

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Normative ROE	61.00	68.00	72.00	75.00	79.00
Provision for tax / tax expenses	19.00	19.00	19.00	19.00	19.00

Petitioner's submission

The DGVCL has submitted that the income tax for each year of the control period has been taken as per the actual income tax paid as per the latest audited accounts, i.e. FY 2009-10 and requested the Commission to pass on the impact of revised tax rates as per the Central Government Budget.

Commission's Analysis

Regulation 42.1 of GERC (MYT) Regulations, 2011 specifies that the Commission, in its MYT Order, shall provisionally approve income tax payable for each year of the control period, if any, based on the actual income tax paid as per the latest audited accounts available for the applicant, subject to prudence check. The latest audited accounts available for DGVCL are for FY 2009-10 and the income tax admitted in the truing up for FY 2009-10 is Rs. 19.33 crore.

The Commission, accordingly, approves the provision for income tax for the control period for FY 2011-12 to FY 2015-16, as detailed in the Table below:

Table 6.79: Approved Income tax for the control period FY 2011-12 to FY 2015-16

(Rs. crore)

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Income Tax	19.33	19.33	19.33	19.33	19.33

Any variation in income tax actually paid and approved shall be considered, based on the documentary evidence at the time of truing up for each year of the control period, in accordance with the Regulation 42.2 of the GERC (MYT) Regulations, 2011.

6.9.9 Non-Tariff income

The DGVCL has projected the non-tariff income at Rs. 445.00 crore for the control period FY 2011-12 to FY 2015-16, as detailed in the Table below:

Table 6.80: Non-Tariff income projected for the control period FY 2010-11 to FY 2015-16

(Rs. crore)

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Non-Tariff income	89.00	89.00	89.00	89.00	89.00

Petitioner's submission

The DGVCL has submitted that the income under this category comprises of: interest on loans and advances to employees / contractors, income from investment with banks, delayed payment surcharges from the consumers and the non-tariff income considered at the level of actual in FY 2009-10 for the control period FY 2011-12 to FY 2015-16.

Commission's Analysis

The Commission has noted that the actual non-tariff income in FY 2009-10 was Rs. 88.62 crore and the projection for the control period is in accordance with the actuals for FY 2009-10.

The Commission, accordingly, approves the non-tariff income for the control period FY 2011-12 to FY 2015-16, as detailed in the Table below:

Table 6.81: Approved Non-tariff income for control period FY 2011-12 to FY 2015-16

(Rs. crore)

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Non-tariff income	88.62	88.62	88.62	88.62	88.62

6.10 Annual Revenue Requirement (ARR) excluding power purchase cost

The DGVCL has submitted that the ARR for the control period FY 2011-12 to FY 2015-16 has been calculated excluding the power purchase cost to determine the Bulk Supply Tariff (BST) for each DISCOM, since the BST methodology has been adopted by the utilities.

The ARR, as projected by the DGVCL, is as detailed in the Table below:

Table 6.82: Projected ARR for the control period excluding power purchase cost

(Rs. crore)

Sl. No.	Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16

6.11 Revenue from existing tariff FY 2011-12

The DGVCL has estimated the category-wise revenue based on existing tariff at Rs. 4245.00 crore for FY 2011-12, as detailed in the Table below:

Table 6.84: Revenue from existing tariff projected for FY 2011-12

(Rs. crore)

Consumer category	FY 2011-12
Low tension consumers	
Residential	579.00
Commercial	284.00
Industrial LT	1241.00
Public water works	39.00
Agriculture	77.00
Street lighting	11.00
LT total	2231.00
High tension consumers	
Industrial HT	1866.00
Railway traction	148.00
HT total	2014.00
Total	4245.00

Petitioner's submission

The DGVCL has submitted that FPPPA had been frozen at 12 paise per kWh, over and above variation in base price, and proposed to revise the base cost of power purchase considered by the Commission in the Tariff Order dated 17th January, 2009 with latest available audited data. DGVCL has mentioned that it has taken actuals of FY 2009-10 for central generating stations and IPPs and for GSECL stations actual variable cost for FY 2009-10 is considered and fixed cost is taken as approved for FY 2010-11. DGVCL has requested to freeze the FPPPA at 61 paise per kWh, being the actual for FY 2009-10, in place of existing 12 paise per kWh.

The DGVCL has also mentioned that the real time, PPPA charges will be worked out based on actual cost of power plants in comparison to base price approved by the

Commission and this will be charged over and above the freezed level of 61 paise per kWh.

Commission's Analysis

The Commission has analyzed the category-wise sales projected by DGVCL for the control period FY 2011-12 to FY 2015-16. Based on the analysis, the Commission has revised the category-wise sales projection for the control period. Taking into consideration the average tariff under each category, the Commission has computed the revenue from sale of power at existing tariff for FY 2011-12 as detailed in the table below:

Table: 6.85: Approved sales and Revenue for FY 2011-12

Sl. No.	Category	Average Tariff (Rs. /kWh)	Sales (MU)	Revenue (Rs.crore)
1	Domestic	3.08	1881	579.35
2	Commercial	4.16	683	284.13
3	Industrial LT	4.31	2880	1241.28
4	Public lighting	3.36	34	11.42
5	Agriculture	1.00	597	59.70
6	Water works	3.36	115	38.64
7	Industrial HT	4.93	3789	1867.98
8	Railway traction	5.03	294	147.88
	Total		10273	4230.38

6.12 Other consumer related income

The DGVCL has estimated the other consumer related income at Rs. 63.00 crore for FY 2011-12, as detailed in the Table below:

Table 6.86: Other consumer related income projected for FY 2011-12

(Rs. crore)

Particulars	FY 2011-12
Rental for meters, service lines	31.00
Recoveries from theft of power	17.00
Wheeling charges	0.00
Misc. charges from consumers	15.00
Other consumer related consumers	63.00

Petitioner's submission

The DGVCL has submitted that the revenue from other consumer related income comprises revenue on account of charge imposed, other than the basic charges applicable to the consumers like meter rent, wheeling charges, inspection charges and miscellaneous charges.

Commission's Analysis

The Commission has observed that DGVCL has projected the other consumer related income for FY 2011-12 at the same level as the actuals for FY 2009-10.

The Commission, accordingly, approves the other consumer related income at Rs.63.00 crore for each year of the control period FY 2011-12 to FY 2015-16.

6.13 Agriculture subsidy

The DGVCL has submitted that the quantum of agricultural subsidy has been considered at the same level as the previous year, i.e., Rs. 1100 crore for FY 2011-12 and this is being shared by the four DISCOMs, viz., DGVCL, PGVCL, UGVCL and MGVCL in proportion to the respective percentage share in the agricultural consumption. Accordingly, the share of DGVCL has been worked out to Rs. 60 crore, as detailed in the table below:

Table 6.87: Subsidy for FY 2011-12

(Rs. crore)

Particulars	FY 2011-12
% share in un-metered agriculture sales	5.47%
Share of agriculture subsidy	60.00

Commission's Analysis

The Commission has computed the agricultural consumption in respect of DGVCL, against the total agricultural consumption approved for all the four DISCOMs for the control period. Based on the share of DGVCL's agricultural consumption, the agricultural subsidy for DGVCL is computed as detailed in the table below:

Table 6.88: Approved agricultural susbsidy for FY 2011-12

DISCOM	Agriculture Sales (MU)	% Share of sales	Agriculture subsidy (Rs. crore)
DGVCL	597	4.37	48
MGVCL	944	6.91	76
PGVCL	4910	35.94	395
UGVCL	7211	52.78	581
Total	13662	100.00	1100

6.14 Total expected revenue for the control period FY 2011-12 to FY 2015-16

The total expected revenue for DGVCL comprises of revenue from sale of power at existing tariff, other consumer related income, agriculture subsidy and other subsidies.

The total revenue as estimated by the Commission for the control period FY 2011-12 to FY 2015-16 is shown in the Table below:

Table 6.89: Total Revenue for FY 2011-12

(Rs. crore)

Sl. No.	Category	Av. Tariff (Paise / Unit)	Units sold / revenue									
			2011-12		2012-13		2013-14		2014-15		2015-16	
			MU	Rs. (crore)	MU	Rs. (crore)	MU	Rs. (crore)	MU	Rs. (crore)	MU	Rs. (crore)

10	FPPPA	0.61		626.65		667.34		710.83		756.40		805.20
11	Add: Other income (consumer related)			63.00		63.00		63.00		63.00		63.00
12	Total			4920.03		5224.41		5549.16		5895.16		6265.32
13	Add: Agriculture subsidy			48.00		49.00		50.00		50.00		49.00
14	Total revenue including subsidy			4968.03		5273.41		5599.16		5945.16		6314.32

6.15 Determination of differential Bulk Supply Tariff

As discussed in the paragraph 6.8.10, it would be possible to ensure uniform retail consumer tariffs in the four DISCOMs by adopting Bulk Supply Tariff methodology.

The BST for DISCOMs includes the cost of power purchase from various generating stations, the transmission costs of PGCIL and GETCO and the cost of bulk supplier i.e. GUVNL. The revenue earned from sale of surplus power is subtracted from the total power purchase cost to arrive at net power purchase cost to be charged to the four DISCOMs. The amount available for power purchase to the four DISCOMs is arrived at by subtracting the sum of total expenses other than the power purchase

cost of all the four DISCOMs from the total revenue of the four DISCOMs with existing tariffs.

The difference between the net power purchase cost and the amount available with the four DISCOMs for power purchase indicates the revenue gap. This revenue gap varies from DISCOM to DISCOM. The bulk supply tariffs for the four DISCOMs are fixed keeping in view the magnitude of the revenue gap.

6.15.1 Aggregate amount available with the four DISCOMs for Power Purchase

The difference between the total revenues and the total expenses other than power purchase incurred by the four DISCOMs indicates the amount available for power purchase with the DISCOMs as shown below:

Table 6.90: Aggregate Revenue available for power purchase from FY 2011-12 to FY 2015-16

(Rs. crore)

Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Total Revenue of DISCOM : (A)					
DGVCL	4968.03	5273.41	5599.16	5945.16	6314.32

UGVCL	573.59	627.53	676.79	724.86	780.98
Total Expenditure	2,274.70	2,497.56	2,740.22	2,976.77	3,216.30
Aggregate Amount Available with the DISCOM for Power Purchase : (A-B)					
DGVCL	4620.94	4899.52	5202.77	5524.70	5864.22
MGVCL	2898.11	3173.19	3476.22	3812.17	4175.48
PGVCL	4970.82	5176.44	5377.46	5614.36	5900.21
UGVCL	4583.75	4989.90	5468.13	6028.08	6673.82
Total Amount available for Power Purchase	17073.63	18239.05	19524.58	20979.31	22613.74

6.15.2 Calculation of Gap

The difference between the net power purchase cost and the aggregate amount available for power purchase represents the gap. The gap is as shown below:

Table 6.91: Revenue Gap from FY 2011-12 to FY 2015-16

(Rs. crore)					
Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
Total Power Purchase Cost (A)	17680.3	20434.03	22718.4	24295.43	27710.36
Aggregate Amount available for Power Purchase (B)	17073.63	18239.05	19524.58	20979.31	22613.74
Gap (A-B)	606.67	2194.98	3193.82	3316.12	5096.62

6.15.3 Allocation of Gap

The gap calculated above has been allocated among the various DISCOMs in the ratio of the energy sale (MUs) of the respective companies to the sector total energy sale (MUs). The percentage of sales of each DISCOM and the gap allocation for each DISCOM are given in the following tables.

Table 6.92: Energy requirement and percentage of energy requirement

Year	Energy requirement					Percentage of Energy requirement			
	DGVCL	MGVCL	PGVCL	UGVCL	Total	DGVCL	MGVCL	PGVCL	UGVCL

10	Total Expenditure (7 to 9)	5181.53	5819.57	6355.07	6727.81	7471.37
11	Less: Non-Tariff Income	88.62	88.62	88.62	88.62	88.62
12	Aggregate Revenue Requirement (10 - 11)	5092.91	5730.95	6266.45	6639.19	7382.75

6.17. Estimated Revenue Gap for FY 2011-12 for DGVCL

6.17.1. Based on the above, the estimated revenue gap for FY 2011-12 at existing tariff is as outlined in the table below:

Table 6.96: Estimated Revenue Gap for FY 2011-12 at Existing Tariff for DGVCL
(Rs. crore)

Sl. No.	Particulars	Projected by DGVCL	Approved by the Commission
1	Aggregate revenue requirement	5282	5,092.91
2	Revenue gap from True up of FY 2009-10	34	0.00
3	Total aggregate revenue requirement	5316	5,092.91
4	Revenue with existing tariff	4245	4230.38
5	PPPA charges @ 61 paisa/kWH	637	626.65
6	Other income (Consumer related)	63	63.00
7	Agriculture Subsidy	60	48.00
8	Total revenue including subsidy	5006	4968.03
9	Gap (3-8)	310	124.88

7. Compliance of Directives

7.1 Compliance of earlier Directives

The Commission, in its tariff order dated 31st March, 2010, had issued various directives to DGVCL, which has submitted a compliance report on the directives issued in the current petitions for approval of ARR for the control period FY 2011-12 to FY 2015-16 and determination of tariff for FY 2011-12.

The Commission's comments on the status of compliance of the directives by DGVCL are given below. The Commission has also given fresh directives to the licensee, wherever required.

Directive 1: Consumption by agricultural pump-sets

Directive issued in Tariff order dated 14th Dec 2009,

“A realistic consumption by agricultural pump-sets could be obtained only by providing meters at distribution transformers and properly noting LT losses on the LT network below distribution transformers. The progress on this is very poor. Only 19316 transformers are metered, out of the target of 35924 transformers. The metering of distribution transformers should be expedited.

Wherever meters are provided at the distribution transformers, the consumption by the pump-sets under these transformers may be assessed and furnished to the Commission by reading the meters regularly. A report for the year FY 2008-09 may be furnished by May 2009.”

The DGVCL had submitted its compliance to Directives vide its letter dated 08.02.2010. After considering the same, the Commission passed remarks in Tariff Order dated 31.03.2010 as under:

“The Petitioner is directed to submit the number of agricultural consumer connections metered till now and a realistic, time-bound plan of completion of metering of the remaining connections. The Commission feels that the progress on the same is very poor and the Petitioner should expedite the metering process and complete the same

at the earliest. Further, the Petitioner is directed to expedite the study and to share the detailed approach and methodology with the Commission."

Compliance:

The status of providing meters to agriculture consumers as on 30.06.2010 is given as under:

Total No. of agricultural consumers	As on 30.06.2010		
	Metered consumers	Un-metered consumers	% of metered consumers
89095	43267	45828	48.56

The status of providing meters to agriculture consumers as on 30.09.2010 is given hereunder:

Total no. of agricultural consumers	As on 30.09.2010		
	Metered consumers	Un-metered consumers	% of metered consumers
90228	44450	45778	49.25

It can be seen from the above Tables, that, as against increase of 1143 agriculture consumer connections [which are metered], there is an increase of 1183 metered consumer connections, which implies that 40 nos. of old agricultural consumer connections have been converted from un-metered to metered during this Quarter [Cumulative for the year is 174 nos.].

It was mentioned in Compliance to Directives - Quarterly Reports for Quarter-I that DGVCL will arrange programmes to educate farmers. The progress of these activities is given hereunder:

Sl. No.	Events	Progress
1.	To educate farmers for installation of Ag. Meters	785
2.	Farmers meetings arranged at village level	07
3.	Press Notes in leading newspapers	Nil
4.	To encourage farmers for metered tariff by explaining the benefit of metered tariff upon HP based tariff	785
5.	Nivedan to be sent to Agricultural consumers	785

Further, the study and analysis of consumption by Agriculture metered and un-metered consumers was assigned to M/s. Feedback Venture Pvt. Limited vide GUVNL Order no. GUVNL/ ACCTT/GM(F&A)/ 332 dated 06.09.2008 and UGVCL is

working as the Nodal Company for this purpose. The data required for the study has been collected by M/s. Feedback Venture Pvt. Limited and is under analysis.

Commission's comments

The status of providing meters to agricultural consumers and educating agricultural consumers on the need for installation of meters to record the consumption by pump-sets is noted.

Expeditious action shall be taken to provide meters to balance agricultural consumers and the programme of metering the balance agricultural consumer connections shall be submitted by November, 2011.

Directive 2: Distribution loss

The Commission had directed that DGVCL should prepare a road map for reduction of losses for the next 5 years (FY 2007-08 to FY 2011-12). The technical and non-technical losses should be segregated and investments required for system improvements, metering, etc., be estimated. The Petitioner should effectively utilise the APDRP funds for reduction of losses in urban areas.

The DGVCL had submitted its compliance to Directives vide its letter dated 08.02.2010. After considering the same, the Commission passed remarks in Tariff Order dated 31.03.2010 as under:

The Commission has noted compliance regarding utilisation of APDRP funds and further investments required to reduce technical and commercial losses. The Petitioner was directed to submit the actual expenditure incurred, as against the planned expenditure mentioned above, in the next APR exercises. Further, the Petitioner shall also demonstrate the incremental impact on the distribution loss due to incurring of the said capital expenditure, especially the impact on JGY feeders.

Compliance:

The Directive of the Commission to submit the actual expenditure incurred, as against the planned expenditure mentioned above in the next APR exercises, is noted by the Company and the same will be taken care of by the Company during the next APR Petition filing.

However, during the year 2009-10, 79 Nos. feeders were selected of JGY category under SI Scheme for reduction of T&D losses. On implementation of SI Scheme, various rectification activities were carried out throughout the year and saving of 18.67 MU of power has been affected, for which the Company has made expenditure of Rs. 11.08 crore.

System Improvement (S.I.) Scheme

Year	No. of feeders covered		Expenditure [in Rs. Crores]	
	Estimated	Actual	Estimated	Actual
2010-11	79 Nos.	79 Nos.	33.33	06.45

Under the R-APDRP Scheme, the status is as under:

Part-A:

For IT applications:

R-APDRP Scheme, Part-A covers various IT based applications, which when fully implemented, will help reduction in losses of DGVCL. The project cost of Part-A of R-APDRP Scheme is Rs. 26.02 crores, out of which Rs. 23.38 crores have been sanctioned by Project Finance Corporation [PFC] of India. At present, under this Scheme, various applications, viz., in GIS, network analysis, web self service, customer care centre, Metering, billing, revenue collection, MDM/MDAS, MIS, etc., are under implementation.

Part-B:

PFC credited the 60% of admissible 25% project cost [Rs. 45.80 Cr] for Part-B, i.e., Rs. 27.48 crore on 22.09.2010. The required baseline data of all eight [8] towns is submitted to the third party evaluating agency, National Productivity Council [NPC], and nodal agency, Power Finance Corporation [PFC], for which approval is awaited.

Commission's comments

Action taken on implementing of APDRP and system improvement schemes to reduce distribution losses are noted. Current status on implementation of RAPDRP-Part-A and Part-B are also noted.

Regarding distribution losses, the Commission approved distribution losses at 12.45% for the FY 2010-11 in the tariff order dated 31st March, 2010. DGVCL has

projected the distribution loss of 13.20% for FY 2011-12 with a trajectory to reduce to 12.20% by 2015-16.

The loss reduction achieved is not appreciable. DGVCL shall make efforts to achieve loss trajectory given for the control period in the present tariff Order.

Directive 3: Effective metering, billing and revenue realization

A report on action to be taken to improve meter reading and billing shall be submitted.

The DGVCL had submitted its compliance to Directives vide its letter dated 08.02.2010. After considering the same, the Commission passed remarks in Tariff Order dated 31.03.2010 as under:

The Commission has also noted the action to be taken to improve meter reading and billing.

Compliance:

No further information/compliance is required.

Commission's comments

Compliance is noted.

Directive 4: Cent percent metering

The Commission had directed that the Consumers may be convinced on the need for energy accounting by the utility and providing metering for un-metered services may be expedited.

The DGVCL had submitted its compliance to Directives vide its letter dated 08.02.2010. After considering the same, the Commission passed remarks in Tariff Order dated 31.03.2010 as under:

The metering of distribution transformers on Agriculture dominated feeders shall be accorded priority and expedited.

Compliance:

The detail of meters provided to consumers is given hereunder [as on 30.09.2010]:

Category of consumers	No. of consumers	Metered Connections	Un-metered Connections	% of metered Connections
Residential	1732611	173261	0	100%
Commercial	242191	242191	0	100%
Industrial LT	53105	53105	0	100%
Public lighting	4432	4432	0	100%
Agriculture	90238	44450	45788	49.25%
Water works	10794	10794	0	100%
Industry HT	2325	2325	0	100%
Railways	05	05	0	100%

The status report on metering of Agricultural Domestic Feeders, as on 30.09.2010, is as under:

Sl. No.	Description	% Completed
1.	11 kV / 22 kV feeders	100%
2.	Distribution Transformer on Ag. Dom. feeders	33.61%
3.	Distribution Transformer on other than Ag. Dom. feeders	58.88%
4.	Individual Consumers other than Agriculture consumers	100%
5.	Agriculture consumers	49.25%

Commission's comments

It is noted that all consumer connections, other than agricultural, are metered and only 49.25% of agricultural consumer connections are metered. Metering of balance agricultural consumer connections shall be expedited. The programme for providing meters for the remaining consumer connections shall be submitted to the Commission by November, 2011. The metering of balance distribution transformers shall be expedited. The programme for providing meters at these transformers shall also be submitted by November, 2011.

Directive 5: Business Plan

The Commission had directed that the preparation of Business Plan, including techno-economic justifications of the proposed schemes, shall be expedited.

Compliance:

The DGVCL has prepared Business Plan and the same is submitted along with the MYT Petition.

Commission's comments

Compliance is noted.

Directive 6: Allocation of PPAs

The Commission had directed that the allocation of PPAs shall be firmed up at the earliest.

Compliance:

Distribution Companies are allocated their PPAs from 5th April, 2010. PPA allocation is reviewed and revised as and when new capacity addition is there, or based on the requirement of the DISCOMs.

Since paying capacity of the four distribution companies is different on account of different consumer mix and load, permanent allocation of PPA may distort the requirement of ARR and consequently tariffs. Therefore, PPA allocation shall be a dynamic exercise, in which allocation will undergo changes very frequently. Hence, in the tariff petitions, power purchase cost is allocated by GUVNL out of the total pooled power purchase cost and is not any PPA specific.

Commission's Comments

It is noted from the ARR and tariff petition filed for the control period FY 2011-16 that the system of allocation of PPPAs to DISCOMs is withdrawn. It is stated that GUVNL will purchase power from various sources and supply the same to DISCOMs at different bulk supply rates, in order to maintain uniform tariff to consumers in all the four DISCOMs.

Directive 7: Distribution Transformer failure

The Commission has directed that the DISCOM should take measures to reduce the transformer failures and adhere to the provision of standards of performance. It shall henceforth provide the failure rate for the year under review in every APR petition.

The DGVCL had submitted its compliance to Directives vide its letter dated 08.02.2010. After considering the same, the Commission passed remarks in Tariff Order dated 31.03.2010 as under:

The compliance by the Petitioner on this directive is noted.

Compliance:

No further information/compliance is required.

Commission's comments

Compliance is noted

Directive 8: Internal Processes and Procedures for Timely Meter Reading

The Commission had directed that DGVCL shall provide details of the internal processes and procedures which are put in place to ensure that meter readers read the meters on time. It shall also provide the details of the process taken to correct the discrepancies, if any, found

The DGVCL had submitted its compliance to Directives vide its letter dated 08.02.2010. After considering the same, the Commission passed remarks in Tariff Order dated 31.03.2010 as under:

The compliance by the Petitioner on this directive is noted.

Compliance:

No further information/compliance is required.

Commission's comments

Compliance is noted.

Directive 9: Number of Old Meters to be Replaced

The Commission has directed DGVCL to submit, in advance, the number of old meters it plans to replace in every ARR petition. Subsequently, in the APR petition for that year, it shall also submit the details of actual meters replaced vis-à-vis the target.

The DGVCL had submitted its compliance to Directives vide its letter dated 08.02.2010. After considering the same, the Commission passed remarks in Tariff Order dated 31.03.2010 as under:

The Commission has noted the progress on Automatic Meter Reading facility and observes that progress is slow and needs to be expedited. The Petitioner shall continue the practice of submitting, in advance, the number of old meters it plans to replace in every ARR petition, along with the progress achieved for the same.

Compliance:

On receipt of the Tariff Order by the Commission on 31.03.2010, DGVCL has reviewed the programme for the replacement of old meters and it is essential to replace the old meters immediately. From April-2003, DGVCL is procuring only quality / static meters. So the meters installed w.e.f. April, 2003 are all quality meters only. The number of meters installed or replaced during the period from 01.04.2003 to 31.03.2010 are as under.

Sl. No.	Year	Old meters to be replaced at the beginning of the year	Meters replaced by Quality/Static meters during the year	Balance Old meters to be replaced at the end of the year
1.	2003-04	1329412	116849	1212563
2.	2004-05	1212563	162828	1049735
3.	2005-06	1049735	197456	852279
4.	2006-07	852279	114302	737977
5.	2007-08	737977	286391	451586
6.	2008-09	451586	120962	330624
7.	2009-10	330624	82103	248521

Looking to the above, the planning and the achievement in respect of 248521 meters to be replaced is as under:

Year	Metered to be replaced by quality / static meters			
	Planning	Achievement		
		Quarter-I	Quarter-II	Cumulative
2010-11	78000	0	23628	23628
2011-12	170521	-	-	-

As mentioned in Qtr-I report, the meters could not be replaced as per the target since the Company was asked to go in for the common protocol DLMS meters. The procurement of such DLMS meters has taken a little more time than expected due to testing by CPRI, Bangalore. It is intimated that the tools for testing of these meters will be ready at the end of August-2010. Thereafter, the supplier will be able to supply common protocol DLMS meters and the Company will be able to achieve the target of replacement of meters.

Commission's Comments

The slow progress in replacement of old meters is noted with concern. It is seen that about 2,48,521 numbers old meters are yet to be replaced. It is proposed to replace

1,70,521 meters during FY 2011-12. All the old meters shall be replaced by FY 2012-13. The status of replacement as on 30th September, 2011 shall be reported quarterly.

Directive 10: Financial Figures in units of Rupees crore

The Commission has directed to submit all financial figures in its future ARR and APR petitions in units of Rupees crore.

The DGVCL had submitted its compliance to Directives vide its letter dated 08.02.2010. After considering the same, the Commission passed remarks in Tariff Order dated 31.03.2010 as under:

The Commission has noted the submission and directs the Petitioner to adhere to its submission made above in its Compliance Report.

Compliance:

All future APR and ARR petitions of the Company will be filed with the unit of Rupees crore.

Commission's comments

Action taken is noted.

Directive 11: O&M Expenses Estimation

The Commission had directed the DGVCL to include the estimated expenses of the following items of the ARR into O&M expenses:

- Other Debits
- Extraordinary Items
- Net Prior Period Expenses / (Income)
- Other Expenses Capitalised

Compliance:

Directive of Commission is noted and petition is submitted accordingly.

Commission's Comments

Action taken is noted.

Directive 12: Depreciation Calculation

The Commission had noted that DGVCL has calculated the depreciation by applying the new rates on the total gross assets, without segregating the assets as mentioned in Clause 17 of Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2009. The Petitioner is directed to submit the recomputed depreciation as per Clause 17 during the truing-up of FY 2010-11.

Compliance:

In compliances to the above directive, it is to clarify that Clause 17, Point 4 of CERC (Terms and Conditions of Tariff) Regulations, 2009 stipulates as under:

“The depreciation is to be calculated annually based on Straight Line Method and at rates specified in Appendix-III to these regulations for the assets of the generating station and transmission systems.”

Further, it is provided that:

“The remaining depreciable value as on 31st March of the year closing after a period of 12 years from the date of commercial operations shall be spread over the balance useful life of the assets.”

In this regard, it is to state that, at the time of unbundling of erstwhile Gujarat Electricity Board, Government of Gujarat had issued a Notification of transfer scheme, wherein the Government had vested assets to DGVCL and thereafter also notified opening balance-sheet mentioning the gross values of such assets and accumulated depreciation.

Thus, as per the notification of Government of Gujarat, asset-wise details which have completed a period of 12 years from the date of commercial operation, gross value, cumulative depreciation were not specified. Hence, the exact details, as per Clause No.17 of CERC (Terms and Conditions of Tariff) Regulations, 2009, cannot be provided.

The DGVCL has started commercial operation w.e.f. 01/04/2005. For Aggregate Revenue Requirement petition filing, DGVCL has provided depreciation at the rates notified by CERC/GERC, as applicable from time to time.

Under the circumstances, the methodology of computing depreciation, in line with the directive issued by the Commission, would be as under:

The depreciation has to be provided up to a period of 12 years on block of assets which have been added in the asset-grouping after 01.04.2005. Thereafter, the remaining depreciation will be on the balance useful life of the assets. In case of existing projects, the balance depreciable value after 12 years from 01.04.2005 will be worked out after deducting cumulative depreciation claimed till 31.03.2017 and will be spread on the balance useful life of the assets.

Therefore, the Commission is requested to allow DGVCL to compute the depreciation at rates notified by regulations and to provide it upto a period of 12 years from 01/04/2005 and thereafter to work out the depreciation on the balance useful life of the assets.

Commission's comments

The proposal of DGVCL is agreed to.

Directive 13: Segregation of total loans

The Commission had directed DGVCL to segregate the total loans between loans utilised for financing the working capital and loans used for incurring capital expenditure in future petitions.

Compliance:

The above directive has been noted and the Company will, in its future petitions, submit details of the total loans, loans utilised for financing the working capital and loans used for incurring capital expenditure.

Commission's comments

Compliance is noted.

7.2 Fresh Directives

Directive 1: Category-wise cost-to-serve (Cost of supply)

Some of the stakeholders pointed out that the DISCOMs have not implemented the category-wise cost-to-serve as required under, section 61 of the Electricity Act, 2003. The DISCOM has submitted that the cost to serve report for FY 2009-10 is under preparation.

The DISCOM is directed to submit the report on category-wise, cost-to-serve report by November, 2011.

Directive 2: Poor quality of supply and poor voltages

Some of the stakeholders have complained during the public hearing and also in written submission that quality of supply and the voltages are poor, particularly, in the case of power supply to agricultural consumers.

The DISCOM is directed to ensure quality power supply with proper voltages to all categories of consumers particularly to consumers at tail end of feeders by providing required reactive compensation etc.

Directive 3: L&T Meters

While responding to a complaint by some of the stakeholders during the public hearing and through written submission on the functioning of L&T meters, the DISCOM has responded that the issue is 'sub-judice'. The DISCOM is directed to submit the report on the nature of complaint by the consumers and the present status of the case.

Directive 4: Interest on Capital investment for agricultural connections / extension

Some of the stakeholders have suggested that the State Government shall be asked to bear the burden of interest on capital investment on agricultural extensions and connections.

The DISCOM is directed to submit a report on the sources of funding for the extension of supply to agricultural consumers and service connections, and the costs

and the interest on such investments, and how the interest on such investments is treated.

Directive 5: Distribution losses

It is pointed out by a number of stakeholders that the DISCOMs have not segregated the technical and commercial losses and the burden of commercial losses is being passed on to all consumers.

The DISCOM is directed to get the technical and commercial losses segregated by conducting proper energy audit. Such segregation is necessary as the measures required to be taken for the two types of losses are different.

Action taken shall be reported to the Commission by November, 2011.

8. Fuel and Power Purchase Price Adjustment

8.1 Fuel Price and Power Purchase Price Adjustment

The Commission had approved the formula for Fuel Price and Power Purchase Cost Adjustment vide order, under Case No.2 fo 2003 dated 25th June, 2004.

The DGVCL in its MYT tariff petition for FY 2011-12 to FY 2015-16 has submitted that the entire procurement of power by DISCOMs is through GUVNL, which purchases power from GSECL and other sources. Therefore, power purchased by GUVNL/DISCOMs from GSECL power stations is also purchase of power, like purchase of power from other sources. Hence, it would not be appropriate to have separate fuel component for increase in fuel cost of GSECL stations in the formula. It is therefore, requested to have one component in the formula for variation in power purchase price including power purchase from GSECL owned stations.

The tariff for the entire power purchased by GUVNL / DISCOMs is determined / approved by the appropriate Commission and hence the entire power procurement by GUVNL / DISCOMs is purchase of power only.

8.2 Power Purchase Price Adjustment (FPPPA)

It is submitted by DGVCL that the incremental cost paid by the GUVNL/DISCOMs compared to the base year for purchase of power from various sources is to be recovered by DISCOMs as per Power Purchase Price Adjustment mechanism. The proposed formula for calculation of per unit power purchase price adjustment charges is as follows:

$$FPPPA = [(PPCA-PPCB)]/1-(A)$$

PPCA	Is the average power purchase cost per unit of delivered energy, computed based on the operational parameters approved by the Commission or principles laid down in the power purchase agreements in Rs. / KWh for all the generating stations who have supplied power in the given quarter, calculated as total power purchase cost billed in Rs. Million divided by the total quantum of power purchase in million units made during the quarter.
-------------	---

Dakshin Gujarat Vij Company Limited
Truing up for FY 2009-10, APR for FY 2010-11,
ARR for FY 2011-12 to FY 2015-16 and Tariff for FY 2011-12

PPCB	Is the approved average base power purchase cost per unit of delivered energy for all the generating stations considered by the Commission for supplying power to the company in Rs. / KWh, calculated as the total power purchase cost approved by the Commission in Rs. Million divided by the total quantum of power purchase in million units considered by the Commission.
LA	Is the weighted average of the approved level of Transmission and Distribution losses for the four DISCOMs applicable for a particular quarter.

The DGVCL has also furnished the contracted capacity from each source, the total fixed cost and the variable cost / kWh for central generating stations, IPPs, GSECL for the year FY 2011-12 as given below:

Table 8.1: Existing capacity allocation to GUVNL for FY 2011-12

Commission's decision

The Commission has examined the request of DGVCL. It is considered that the formula approved by the Commission covers both fuel price adjustment and power purchase adjustment components and could be applied to the extent required for fuel price adjustment or power purchase adjustment or both.

The FPPPA formula approved by the Commission in the order dated 25th June, 2004 is given below:

$$FPPPA = [F_{OG} + PPP_1 + PPP_2] \div [S.E.]$$

Where,

$$F_{OG} = \sum_{n=1}^k [(H_B \times OGD_A) \times (Fuel C_A - Fuel C_B)]$$

Where,

F_{OG}	Adjustment on account of variations in delivered cost of Fuel at GEB's Thermal Power Stations Rs. in millions
n	1 to k, the thermal power stations in GEB. Details at Table-8.
OGD_A	is the actual level of delivered energy at the bus bar (net generation) from GEB's thermal plants in million units during the control period.
H_B	is the base station heat rate in K.Cal./ Kwh calculated on the net output using permitted auxiliary consumption (Table -8)
$Fuel/C_A$	is the new landed price of fuel at relevant GEB's generating stations, expressed in Rs. / Kcal calculated after <u>allowing only statutory / notified increases (or decreases) in the price of fuel/railway freight, taxes and duties on fuel as well as fuel price increase by central/state Government PSUs.@</u>

FuelC_B	is the base## landed price of fuel at relevant GEB's generating stations, expressed in Rs. / Kcal calculated using the base data. This parameter is constant (frozen) for the various quarters (periods) for which increases in fuel prices is being permitted.
--------------------------	--

$$PPP_1 = \sum_{m=1}^k [(VC_A - VC_B) \times Q_A] ;$$

Where,

PPP₁	Adjustment on account of variable cost of power purchased in Rs. Millions
m	1 to k, the sources from which power is purchased
VC_A	Is the variable cost per unit of delivered energy, computed based on the principles laid down in the power purchase agreements in Rs. / KWh
VC_B	Is the base ## variable cost per unit of delivered energy from each source in Rs. / KWh
Q_A	Is the actual level of power purchases from each source in million units.

Base year for this order is Financial Year 2003-04

$$PPP_2 = \sum_{m=1}^k [(FC_A - FC_B)]$$

Where,

PPP₂	Adjustment on account of fixed cost of power purchased in Rs. Millions
m	1 to k, the sources from which power is purchased
FC_A	Is the actual fixed cost paid in Rs. Millions
FC_B	Is the base ## fixed costs payable in Rs. Millions

Base year for this tariff order is Financial Year 2003-04

and

$$S.E.(in MU) = [(Total Sales in MU + Excess T \& D loss in MU)]$$

Where,

Total Sales = Actual energy sold to metered categories in MU + Estimated energy supplied to un-metered consumers based on norms approved, in MU

Excess T & D loss in MU=

$$\{(Net Generation in MU + Power Purchase in MU - Total sales in MU)\} -$$

$$\{(Net\ Generation\ in\ MU + Power\ Purchase\ in\ MU) \times (\%T\&\ D\ loss\ Norm)\}$$

Where,

%T & D loss Norm = % T & D loss level approved by the Commission.

8.3 Base price of fuel of GSECL stations

The Commission has approved the operational parameters for each source / station variable cost / kWh, total fixed cost for GSECL central generating stations, IPPs and others for the FY 2011-12 as given below:

Stations	Rated Capacity allocated to GUVNL (MW)	Auxiliary Consumption (%)	FC Approved MYT (Rs. Crores)	VC (Rs./Unit)
GSECL Plants				
Ukai TPS	850	9	246.64	1.710

GUVNL may claim the increase in the power purchase cost in accordance with the formula approved by the Commission in June, 2004 and minor changes introduced by the order dated 5th May, 2006 and pass on to the DISCOM to be recovered from the consumers as per orders of the Commission from time to time.

8.4 Base FPPPA charge is fixed at 61 paise/unit.

Information regarding FPPPA recovery and the FPPPA calculations submitted to the Commission for approval shall be kept on website of the Licensee / GUVNL as and when such proposal is submitted by the Licensee / GUVNL.

For any increase in FPPPA beyond ten (10) paise per kWh in a quarter, prior approval of the Commission shall be necessary, and only on approval of such increase by the Commission, the FPPPA can be billed to the consumers.

For any claim of FPPPA, the documents for approval of FPPPA shall be submitted to the Commission within one month from end of the relevant quarter.

9. Wheeling charges and cross subsidy surcharge

9.1 Allocation matrix

Regulations 88.1 of MYT Regulations, 2011 of GERC stipulates that the Commission shall specify the wheeling charges of distribution wires business of the distribution licensees in its ARR and Tariff Order.

The DGVCL has provided the allocation matrix for allocation of costs between wires business and retail supply business as notified in the GERC (MYT) Regulations, 2011 (Regulation 81.1) as shown in the table below:

Table 9.1 Allocation matrix for segregation of wheeling and retail supply for DGVCL for the FY 2011-12

Sl. No.	Allocation Matrix	Wire Business	Retail Supply Business
1	Power Purchase Expenses	0%	100%
2.1	Employee expenses	60%	40%
2.2	Repair & Maintenance expenses	90%	10%
2.3	Administration & General Expenses	50%	50%
2.4	Other Debits	50%	50%
2.5	Extraordinary Items	50%	50%
2.6	Net Prior Period Expenses / (Income)	25%	75%
2.7	Other Expenses Capitalised	55%	45%
3	Depreciation	90%	10%
4	Interest & Finance charges	90%	10%
5	Interest on Working Capital & Security Deposit	10%	90%
6	Bad debts written off	0%	100%
7	Income tax	90%	10%
8	Return on Equity	90%	10%
9	Non tariff income	10%	90%

It is further submitted that the allocation for other debits, extraordinary items, net prior period expenses (income), with expenses capitalized has been done as per the weighted average expense of wires and retail supply business in these elements (as per the audited accounts for FY 2009-10).

Based on the above allocation the approved ARR for wires business and retail supply business are computed for DGVCL for FY 2011-12.

Table 9.2: Allocation of ARR between wheeling and retail supply business for DGVCL for FY 2011-12

(Rs. crore)				
Sl. No.	Particulars	FY 2011-12	Wire Business	Retail Supply Business
1	Cost of Power Purchase	4745.82	0.00	4745.82
2	Operation & Maintenance Expenses	0		
2.1	Employee Cost	167.12	100.27	66.85
2.2	Repair & Maintenance	27.15	24.44	2.72
2.3	Administration & General Charges	30.67	15.34	15.34
2.4	Other Debits	4.23	2.12	2.12
2.5	Extraordinary Items	0.27	0.14	0.14
2.6	Net Prior Period Expenses / (Income)	0	0.00	0.00
2.7	Other Expenses Capitalised (-)	(46)	(25.30)	(20.70)
3	Depreciation	117.74	105.97	11.77
4	Interest & Finance Charges	55.82	50.24	5.58
5	Interest on Working Capital	0	0.00	0.00
6	Provision for Bad Debts	3.84	0.00	3.84
7	Sub-Total (1 to 6)	5106.66	273.20	4833.46
8	Return on Equity	55.53	49.98	5.55
9	Provision for Tax / Tax Paid	19.35	17.42	1.94
10	Total Expenditure (7 to 9)	5181.54	340.59	4840.95
11	Less: Non-Tariff Income	88.62	8.86	79.76
12	Aggregate Revenue Requirement (10-11)	5092.92	331.73	4761.19
13	Less: other income consumer related	63	6.30	56.70
14	Net ARR	5029.92	325.43	4704.49

9.2 Wheeling charges

The wheeling charges for the four Distribution Companies, DGVCL, MGVCL, PGVCL and UGVCL for the FY 2011-12, the first year of the control period (FY2011-12 to FY 2015-16) as given below are applicable for use of the distribution system of a licensee by other licenses or generating companies or captive power plants or consumers / users who are permitted open access under section 42 (2) of the Electricity Act, 2003.

Sl.No.	Particulars	Units	Amount
1	Distribution costs of the four DISCOMs	Rs. crore	2020.89
2	Distribution cost of the four DISCOMs at 11 kV level (30% of total distribution cost)	Rs. crore	606.27
3	Energy input at 11 kV	MU	56687

Sl.No.	Particulars	Units	Amount
4	Wheeling charges at 11 kV	Ps./kWh	11
5	Wheeling charges at 400 V (LT)	Ps./kWh	39

Detaild computation of wheeling charges is shown in the Annexure-9.1.

Distribution losses

The distribution loss at 11 kV and 400 V during FY 2011-12 are given below:

Particulars	Point of energy delivered	
	11 kV	400 Volts
11 kV, 22 kV and 33 kV	10%	18.73%
400 Volts	-	13.64%

The losses in HT and LT network are 10% and 13.59% respectively, with respect to energy input to the segment of the system. In case injection at 11 kV levels and drawal at LT level envisages use of both the networks i.e. 11 kV and LT, in that case, the combined loss works out to 18.69% of the energy injection at 11 kV network.

The above wheeling charges payable shall be uniform in all the four distribution companies, DGVCL, MGVCL, PGVCL and UGVCL.

9.3 Cross subsidy charges

The cross subsidy surcharge is based on the formula given in the Tariff Policy as below:

$$S = T - [C(1+L/100) + D]$$

Where,

S is the surcharge

T is the Tariff payable by the relevant category of consumers;

C is the Weighted average cost of power purchase of top 5% at the margin excluding liquid fuel based generation and renewable power

D is the Wheeling charges

L is the System losses for the applicable voltage level, expressed as percentage.

The cross subsidy surcharge based on the above formula is worked out as shown in the Table below:

Table 9.3: cross subsidy surcharge for FY 2011-12

Sl. No.	Particulars	HT Industry
1	T	Rs. 5.41/kWh
2	C	Rs. 4.46/kWh
3	D	11 paise/kWh
4	L	10%
5	S= cross subsidy surcharge	39 Ps/kWh

Computation

1. Discom Average HT Tariff

Particulars	Average HT Tariff (Rs./kwh)	FPPPA (Rs./kwh)	Total (Rs./kwh)
HT industry	4.80	0.61	5.41

2. Wt. average Power Purchase cost of top 5% at the margin excluding fuel base generation and renewable power.

Stations	Energy procured (MU)	Avg. Rate (Rs./kWh)	Total cost of power (Rs. cr.)
ESSAR	1028	4.91	504.75
GPEC	1663	4.25	706.78
SIKKA	314	4.07	127.80
Total	3005		1339.33

Average power purchase cost = $(1339.33/3005)*10$ = Rs. 4.46 /kWh

Cross Subsidy Surcharge

H.T $S=5.41-[4.46(1+10/100)+0.11]$ = Rs.0.39 / kWh

Annexure 9.1

Computation of Wheeling charges

Sl. No.	Particulars	Unit	DGVCL	MGVCL	PGVCL	UGVCL	Total
1	Distribution		325.43	370.47	824.13	500.87	2020.89
	(a) 11 kV level (at 30%)	Rs. crore	97.63	111.14	247.24	150.26	606.27
	(b) LT level (at 70%)	Rs. crore	227.80	259.33	576.89	350.61	1414.63

10	Total losses (4+9)	MU	1437.00	1045.00	5931.00	2203.00	10616.00
		%	12.26	12.75	29.00	13.50	18.73

10. Tariff philosophy and Tariff proposals

10.1 Introduction

The Commission has been guided by the provisions of the Electricity Act, 2003, the National Electricity Policy (NEP), the Tariff Policy, the Regulations on Terms and Conditions of Tariff issued by the Central Electricity Regulatory Commission (CERC) and the Regulations on Terms and Conditions of Tariff, 2005 and MYT Regulations, 2011 notified by the Commission.

Section 61 of the Act lays down the broad principles and guidelines for determination of retail supply tariff. The basic principle is to ensure that tariff should progressively reflect the cost of supply of electricity and reduce the cross subsidies amongst categories within a period to be specified by the Commission.

The Commission notified the Multi-Year Tariff (MYT) Framework for determination of tariff on 22nd March 2011. The ARR approved in this order is for the control period FY 2011-12 to FY 2015-16 and the retail supply tariffs are determined for FY 2011-12, the first year of the control period.

The Commission has carried forward the process of rationalization of tariff in order to ensure that the tariffs reflect, as far as practicable, the cost of supply. The Commission has also tried to address operational and field level issues – keeping in view the interest of consumers – while rationalizing the tariff structure.

For example, tariff rate commonly known as commercial tariff was applied to commercial establishments in respect of lighting and fan. Such establishments had to pay at the industrial rate in respect of motive power. A consumer had to keep two meters, which means avoidable cost and inconvenience to both the consumer and the utility. The commercial tariff was also applied to a range of consumers including shops, restaurants, theatres, IT units, telecom units, and even offices, hospitals and educational institutions. In other words, it was applied to almost the entire service sector. In recent times, the structure of the economy has changed; the tertiary or service sector has been playing a dominant role in economic growth. In the context of

development policy, a number of such activities are treated as industrial activities and given priority. Thus, the tariff structure, which was designed in the past, has become anachronistic; in practice and very often it become difficult to distinguish between industrial activities and so called commercial activities, which are mostly service activities at present. This also results in confusion and ambiguity for field level officials of the utilities. In order to address these issues, the Commission has restructured the tariff in respect of High Tension power supply in the tariff order of 31st March 2010. It greatly helped to simplify the processes and procedures, particularly in field and was well received by the utilities and consumers. As a sequel to the process of rationalization, the Commission has, in the present order, attempted to rationalize the tariff structure in respect of Low Tension power supply.

The mandate of the NEP that the tariff should be within plus or minus 20% of the average cost of supply by FY 2010-11 has been the guiding principle. In working out the cost of supply, the Commission worked out the basis of average cost of supply, in the absence of relevant data for working out consumer category-wise cost of supply.

10.2 Proposal of DGVCL for tariff increase and changes in tariff structure

10.2.1 Tariff proposal

The DGVCL has proposed a tariff increase of 25 paise / kWh for all categories of consumers except agriculture and BPL (1-30kWh) households. DGVCL has also requested that the uncovered gap be allowed as “Regulatory Asset” to be recovered in future.

10.2.2 Proposed changes in the tariff structure (LT category)

The DGVCL has proposed certain modifications to the current tariff structure as below:

A. Tariff Rate LFD-II (For Commercial Purposes):

This tariff will apply to the services for the purposes specified in the rate LFD-II in respect of commercial premises, such as shops, offices, banks, studio, storage, distribution pumping stations, refilling of gas, oil and other material, Railway Stations, hostels, laboratories, hospitals, telephone exchanges, infocom, broadcasting and telecasting, stations, training centres, public gardens, cinema theatres, drama

theatres, video parlors, public meeting house, recreation places, multiplexes, malls, workshop, hotels, restaurants, showrooms, educational institutes other than specified under LFD-III etc.

- LFD – II category may be split into LFD- II(a) and LFD- II(b)
- LFD – II (a) shall be contracted load based and up to 15 KW, and LFD-II (b) shall be demand based for the contracted load of 15 KW and above.

The DISCOM submits that the data pertaining to LFD-II (a) & (b) category of consumers is currently not available and hence has not been submitted in the formats. However, LFD-II on a consolidated basis has been submitted for reference. DGVCL requests the Commission to consider the above category keeping in view the practical issue of DISCOM.

B. LTP – I Tariff Category:

Under the head of Minimum Bill per Installation for seasonal consumer, the following clause shall be inserted

- “Up to 10% of monthly average consumption of the previous seasonal period, upto 15% of contracted load can be availed every month during off-seasonal period. In case the consumer exceeds any of these conditions, such consumer, for the relevant billing period, shall be billed under tariff category of LTP-I as if non-seasonal consumer.

C. LTP – III Tariff Category:

LTP-III tariff is a switch over tariff i.e from LTP-I to LTP-III and vice versa. It is proposed to make these tariff categories mutually exclusive; however, LTP –I consumer shall have an option to switch over to LTP – III.

- Sl. no. 4 of the Note provided at the end of tariff provisions be modified as under:
“4. In the event actual maximum demand exceeds 100 KW more than three occasions during the period of six months, the consumer has to switch over to HT Power Supply within a time period of 3 months from last occurrence.”

D. Street Light:

- Minimum Charges clause deleted

E. Agriculture:

Clause 7.2 “No machinery other than to pump water for irrigation (and a single bulb or CFL upto 40 watts) will be permitted under this tariff. Any other machinery connected to the installation shall be charged separately at appropriate tariff for which consumers shall have to take separate connection.”

- BHP is replaced with HP in all categories.

10.2.3 HT category

A. HTP-I:

Maximum Demand and its measurement is proposed as under:

“The maximum demand in KW or KVA, as the case may be, shall mean an average KW/KVA supplied during the consecutive 30/15 minutes or if consumer having parallel operation with the grid and has opted for 3 minutes, period of maximum use where such meter with the features of reading the maximum demand in KW/ KVA directly, has been provided”.

B. Under the head seasonal consumers taking HT supply, the following clause shall be inserted.

“Up to 10% of monthly average consumption of the previous seasonal period and upto 15% of contracted load can be availed every month during off-seasonal period. In case the consumer exceeds any of these conditions, such consumer, for the relevant billing period shall be billed under tariff category of HTP-I as if non-seasonal consumer.”

C. Time of Use Charges:

These charges shall be levied from all consumers

Commission’s Analysis and Decision

With the existing structure of the tariff categories there are different tariff rates for lighting consumption and for motive power consumption. In view of this, a consumer is required to put separate meters for recording separately consumption of lighting and motive power in same premises. There are chances that the consumers may, due to ignorance or oversight, connect small appliances/gadgets in motive power

circuits intentionally and other-wise and this can be considered as ‘theft of Electricity’ under the Electricity Act, 2003. Some of Consumer Associations requested the Commission to remove this categorisation of lighting tariff rates and motive power tariff rates in single premises.

In view of the above, the Commission has decided to combine lighting consumption and motive power consumption into the same category for the purpose of determining tariff.

The existing LFD-I tariff category provides tariff rates for lighting consumption of Residential premises and existing LTP-I category provides tariff rates for motive power consumption (excluding water works) of Residential premises. Now, this category is renamed as “RGP” and modified to cover aggregate consumption of Residential premises having connected load upto 100 kVA.

The existing LFD-II category provides tariff rates for lighting consumption of Commercial/Industrial premises and existing LTP-I category provides tariff rates for motive power consumption of Commercial/Industrial premises. Both of these categories are now merged and installations having connected load upto 40 kW of commercial, industrial, office premises, institutional and other premises are clubbed into one category named as “Non-RGP”.

Installations having aggregate connected load above 40 kW of Commercial / Industrial / office / institutional premises are now covered under existing LTP-III tariff category, which is renamed as “LTMD” category.

The existing LFD-III and LTP-II categories applicable for educational and other institutions registered with Charity Commissioner and R&D laboratories are merged into one category and renamed as “GLP” category with appropriate tariff.

(i) HTP-I

The proposal for the method of measurement of maximum demand and the additional condition for HT seasonal loads proposed to be introduced is approved.

(ii) Time of Use charges

Time of Use charges are introduced for HT consumers below 500 kVA.

Change in Tariff Rates

- For 'RGP' tariff category, Energy charge in paise per unit is revised as below:

Consumption/ Month	Urban		Rural	
	Existing	Revised	Existing	Revised
1-50 unit	280	295	230	255
51-100 unit	310	325	260	285
101-250 unit	375	390	325	350
Above 250 unit	475	480	435	450

- For 'Non-RGP' tariff category, fixed charge for connected load of 10 BHP is revised from existing rate of Rs. 22 per BHP per month to Rs. 30 per kW per month. For connected load above 10 BHP and up to 50 BHP, the existing rate of Rs. 40 per BHP per month is revised to Rs. 55 per kW per month. Energy charge for this category is increased by 20 paise per unit.
- For 'LTMD' category, Energy charge is increased by 20 paise.
- For AG (Agricultural) category, the HP based tariff is increased from Rs. 160 per BHP per month to Rs. 175 per BHP per month.
- For 'Temporary' category, fixed charge is now introduced as Rs. 14 per kW per day and energy charge is fixed at Rs. 4.25 per unit.
- For 'HTP-I' category, demand charges are revised as given below-

Billing Demand	Existing Rate	Revised Rate
First 500 kVA	Rs. 100 per kVA	Rs. 100 per kVA
Next 500 kVA	Rs. 140 per kVA	Rs. 200 per kVA
Next 1500 kVA	Rs. 210 per kVA	Rs. 270 per kVA
Above 2500 kVA	Rs. 240 per kVA	Rs. 270 per kVA

There is no change in energy charge for this category.

- For 'HTP-II' category, demand charges are revised as given below-

Billing Demand	Existing Rate	Revised Rate
First 500 kVA	Rs. 90 per kVA	Rs. 90 per kVA
Next 500 kVA	Rs. 130 per kVA	Rs. 190 per kVA
Next 1500 kVA	Rs. 190 per kVA	Rs. 250 per kVA
Above 2500 kVA	Rs. 220 per kVA	Rs. 250 per kVA

There is no change in energy charge for this category.

- 'Time of Use' charge of 35 paise per unit is introduced for HT consumers having billing demand up to 500 kVA.

- For other LT categories (except metered Ag. Consumers), energy charges are increased by 25 paise per unit.

10.3 Revenue Gap / Surplus

Gap / Surplus of DGVCL for FY 2011-12

The total revenue based on the existing tariff for FY 2011-12 is Rs. 4968.03 crore and the net gap is Rs. 124.88 crore. The Commission has revised the tariff which brings in additional revenue of Rs. 172.47 crore resulting into surplus of Rs. 47.59 crore. The Commission has decided that it will review the same during true up for FY 2011-12 when the audited accounts would be made available to the Commission.

The consolidated gap at existing tariff for 4 Licensees viz. UGVCL, DGVCL, MGVCL and PGVCL is Rs. 606.67 crore for FY 2011-12. Additional revenue due to revision in tariff is expected to be Rs. 611.88 crore, resulting into consolidated surplus of Rs. 5.21 crore.

10.4 Impact of Electricity Duty

During the public hearing, several consumer organizations and others brought to the notice of the Commission the high rates of Electricity Duty in Gujarat. It may be noted that imposition of Electricity Duty is the prerogative of the Government. However, the Commission has noted the issue and observes that there is a need to rationalize Electricity Duty. The Commission feels that the system of *ad-valorem* duty increases the impact of any tariff increase even further.

The *ad-valorem* structure increases the burden on the consumers, impacts on the finances of the utilities and distorts the tariff structure. With the rationalization of the tariff structure by the Commission, there is a need to revisit the structure of electricity duty. The Commission has therefore, suggested that the Government should consider rationalizing Electricity Duty, keeping in view the above aspects and the practices in other States, so that it becomes reasonable, stable and predictable.

COMMISSION'S ORDER

The Commission approves the Aggregate Revenue Requirement (ARR) for Dakshin Gujarat Vij Company Limited (DGVCL) for the control period FY 2011-12 to FY 2015-16 as shown in the following table.

ARR approved for the control period FY 2011-12 to FY 2015-16

(Rs. crore)

Sl. No.	Particulars	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
1	Cost of Power Purchase	4745.82	5357.06	5870.06	6218.73	6932.65
2	Operation & Maintenance Expenses	224.94	237.81	251.41	265.79	281.00
2.1	Employee Cost	167.12	176.68	186.79	197.48	208.77
2.2	Repair & Maintenance	27.15	28.70	30.34	32.08	33.91
2.3	Administration & General Charges	30.67	32.43	34.28	36.24	38.31
2.4	Other Debits	4.23	4.23	4.23	4.23	4.23
2.5	Extraordinary Items	0.27	0.27	0.27	0.27	0.27
2.6	Net Prior Period Expenses / (Income)	0.00	0.00	0.00	0.00	0.00
2.7	Other Expenses Capitalised	(46.00)	(48.00)	(51.00)	(54.00)	(57.00)
3	Depreciation	117.74	135.43	151.49	167.79	184.33
4	Interest & Finance Charges	55.82	50.09	42.26	34.99	32.00
5	Interest on Working Capital	0.00	0.00	0.00	0.00	0.00
6	Provision for Bad Debts	3.84	3.84	3.84	3.84	3.84
7	Sub-Total [1 to 6]	5106.67	5740.74	6272.57	6641.64	7381.32
8	Return on Equity	55.53	59.51	63.17	66.84	70.72
9	Provision for Tax / Tax Paid	19.33	19.33	19.33	19.33	19.33
10	Total Expenditure (7 to 9)	5181.53	5819.57	6355.07	6727.81	7471.37
11	Less: Non-Tariff Income	88.62	88.62	88.62	88.62	88.62
12	Aggregate Revenue Requirement (10 - 11)	5092.91	5730.95	6266.45	6639.19	7382.75

The approved retail supply tariff will be in accordance with the Tariff Schedule annexed to this order. The order shall come into force from 1st September, 2011.

ANNEXURE: TARIFF SCHEDULE FOR FY 2011-12

TARIFF SCHEDULE

**TARIFF FOR SUPPLY OF ELECTRICITY AT LOW TENSION, HIGH TENSION, AND
EXTRA HIGH TENSION**

Effective from 1st September, 2011

GENERAL

1. The tariff figures indicated in this tariff schedule are the tariff rates payable by the consumers of unbundled Distribution Licensees of the erstwhile GEB viz. UGVCL, DGVCL, MGVCL and PGVCL.
2. These tariffs are exclusive of Electricity Duty, tax on sale of electricity, taxes and other charges levied by the Government or other competent authorities from time to time which are payable by the consumers, in addition to the charges levied as per the tariff.
3. All these tariffs for power supply are applicable to only one point of supply.
4. The charges specified are on monthly basis. Distribution Licensee may decide the period of billing and adjust the tariff rate accordingly.
5. The energy supplied under these tariffs can be utilized only within the compact area of the premises not intervened by any area/road belonging to any person or authority other than the consumer.
6. Except in cases where the supply is used for the purpose for which the Distribution Licensee has permitted lower tariff, the power supplied to any consumer shall be utilized only for the purpose for which supply is taken and as provided for in the tariff.
7. Meter charges shall be applicable as prescribed under 'GERC (Licensee's Power to Recover Expenditure incurred in providing supply and other Miscellaneous Charges) Regulations, 2005 as in force from time to time.
8. The various provisions of the GERC (licensee's power to recover expenditure incurred in providing supply and other miscellaneous charges) Regulations will continue to apply.
9. Conversion of Ratings of electrical appliances and equipments from kilowatt to B.H.P. or vice versa will be done, when necessary, at the rate of 0.746 kilowatt equal to 1 B.H.P.
10. The Connected Load for the purpose of billing will be taken as the maximum load connected during the billing period.
11. The Fixed charges, minimum charges, demand charges, meter rent and the slabs of consumption of energy for energy charges mentioned shall not be subject to any adjustment on account of existence of any broken period within billing period arising from

consumer supply being connected or disconnected any time within the duration of billing period for any reason.

12. Contract Demand shall mean the maximum kW for the supply of which licensee undertakes to provide facilities to the consumer from time to time.
13. Fuel Cost and Power Purchase Adjustment Charges shall be applicable in accordance with the Formula approved by the Gujarat Electricity Regulatory Commission from time to time.
14. Payment of penal charges for usage in excess of contract demand / load for any billing period does not entitle the consumer to draw in excess of contract demand / load as a matter of right.
15. The payment of power factor penalty does not exempt the consumer from taking steps to improve the power factor to the levels specified in the Regulations notified under the Electricity Act, 2003 and licensee shall be entitled to take any other action deemed necessary and authorized under the Act.
16. Delayed payment charges for all consumers:

No delayed payment charges shall be levied if the bill is paid within ten days from the date of billing (excluding date of billing).

Delayed payment charges will be levied at the rate of 15% per annum in case of all consumers except Agricultural category for the period from the due date till the date of payment if the bill is paid after due date. Delayed payment charges will be levied at the rate of 12% per annum for the consumer governed under Rate AG from the due date till the date of payment if the bill is paid after due date.

For Government dues, the delayed payment charges will be levied at the rate provided under the relevant Electricity Duty Act.

PART - I

SCHEDULE OF TARIFF FOR SUPPLY OF ELECTRICITY

AT LOW AND MEDIUM VOLTAGE

1.0 Rate: RGP

This tariff is applicable to all services in the residential premises which are not covered under 'Rate: RGP (Rural)' Category.

Single-phase supply- Aggregate load up to 6kW

Three-phase supply- Aggregate load above 6kW

1.1 Fixed Charges/Month:

Range of Connected Load: (Other than BPL Consumers)

(a)	Up to and including 2 kW	Rs. 5/- per month
(b)	Above 2 to 4 kW	Rs. 15/- per month
(c)	Above 4 to 6 kW	Rs. 30/- per month
(d)	Above 6 kW	Rs. 45/- per month

For BPL Household Consumers:

Fixed charges	Rs. 5/- per month
---------------	-------------------

PLUS

1.2 Energy Charges: For the total monthly consumption: (Other than BPL consumers)

(a)	First 50 units	295 Paise per Unit
(b)	Next 50 units	325 Paise per Unit
(c)	Next 150 units	390 Paise per Unit
(d)	Above 250 units	480 Paise per Unit

1.3 Energy charges: For the total monthly consumption – For the consumer below poverty line (BPL)**

(a)	First 30 units	150 Paise per Unit
(c)	For remaining units	Rate as per RGP

**The consumer who wants to avail the benefit of the above tariff has to produce a copy of the Card issued by the authority concerned at the sub-division office of the Distribution Licensee. The concessional tariff is only for 30 units per month.

1.4 Minimum bill (excluding meter charges)

Payment of fixed charges as specified in 1.1 above.

2.0 Rate: RGP (Rural)

This tariff is applicable to all services for residential premises located in areas within Gram Panchayat as defined in the Gujarat Panchayats Act.

However, this is not applicable to villages which are located within the geographical jurisdiction of Urban Development Authority.

Single-phase supply- Aggregate load upto 6kW

Three-phase supply- Aggregate load above 6kW

2.1 Fixed Charges/Month:

Range of Connected Load: (Other than BPL Consumers)

(a)	Upto and including 2 kW	Rs. 5/- per month
(b)	Above 2 to 4 kW	Rs. 15/- per month
(c)	Above 4 to 6 kW	Rs. 30/- per month
(d)	Above 6 kW	Rs. 45/- per month

For BPL Household Consumers:

Fixed charges	Rs. 5/- per month
---------------	-------------------

PLUS

2.2 Energy Charges: For the total monthly consumption: (Other than BPL consumers)

(a)	First 50 units	255 Paise per Unit
(b)	Next 50 units	285 Paise per Unit
(c)	Next 150 units	350 Paise per Unit
(d)	Above 250 units	450 Paise per Unit

2.3 Energy charges: For the total monthly consumption – For the consumer below poverty line (BPL) **

(a)	First 30 units	150 Paise per Unit
(c)	For remaining units	Rate as per RGP (Rural)

**The consumer who wants to avail the benefit of the above tariff has to produce a copy of the Card issued by the authority concerned at the sub-division office of the Distribution Licensee. The concessional tariff is only for 30 units per month.

2.4 Minimum bill (excluding meter charges):

Payment of fixed charges as specified in 2.1 above.

Note: If the part of the residential premises is used for non-residential (commercial) purposes by the consumers located within 'Gram Panchayat' as defined in Gujarat Panchayat Act, entire consumption will be charged under this tariff.

3.0 Rate: GLP

This tariff is applicable to the educational institutes and other institutions registered with the Charity Commissioner and research and development laboratories.

(a)	Fixed charges	Rs. 45/- per month
(b)	Energy charges	345 Paise per Unit

4.0 Rate: Non-RGP

This tariff is applicable to the services for the premises those are not covered in any other tariff categories and having aggregate load upto and including 40kW.

4.1 Fixed charges per month:

(i) First 10 kW of connected load	Rs. 30/- per kW
(ii) For next 30 kW of connected load	Rs. 55/- per kW

PLUS

4.2 Energy charges:

(a)	For installation having contracted load upto and including 10kW: for entire consumption during the month	390 Paise per Unit
(b)	For installation having contracted load exceeding 10kW: for entire consumption during the month	420 Paise per Unit

4.3 Minimum Bill

Minimum bill per installation per month for consumers other than Seasonal Consumers:

Rs. 140 per kW

4.4 Minimum Bill Per Installation for Seasonal Consumers

- (a) "Seasonal Consumer", shall mean a consumer who takes and uses power supply for ice factory, ice candy machines, ginning and pressing factory, oil mill, rice mill, huller, salt industry, sugar factory, khandsari, cold storage plants (including such plants in fisheries industry), tapioca industries manufacturing starch, etc.
- (b) Any consumer, who desires to be billed for the minimum charges on annual basis shall intimate to that effect in writing in advance about the off-season period during which energy consumption, if any, shall be mainly for overhauling of the plant and machinery. The total period of the off-season so declared and observed shall be not less than three calendar months in a calendar year.
- (c) The total minimum amount under the head "Fixed and Energy Charges" payable by the seasonal consumer satisfying the eligibility criteria under sub-clause (a) above and complying with the provision stipulated under sub-clause (b) above shall be Rs. 1600/- per annum per kW of the contracted load.
- (d) The units consumed during the off-season period shall be charged for at a flat rate of 435 Paise per unit.
- (e) The electricity bills related to the off-season period shall not be taken into

account towards the amount payable against the annual minimum bill. The amount paid by the consumer towards the electricity bills related to the seasonal period only under the heads “Fixed Charges” and “Energy Charges”, shall be taken into account while determining the amount of short-fall payable towards the annual minimum bill as specified under sub-clause (c) above.

5.0 Rate: LTMD

This tariff is applicable to the services for the premises those are not covered in any other tariff categories and having aggregate load above 40kW and upto 100kW.

This tariff shall also be applicable to consumer covered in category- ‘Rate: Non-RGP’ so opts to be charged in place of ‘Rate: Non-RGP’ tariff.

5.1 Fixed charges:

	For billing demand up to the contract demand	
(a)	(i) For first 40 kW of billing demand	Rs. 65/- per kW per month
	(ii) Next 20 kW of billing demand	Rs. 100/- per kW per month
	(iii) Above 60 kW of billing demand	Rs. 165/- per kW per month
(b)	For billing demand in excess of the contract demand	Rs. 210/- per kW

PLUS

5.2 Energy charges:

For the entire consumption during the month	425 Paise per Unit
---	--------------------

PLUS

5.3 Reactive Energy Charges:

For all the reactive units (KVARH) drawn during the month	10 paise per KVARH
---	--------------------

5.4 Billing Demand

The billing demand shall be highest of the following, rounded to the next full kW:

- (a) Eighty-five percent of the contract demand
- (b) Actual maximum demand registered during the month
- (c) 15 kW

5.5 Minimum Bill

Payment of demand charges every month based on the billing demand.

5.6 Seasonal Consumers taking LTMD Supply:

5.6.1 The expression, "Seasonal Consumer", shall mean a consumer who takes and uses power supply for ice factory, ice-candy machines, ginning and pressing factory, oil mill, rice mill, salt industry, sugar factory, khandsari, cold storage plants (including such plants in fishery industry), tapioca industries manufacturing starch, pumping load or irrigation, white coal manufacturers etc.

5.6.2 A consumer, who desires to be billed for minimum charges on annual basis, shall intimate in writing in advance about the off-season during which energy consumption, if any, shall be mainly for overhauling of the plant and machinery. The off-season period at any time shall be a full calendar month/months. The total period of off-season so declared and observed shall be not less than three calendar months in a calendar year.

5.6.3 The total minimum amount under the head "Demand and Energy Charges" payable by a seasonal consumer satisfying the eligibility criteria under sub clause 5.6.1 above and complying with provisions stipulated under sub clause 5.6.2 above shall be Rs. 2700/- per annum per kW of the billing demand.

5.6.4 The billing demand shall be the highest of the following:

- (a) The highest of the actual maximum demand registered during the calendar

year.

- (b) Eighty-five percent of the arithmetic average of contract demand during the year.
- (c) 15 kW.

5.6.5 Units consumed during the off-season period shall be charged for at the flat rate of 435 Paise per unit.

6.0 Rate: Non-RGP Night

This tariff is applicable for aggregate load upto 40kW and using electricity **exclusively during night hours** from 10.00 PM to 06.00 AM next day. (The supply hours shall be regulated through time switch to be provided by the consumer at his cost.)

6.1 Fixed Charges per month:

Fixed charges specified in Rate Non-RGP above.
--

PLUS

6.2 Energy Charges:

For entire consumption during the month	220 Paise per Unit
---	--------------------

NOTE:

1. 10% of total units consumed and 15% of the contract load can be availed beyond the prescribed hours.
2. This tariff shall be applicable if the consumer so opts to be charged in place of Non-RGP tariff by using electricity exclusively during night hours as above.
3. The option can be exercised to switch over from Non-RGP tariff to Non-RGP Night tariff and vice versa twice in a calendar year by giving not less than one month's notice in writing.
4. In case the consumer is not fulfilling the conditions of this tariff category, then such consumer for the relevant billing period will be billed under tariff category Non-RGP.

7.0 Rate: LTMD- Night

This tariff is applicable for aggregate load above 40kW and using electricity **exclusively during night hours** from 10.00 PM to 06.00 AM next day. (The supply hours shall be regulated through time switch to be provided by the consumer at his cost.)

7.1 Fixed Charges per month:

Fixed charges specified in Rate LTMD above.
--

PLUS

7.2 Energy Charges:

For entire consumption during the month	220	Paise per Unit
---	-----	----------------

7.3 Reactive Energy Charges:

For all reactive units (KVARH) drawn during the month	10 Paise per KVARH
---	--------------------

NOTE:

1. 10% of total units consumed and 15% of the contract load can be availed beyond the prescribed hours.
2. This tariff shall be applicable if the consumer so opts to be charged in place of LTMD tariff by using electricity exclusively during night hours as above.
3. The option can be exercised to switch over from LTMD tariff to LTMD- Night tariff and vice versa twice in a calendar year by giving not less than one month's notice in writing.
4. In case the consumer is not fulfilling the conditions of this tariff category, then such consumer for the relevant billing period will be billed under tariff category LTMD.

8.0 Rate: LTP- Lift Irrigation

Applicable for supply of electricity to Low Tension Agricultural consumers contracting load up to 125 HP requiring continuous (**twenty-four** hours) power supply for lifting water from surface water sources such as cannel, river, & dam and supplying water directly to the fields

of farmers for agricultural irrigation only.

(a)	Fixed charges per month	Rs. 25/- per HP
PLUS		
(b)	Energy charges For entire consumption during the month	160 Paise per Unit

9.0 Rate: WWSP

This tariff shall be applicable to services used for water works and sewerage pumping purposes.

9.1 Type I – Water works and sewerage pumps operated by other than local authority:

(a)	Fixed charges per month	Rs.15/- per HP
PLUS		
(b)	Energy charges per month: For entire consumption during the month	385 Paise per Unit

9.2 Type II – Water works and sewerage pumps operated by local authority such as Municipal Corporation. Gujarat Water Supply & Sewerage Board located outside Gram Panchayat Area will also attract this tariff:

(a)	Fixed charges per month	Rs.9 per HP
PLUS		
(b)	Energy charges per month: For entire consumption during the month	365 Paise per Unit

9.3 Type III – Water works and sewerage pumps operated by Municipalities/Nagarpalikas and Gram Panchayat or Gujarat Water Supply & Sewerage Board for its installations located in Gram Panchayats:

Dakshin Gujarat Vij Company Limited
Truing up for FY 2009-10, APR for FY 2010-11,
ARR for FY 2011-12 to FY 2015-16 and Tariff for FY 2011-12

Energy charges per month: For entire consumption during the month	275 Paise/Unit
--	----------------

9.4 Time of Use Discount:

Applicable to all the water works consumers having connected load of 50 HP and above for the Energy consumption during the Off-Peak Load Hours of the Day.

For energy consumption during the off-peak period, viz., 1100 Hrs to 1800 Hrs.	30 Paise per Unit
For energy consumption during night hours, viz., 2200 Hrs to 0600 Hrs. next day	75 Paise per Unit

10.0 Rate: AG

This tariff is applicable to services used for irrigation purposes only excluding installations covered under LTP- Lift Irrigation category.

10.1 The rates for following group are as under:

10.1.1 HP Based Tariff:

For entire contracted load	Rs.175/HP/month
----------------------------	-----------------

ALTERNATIVELY

10.1.2 Metered Tariff:

Fixed Charges	Rs. 10 per HP per month
Energy Charges:For entire consumption	50 Paise per Unit per month

10.1.3 Tatkal Scheme:

Fixed Charges	Rs. 10 per HP per month
Energy Charges: For entire consumption	70 Paise per Unit per month

NOTE: The consumers under Tatkal Scheme shall be eligible for normal metered tariff as above, on completion of five years period from the date of commencement of supply.

- 10.2 No machinery other than pump water for irrigation (and a single bulb or CFL up to 40 watts) will be permitted under this tariff. Any other machinery connected in the installation governed under this tariff shall be charged separately at appropriate tariff for which consumers shall have to take separate connection.
- 10.3 Agricultural consumers who desire to supply water to brick manufacturing units shall have to pay Rs. 100/HP per annum subject to minimum of Rs. 2000/- per year for each brick Mfg. Unit to which water is supplied in addition to existing rate of HP based / metered agricultural tariff.
- 10.4 Such Agricultural consumers shall have to pay the above charges for a full financial year irrespective of whether they supply water to the brick manufacturing unit for full or part of the Financial Year.

Agricultural consumers shall have to declare their intension for supply of the water to such brick manufacturing units in advance and pay charges accordingly before commencement of the financial year (i.e. in March every year).

11.0 Rate: SL

11.1 Tariff for Street Light for Local Authorities and Industrial Estates:

This tariff includes the provision of maintenance, operation and control of the street lighting system.

11.1.1 Energy Charges:

For all the units consumed during the month:	360 Paise per Unit
--	--------------------

11.1.2 Optional kVAh Charges:

For all the kVAh units consumed during the month:	270 Paise per Unit
---	--------------------

11.1.3 Renewal and Replacements of Lamps:

The consumer shall arrange for renewal and replacement of lamp at his cost by person

authorised by him in this behalf under Rule-3 of the Indian Electricity Rules, 1956 / Rules issued by CEA under the Electricity Act, 2003.

11.2 Tariff for power supply for street lighting purposes to consumers other than the local authorities and industrial estates:

11.2.1 Fixed Charges:

Rs. 20 per kW per month

11.2.2 Energy charges:

For all units consumed during the month	360 Paise per kWh
---	-------------------

11.2.3 Renewal and Replacement of Lamps:

The consumer shall arrange for renewal and replacement of lamp at his cost by person authorised by him in this behalf under Rule-3 of the Indian Electricity Rules, 1956 / Rules issued by CEA under the Electricity Act, 2003.

11.2.4 Maintenance other than Replacement of Lamps:

Maintenance of the street lighting system shall be carried out by Distribution Licensee.

12.0 Rate: TMP

This tariff is applicable to services of electricity supply for temporary period at the low voltage.

12.1 FIXED CHARGE

Fixed Charge per Installation	Rs.14 per kW per Day
-------------------------------	----------------------

12.2 ENERGY CHARGE

A flat rate of	425 Paise per Unit
----------------	--------------------

Note: Payment of bills is to be made within seven days from the date of issue of the bill. Supply would be disconnected for non-payment of dues on 24 hours notice.

PART-II

TARIFFS FOR SUPPLY OF ELECTRICITY AT HIGH TENSION (3.3 KV AND ABOVE, 3-PHASE 50 C/S), AND EXTRA HIGH TENSION

The following tariffs are available for supply at high tension for large power services for contract demand not less than 100 kVA

13.0 Rate: HTP-I

This tariff will be applicable for supply of electricity to HT consumers contracted for 100 kVA and above for regular power supply and requiring the power supply for the purposes not specified in any other HT Categories.

13.1 Demand Charges;

13.1.1 For billing demand upto contract demand

(a)	For first 500 kVA of billing demand	Rs. 100/- per kVA per month
(b)	For next 500 kVA of billing demand	Rs. 200/- per kVA per month
(d)	For billing demand in excess of 1000 kVA	Rs. 270/- per kVA per month

13.1.2 For Billing Demand in Excess of Contract Demand

For billing demand in excess over the contract demand	Rs. 370 per kVA per month
---	---------------------------

PLUS

13.2 Energy Charges

For entire consumption during the month		
(b)	upto 500 kVA of billing demand	390 Paise per Unit
(c)	For next 2000 kVA of billing demand	410 paise per Unit
(d)	For billing demand in excess of 2500 kVA	420 Paise per Unit

PLUS

13.3 Time of Use Charges:

For energy consumption during the two peak periods, viz., 0700 Hrs to 1100 Hrs and 1800 Hrs to 2200 Hrs	
(a) For Billing Demand upto 500kVA	35 Paise per Unit
(b) For Billing Demand above 500kVA	75 Paise per Unit

13.4 Billing Demand:

The billing demand shall be the highest of the following:

- (a) Actual maximum demand established during the month
- (b) Eighty-five percent of the contract demand
- (c) One hundred kVA

13.5 Minimum Bills:

Payment of “demand charges” based on kVA of billing demand.

13.6 Power Factor Adjustment Charges:

13.6.1 Penalty for poor Power Factor:

- (a) The power factor adjustment charges shall be levied at the rate of 1% on the total amount of electricity bills for the month under the head “Energy Charges” for every 1% drop or part thereof in the average power factor during the month below 90% upto 85%.
- (b) In addition to the above clause, for every 1% drop or part thereof in average power factor during the month below 85% at the rate of 2% on the total amount of electricity bill for that month under the head “Energy Charges”, will be charged.

13.6.2 Power Factor Rebate:

If the power factor of the consumer’s installation in any month is above 95%, the consumer will be entitled to a rebate at the rate of 0.5% (half percent) in excess of 95% power factor on the total amount of electricity bill for that month under the head “Energy Charges” for every 1% rise or part thereof in the average power factor during the month above 95%.

13.7 Maximum Demand and its Measurement:

The maximum demand in kW or kVA, as the case may be, shall mean an average KW/KVA supplied during consecutive 30/15 minutes or if consumer is having parallel operation with the grid and has opted for 3 minutes, period of maximum use where such meter with the features of reading the maximum demand in KW/KVA directly, have been provided.

13.8 Contract Demand:

The contract demand shall mean the maximum KW/KVA for the supply, of which the supplier undertakes to provide facilities from time to time.

13.9 Rebate for Supply at EHV:

On Energy charges:		Rebate @
(a)	If supply is availed at 33/66 kV	0.5%
(b)	If supply is availed at 132 kV and above	1.0%

13.10 Concession for Use of Electricity during Night Hours:

For the consumer eligible for using supply at any time during 24 hours, entire consumption shall be billed at the energy charges specified above. However, the energy consumed during night hours of 10.00 PM to 06.00 AM next morning (recorded by a polyphase meter operated through time-switch) as is in excess of one third of the total energy consumed during the month, shall be eligible for concession at the rate of 75 Paise per unit. The polyphase meter and time switch shall be procured and installed by the consumer at his cost and sealed by the Distribution Licensee.

5.7 Seasonal Consumers taking HT Supply:

13.11.1 The expression, "Seasonal Consumer", shall mean a consumer who takes and uses power supply for ice factory, ice-candy machines, ginning and pressing factory, oil mill, rice mill, salt industry, sugar factory, khandsari, cold storage plants (including such plants in fishery industry), tapioca industries manufacturing starch, pumping load or irrigation, white coal manufacturers etc.

13.11.2 A consumer, who desires to be billed for minimum charges on annual basis, shall intimate in writing in advance about the off-season during which energy consumption, if any, shall be mainly for overhauling of the plant and machinery. The off-season period at any time shall be a full calendar month/months. The total period of off-season so declared and observed shall be not less than three calendar months in a calendar year.

13.11.3 The total minimum amount under the head “Demand and Energy Charges” payable by a seasonal consumer satisfying the eligibility criteria under sub clause 13.12.1 above and complying with provisions stipulated under sub clauses 13.12.2 above shall be Rs.4000/- per annum per kVA of the billing demand.

13.11.4 The billing demand shall be the highest of the following:

- (d) The highest of the actual maximum demand registered during the calendar year.
- (e) Eighty-five percent of the arithmetic average of contract demand during the year.
- (f) One hundred kVA.

13.11.5 Units consumed during the off-season period shall be charged for at the flat rate of 420 Paise per unit.

13.11.6 Electricity bills paid during off-season period shall not be taken into account towards the amount payable against the annual minimum bill. The amount paid by the consumer towards the electricity bills for seasonal period only under the heads “Demand Charges” and “Energy Charges” shall be taken into account while determining the amount payable towards the annual minimum bill.

14.0 Rate HTP-II

Applicability: This tariff shall be applicable for supply of energy to HT consumers contracting for 100 KVA and above, requiring power supply for Water Works and Sewerage pumping stations run by Local Authorities and GW & SB. GIDC Water Works.

14.1 Demand Charges:

14.1.1 For billing demand upto contract demand

(a)	For first 500 kVA of billing demand	Rs.90/- per kVA per month
(b)	For next 500 kVA of billing demand	Rs.190/- per kVA per month
(c)	For billing demand in excess of 1000 kVA	Rs.250/- per kVA per month

14.1.2 For billing demand in excess of contract demand

For billing demand in excess of contract demand	Rs.335 per kVA per month
---	--------------------------

PLUS

14.2 Energy Charges:

For entire consumption during the month		
(b)	upto 500 kVA of billing demand	390 Paise per Unit
(c)	For next 2000 kVA of billing demand	410 Paise per Unit
(d)	For billing demand in excess of 2500 kVA	420 Paise per Unit

PLUS

14.3 Time of Use Charges:

For energy consumption during the two peak periods, viz., 0700 Hrs to 1100 Hrs and 1800 Hrs to 2200 Hrs		
(a)	For Billing Demand upto 500kVA	35 Paise per Unit
(b)	For Billing Demand above 500kVA	75 Paise per Unit

14.4 Billing demand

14.5 Minimum bill

14.6 Power Factor Adjustment Charges

14.7 Maximum demand and its measurement

14.8 Contract Demand

14.9 Rebate for supply at EHV

Same as per HTP-I Tariff

15.0 Rate: HTP-III

This tariff shall be applicable to a consumer taking supply of electricity at high voltage, contracting for not less than 100 kVA for temporary period. A consumer not taking supply on regular basis under a proper agreement shall be deemed to be taking supply for temporary period.

15.1 Demand Charges:

For billing demand upto contract demand	Rs.462/- per kVA per month
For billing demand in excess of contract demand	Rs. 550/- per kVA per month

PLUS

15.2 Energy Charges:

For all units consumed during the month	630 Paise/Unit
---	----------------

PLUS

15.3 Time of Use Charges:

Additional charge for energy consumption during two peak periods, viz., 0700 Hrs to 1100 Hrs and 1800 Hrs to 2200 Hrs	75 Paise per Unit
---	-------------------

15.4 Billing demand

15.5 Minimum bill

15.6 Power Factor Adjustment Charges

15.7 Maximum demand and its measurement

15.8 Contract Demand

15.9 Rebate for supply at EHV

Same as per HTP-I Tariff

16.0 Rate: HTP-IV

This tariff shall be applicable for supply of electricity to HT consumers opting to use electricity exclusively during night hours from 10.00 PM to 06.00 AM next day and contracted for regular power supply of 100 kVA and above.

16.1 Demand Charges:

Same rates as specified in Rate HTP-I

PLUS

16.2 Energy Charges:

For all units consumed during the month	200 Paise per Unit
---	--------------------

16.3	Billing demand	}	Same as per HTP-I Tariff
16.4	Minimum bill		
16.5	Power Factor Adjustment Charges		
16.6	Maximum demand and its measurement		
16.7	Contract Demand		
16.8	Rebate for supply at EHV		

NOTE:

1. 10% of total units consumed and 15% of the contract demand can be availed beyond the prescribed hours for the purpose of maintenance.
2. For the purpose of office lighting, fans etc. the consumer may apply for a separate connection.
3. This tariff shall be applicable if the consumer so opts to be charged in place of HTP-I tariff by using electricity exclusively during night hours as above.
4. The option can be exercised to switch over from HTP-I tariff to HTP-IV tariff and vice versa twice in a calendar year by giving not less than one month's notice in writing.
5. In case the consumer is not fulfilling the conditions of this tariff category, then such consumer for the relevant billing period will be billed under tariff category HTP-I.

17.0 Rate: HTP- V

HT - Agricultural (for HT Lift Irrigation scheme only)

This tariff shall be applicable for supply of electricity to High Tension Agricultural consumers contracting for 100 kVA and above, requiring power supply for lifting water from surface water sources such as canal, river and dam, and supplying water directly to the fields of farmers for agricultural irrigation only.

17.1 Demand Charges:

Demand Charges Rs. 25 per kVA per Month

PLUS

17.2 Energy Charges:

For all units consumed during the month	160 Paise per Unit
---	--------------------

<p>17.3 Billing demand</p> <p>17.4 Minimum bill</p> <p>17.5 Power Factor Adjustment Charges</p> <p>17.6 Maximum demand and its measurement</p> <p>17.7 Contract Demand</p> <p>17.8 Rebate for supply at EHV</p>	}	Same as per HTP-I Tariff
---	---	--------------------------

18.0 Rate: RAILWAY TRACTION

This tariff is applicable for power supply to Railway Traction at 132 kV/66 kV.

18.1 Demand Charges:

(a) For billing demand upto the contract demand	Rs. 160 per kVA per month
(b) For billing demand in excess of contract demand	Rs. 400 per kVA per month

NOTE: In case of the load transfer for traction supply due to non-availability of power supply at preceding or succeeding point of supply or maintenance at Discom's level, excess demand over the contract demand shall be charged at normal rate at appropriate point of supply.

Normal Demand Charges will also apply in case of bunching of trains. However, Discoms shall charge excess demand charges while raising the bills and Railways have to give convincing details and documentary proof of bunching of trains if they want to be charged at the normal demand charges. If satisfactory proof of bunching of trains is provided, Discom shall consider that occasion for normal demand charges, otherwise excess demand charges will be applicable specified as above at 18.1(b).

PLUS

18.2 Energy Charges:

For all units consumed during the month	455 Paise per Unit
---	--------------------

18.3 Billing demand	}	Same as per HTP-I Tariff
18.4 Minimum bill		
18.5 Power Factor Adjustment Charges		
18.6 Maximum demand and its measurement		
18.7 Contract Demand		
18.8 Rebate for supply at EHV
